Examines why public administration's literature has failed to justify the profession's legitimacy as an instrument of

governance Michael Harmon employs the literary conceit of a Final Exam, first “written” in the early 1930s, in a critique of the field's answers to the legitimacy question.

Because the assumptions that underwrite the question preclude the possibility of a coherent answer, the exam

---

should be canceled and its question rewritten. Envisaging a public administration no longer hostage to the legitimacy question, Harmon explains how the study and practice of public administration might proceed from adolescence to maturity. Drawing chiefly from pragmatist philosophy, he argues that despite the universal rejection of the "politics/administration" dichotomy on factual grounds, the pseudo-problem of legitimacy nonetheless persists in the guise of four related conceptual dualisms: 1) values and facts, 2) thinking and doing, 3) ends and means, and 4) theory and practice. Collectively, these dualisms demand an impossible answer to the practical question of how we might live, and govern, together in a world of radical

uncertainty and interdependence. Only by dissolving them can the legitimacy question (Woodrow Wilson's ghost) finally be banished, clearing away the theoretical debris that obscures a more vital and useful conception of governance.

Diese Studie untersuchte die Lernziele des Laborpraktikums Allgemeine Chemie für Lehramtsstudierende im ersten Semester sowie Faktoren für den Kurserfolg, um daraus Aussagen über den Stellenwert von Laborpraktika in der universitären Bildung, insbesondere für langfristigen Studienerfolg, abzuleiten. Dazu wurde ein theoretisches Modell zu Grunde gelegt, welches das Vorwissen der Studierenden und die Lernzielpassung zwischen Studierenden und Lehrenden als zwei entscheidende Faktoren für Kurserfolg berücksichtigt. Constantly high student dropout rates in STEM subjects at German universities, which could be the result of low course success in introductory laboratory courses among other things and increasing criticism about their quality and effectiveness necessitate these laboratory courses to be examined thoroughly. This study investigated the

learning goals of the General Chemistry laboratory course for first-year students in teacher training and factors for course success in order to make statements about the significance of laboratory courses for university education, particularly for long-term study success. For this purpose, a theoretical model that assumes the students prior knowledge and learning goal alignment between students and their lab instructors to be two defining factors for lab course success was used as a framework.

Written in 1950 (just before the fall of Perón's government), Final Exam is Julio Cortázar's bitter and melancholy allegorical farewell to an Argentina from

---

which he would soon be permanently exiled. In a surreal Buenos Aires, a strange fog has enveloped the city everyone's bewilderment. Juan and Clara, two students at a college called "The House," meet up with their friends, and, instead of preparing for their final exam, wander the city, encountering strange happenings and pondering life in cafés. All the while, they are trailed by the mysterious Abel. With its daring typography, shifts in rhythm, as well as wildly veering directions of thought and speech, Final Exam breaks new ground in the territory of stream-of-consciousness writing. Darkly funny—and riddled with unresolved ambiguities—Final Exam is one of Cortázar's best works. Author of Hopscotch and Blow-Up, Julio Cortázar (1914-1984) was a novelist, poet, essayist, and short-story writer. He was born in Brussels, lived in Argentina, but moved permanently to France in 1951, where he became one of the twentieth century's major experimental writers. *Discrete Mathematics* Corwin Press

When Pauline Chen began medical school, she dreamed of saving lives. What she could not predict was how much death would be a part of her work. Almost immediately, she found herself wrestling with medicine's most profound paradox—that a profession premised

on caring for the ill also systematically depersonalizes dying. Final Exam follows Chen over the course of her education and practice as she struggles to reconcile the lessons of her training with her innate sense of empathy and humanity. A superb addition to the best medical literature of our time.

Emeritus, at the University of California Los Angeles, reveals in detail his memories throughout his life. Peripatetic from the start he was born in Rockford, IL., grew up to ten in La Grange; then lived a few years in upstate New York and Toledo, OH. He served in the US Navy in WW II. In the subsequent years he traveled widely and was swept into the struggle against McCarthyism and the turbulence on campuses in the 1960s. The memoir also throws light on the growth of foreign area studies, particularly Southeast Asia, where he lived for many years. As a professor

he was not only active in teaching and research but also in university politics and administration. Professor Wilson is the author of books and articles about Thailand and also about higher education. The story will be interesting to the author's contemporaries as well as younger readers. Relative Distance is a powerful memoir of resilience and faith. While it's an unflinching look at brothers being raised by a violent, abusive father and a

---

detached, mentally ill mother, it's also an inspiring account of two distinctive life journeys and an examination of the role played by family and society in individual homelessness. After surviving his tumultuous upbringing, David Pruitt rises to become a CEO in Corporate America, while his brother, Danny, becomes a long-time homeless traveler. As David helps to grow a fledgling North Carolina business into what is at the time the largest specialty bicycle retailer in the United States, Danny sleeps under overpasses, jumps passing freight cars, shelters, faces death more than once—and encounters the best and worst of America in a restless search to find a better place in the world. Yet, despite their differences, a common thread runs through the distinct trajectories of the brothers' lives: each of them struggles with difficult psychological issues stemming from their troubled past. This deeply moving memoir examines the lifelong challenges that often come for those raised in an abusive home, along with the limitless possibilities we open ourselves to when we allow faith and

determination to overcome judgment and fear.
