*Premium on Affective Education* UNESCO Publishing

This book presents a number of key studies pertaining to the most pressing challenges of economic regional integration in West Africa. The issues of monetary coordination, foreign exchange volatility, taxation, savings and macroeconomic convergence are investigated from a regional perspective. The characteristics of West Africa's trade policy are reviewed and assessed in comparison to that of the Southern African Development Community (SADC). The extent to which regional integration can tackle

the challenge of unemployment is the focus of studies on labour markets. Development of the private sector and coordination of regional cross-border transportation are examined through the lens of economic collaboration between Arab and African countries. The book provides fresh new answers to persistent development questions and sheds new light on long-held views that are either incomplete or no longer true. It also opens new perspectives on the search for sustainable avenues for Africa's development. In this regard, it may contribute to the emergence of a new paradigm on Africa's development process and its science-based, policy-oriented

implementation.

This book examines the paradoxes, challenges, potential and problems of urban living. It understands cities as they are, rather than as they may be marketed or branded. All cities have much in common, yet the differences are important. They form the basis of both imaginative

policy development and productive experiences of urban life. The phrase 'city imaging' is often used in public discourse, but rarely defined. It refers to the ways that particular cities are branded and marketed. It is based on the assumption that urban representations can be transformed to develop tourism and attract businesses and in-demand workers to one city in preference to another.

However, such a strategy is imprecise. History, subjectivity, bias and prejudice are difficult to temper to the needs of either economic development or social justice. The taste, smell, sounds and architecture of a place all combine to construct the image of a city. For researchers, policy makers, activists and citizens, the challenge is to use or transform this image. The objective of this book is to help the reader define, understand and apply this process. After a war on

---

terror, a credit crunch and a recession, cities still do matter. Even as the de-territorialization of the worldwide web enables the free flow of money, music and ideas across national borders, cities remain important. *City Imaging: Regeneration, Renewal, Decay* surveys the iconography of urbanity and explores what happens when branding is emphasized over living.

recovers from the coronavirus pandemic, jobs growth is bouncing back in most sectors, in spite of disruptions from lockdowns and many workers being based at home. Meanwhile, the recent modest rise in the JobSeeker payment has been broadly criticised as insufficient to help recipients find work and keep up with the costs of living, entrenching financial stress and mental distress, and affecting motivation and skills. Of additional concern is the rate of underemployment, which has overtaken the jobless rate. Most new jobs being created are in part-time, casual or insecure gig work, affecting a higher proportion of young people. Is job insecurity now the norm for many Australians?

This title explains the fundamentals around the measurement and types of unemployment and reveals who it most affects. It also examines the latest employment trends and impacts of casualisation on job security. Government policies and social sector strategies for tackling the economic and social consequences of unemployment and underemployment are also featured. Finding a job, and indeed enough employment, can be hard work in itself.

An interdisciplinary and quantitative account of human claims on the biosphere's stores of

living matter, from prehistoric hunting to modern energy production. The biosphere—the Earth's thin layer of life—dates from nearly four billion years ago, when the first simple organisms appeared. Many species have exerted enormous influence on the biosphere's character and productivity, but none has transformed the Earth in so many ways and on such a scale as *Homo sapiens*. In *Harvesting the Biosphere*, Vaclav Smil offers an interdisciplinary and quantitative account of human claims on the biosphere's stores of living matter, from prehistory to the present day. Smil examines all harvests—from prehistoric man's hunting of megafauna to modern crop production—and all uses of harvested biomass, including energy, food, and raw materials. Without harvesting of the biomass, Smil points out, there would be no story of human evolution and advancing civilization; but at the same time, the increasing extent and intensity of present-day biomass harvests are changing the very foundations of civilization's well-being. In his detailed and comprehensive account, Smil presents the best possible quantifications of past and current global losses in order to assess the evolution and extent of biomass harvests. Drawing on the latest work in disciplines ranging from anthropology to environmental science,

Smil offers a valuable long-term, planet-wide perspective on human-caused environmental change.

