The Ship Owner's Manual, and Sea-faring Man's Assistant: Or an Epitome of the Laws and Regulations, Relative to the Ship Owner and Merchant BoD – Books on Demand

This book has been written to provide research workers with an introduction to several optical techniques for new applications. It is intended to be comprehensible to people from a wide range of backgrounds - no prior optical or physics knowledge has been assumed. However, sufficient technical details have been included to

enable the reader to understand the basics of the techniques and to be able to read further from the references if necessary. The book should be as useful to postgraduate students and experienced researchers as those entering the bioengineering field, irrespective of whether they have a technical or clinical background. It has been prepared with an awareness of the inherent difficulties in understanding aspects of optics which, in the past, have precluded practical application. The contents address a broad range of optical

measurement techniques which have been used in biomechanics, techniques characterized as non-contacting and non-destructive. Theoretical outlines and practical advice on gaining entry to the fields of expertise are complemented by biomechanical case studies and key literature references. The aim is to present each technique, to appraise its advantages and capabilities and thereby to allow informed selection of an appropriate method for a particular application. It is anticipated that research workers will be assisted in

est- lishing new methodologies and gain first-hand experience of the techniques.

As in previous editions, the focus in INTERMEDIATE ALGEBRA remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and

then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows

students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Ninth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for

both students and instructors to follow. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>.