This new edition of *The Economics of Tourism* reflects the tremendous changes that have occurred in the tourism sector in the last twelve years. It recognizes that the nature of tourism demand and supply is being transformed by innovations in information communication technologies, market liberalization and climate change. Paralleling this, there is much greater interest in the study of tourism by both students and researchers in mainstream economics. The text is now in four parts covering: demand; supply; national, regional and international matters and environmental issues. The concluding chapter appraises the state of the

economic research into tourism. The increased interest in tourism has engendered the development of new methods of analysis and the refinement of established ones. Accordingly, the book has been extensively restructured, revised and expanded with two new chapters: chapter six of the first edition is now broken down into two and a new chapter has been added on environmental issues to take account of new developments, critically review the associated literature and consider future trends in tourism economics research. The reader-friendliness of the book has also been enhanced in various ways, such as the extensive chapter cross-referencing to refresh the reader's memory and the inclusion of a detailed list of abbreviations. The *Economics of Tourism* will continue to make accessible

for the non-specialist, the application and relevance of economics to tourism. Extensively revised and updated, including research and case studies the textbook will be an indispensable resource for both students and researchers.

Weiner introduces -- and offers his own motivation for producing - - this most impressive work with the following: There are two distinct approaches to the study of motivation. One stratagem is a product of academic, experimental procedures, while the second is an outgrowth of clinical, non-experimental methods. Each of the approaches has unique advantages and disadvantages. But all investigators in this field are guided by a single basic question, namely, "Why do organisms think and behave as they do?" To help answer that basic question, Human Motivation presents an entire range of motivation

By teaching traders that there are no rules, just guidelines, he has allowed basic common sense to once again rule how real traders should approach the market. This is a must-read for any trader that wants to learn his own path to success."  
—Noble DraKohn, founder, SpeculatorAcademy.com, and author of Trade Like a Pro and Winning the Trading Game "A great trader once told me that success was a function of focused energy. This mantra is proven by Al

Brooks, who left a thriving ophthalmology practice to become a day trader. Al's intense focus on daily price action has made him a successful trader. A born educator, Al also is generous with his time, providing detailed explanations on how he views daily price action and how other traders can implement his ideas with similar focus and dedication. Al's book is no quick read, but an in-depth road map on how he trades today's volatile markets, complete with detailed strategies, real-life examples, and hard-knocks advice." —Ginger Szala, Publisher and Editorial Director, Futures magazine Over the course of his

career, author Al Brooks, a technical analysis contributor to Futures magazine and an independent trader for twenty-five years, has found a way to capture consistent profits regardless of market direction or economic climate. And now, with his new three-book series—which focuses on how to use price action to trade the markets—Brooks takes you step by step through the entire process. In order to put his methodology in perspective, Brooks examined an essential array of price action basics and trends in the first book of this series, *Trading Price Action TRENDS*. Now, in this second book, *Trading*

*Price Action TRADING RANGES*, he provides important insights on trading ranges, breakouts, order management, and the mathematics of trading. Page by page, Brooks skillfully addresses how to spot and profit from trading ranges—which most markets are in, most of the time—using the technical analysis of price action. Along the way, he touches on some of the most important aspects of this approach, including trading breakouts, understanding support and resistance, and making the most informed entry and exit decisions possible. Throughout the book, Brooks focuses

---

primarily on 5 minute candle charts—all of which are created with TradeStation—to illustrate basic principles, but also discusses daily and weekly charts. And since he trades more than just E-mini S&P 500 futures, Brooks also details how price action can be used as the basis for trading stocks, forex, Treasury Note futures, and options.

There is great consistency throughout these articles, research projects, management schemes, and standards, in and out of librarianship. Does the repetition suggest that the lessons have not yet been learned? Rather, it

may be that there is no new silver bullet or shortcut for academic libraries. Experience reveals that one may have the formal process without getting good results and vice versa; the determining factor is whether the library staff, managers, and stakeholders define certain fundamental assumptions about the nature of the enterprise.

All the above have in common the following underlying components: The careful definition of goals or of some kind of criteria against which success can be assessed A focus on meeting the needs of the users, as defined by the library and the institution Leadership: a commitment from the top, conscious efforts at ensuring communication,

the provision of training and resources for the process of evaluation, the active support of a process to promote shared values The involvement of all levels of staff in goal setting, evaluation, and the improvement of processes and services Integrating a process of evaluation that is continuous and adaptive, whether that process is based on the framework of TQM, strategic planning, or another model

Best-selling author Andrew Wommack shares his personal story of when he was young and strapped financially. God taught him how to have abundance in the

area of finances. Andrew discusses the influence of money in our lives and how it is very real. He teaches that Jesus taught more about managing resources than He did on prayer or even faith. He exposes the manipulation that sometimes goes on with Christian ministers and how you can be immune from it. Andrew Wommack's message is clear that even though there are abuses in the body of Christ regarding money, that you can still benefit from the truths in God's Word about finances. He believes that by fixing your heart that you deal with the root cause of financial situations and then money will take care of itself. Once your heart is right, using wisdom in how you spend your money comes naturally.
