Leifer's Introduction to Maternity and Pediatric Nursing in Canada

Cram101

Build the knowledge and clinical judgment you need to succeed in maternity and pediatric nursing!

Written in a clear, easy-to-read style, Introduction to Maternity and Pediatric Nursing, 9th Edition describes how you can provide effective, evidence-based care for women during pregnancy, labor, and delivery, and for newborns and growing children. The text spans the continuum of child development, organizing topics from simple to complex and from health to illness; this approach makes it easy to locate information. Another hallmark of the book is its strong focus on family-centered care, health promotion, and illness prevention. Written by noted nursing educator Gloria Leifer, this bestselling text includes new Next-Generation NCLEX® exam-style case studies plus updates on infection control, pandemic responses, and more. Unfolding case studies follow one family through the conception and birth process, and include open-ended critical thinking questions applying the content to practice. More than 25 nursing care plans include nursing diagnoses plus goals, nursing interventions, and rationales, along with critical thinking questions to promote clinical decision-making skills. Detailed nursing skills cover a wide range of maternal and pediatric nursing interventions. Safety alerts highlight the importance of protecting patients and others from accidents, medication errors, and the spread of disease. Nursing tips include practical, evidence-based information applicable in the clinical setting. Nursing guidelines reflect the World Health Organization's Baby Friendly Hospital Initiative, alternative therapies, immunization mandates, emergency preparedness, preventing medication errors, and more. Get Ready for the NCLEX® Examination! at the end of each chapter includes a summary of key points, additional online resources, review questions, and critical thinking questions. Cultural Considerations boxes help you address the needs of culturally diverse patients and families. Patient Teaching boxes help you communicate instructions for self-care with patients and families. Medication tables provide quick access to information about commonly used medications. NEW! Next-Generation NCLEX® examination-style case studies include new-format questions to help you prepare for the licensure examination. NEW! Discussion of the NCSBN Clinical Judgment Measurement Model helps you learn decision making and develop the skills needed to plan
support for nursing students and new nurses preparing for certification and the everyday challenges of the maternal-neonatal unit.

One of the most complete nursing education learning systems available, Virtual Clinical Excursions 4.0 (VCE) is an interactive print and online workbook that guides you through a virtual hospital where the patients are real and their conditions are constantly changing. Each lesson features a core reading assignment from Introduction to Maternity and Pediatric Nursing, 8th Edition along with activities based on "visiting" the patients in the hospital. By immersing you in a realistic, yet safe, nursing environment, VCE simulates the average clinical rotation by allowing you to conduct a complete assessment of a patient and set priorities for care, collect information, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. This unique virtual setting is the best way to learn about the complexities of patient care by giving you the perfect environment to practice what you've learned.

Duration for access to this product, which may be at the discretion of your institution, is up to 36 months. Elsevier reserves the right to restrict or remove access due to changes in product portfolio or other market conditions. Updated drug reference includes a comprehensive set of the latest drug monographs to help you make the best clinical judgments to complete each case.

Online workbook lessons guide you throughout the patient scenarios to collect information, make decisions, and set priorities. Vital signs tool within each patient's room allows you to check the patient's status at critical moments, and promotes safe practice. Nurse-client interaction videos depict conversations and situations involving nurses, patients, family members, and hospital staff to help you discern between communications that are ideal and those that need improvement. Unique records that house data from the virtual patient's hospital stay allows you to record new findings to see how the data for different attributes has changed over time. Laboratory guide provides standard value ranges for all laboratory values offered within the virtual patient hospital, so you can confirm and compare standard lab values against your patients' test results. Physical examination experience with unique images and assessment findings advance your understanding of each patient's system assessments. Patient medication administration enhances your ability to think critically about safe medication practices and follow safe medication standards. Allows for easy and quick access to various patient charts, including Physician's Orders, Laboratory Reports, Patient Education, Nursing Admission, and many more. Kardex nursing information regarding patients' acute care provides quick access to vital information such as physician's orders, laboratory reports, patient education, nursing admission, and more, offering a richly detailed portrait of the patient. NEW! Updated content from
Introduction to Maternity and Pediatric Nursing, 8th Edition addressed through patient care activities in the VCE workbook, providing you with active learning of the latest evidence-based care. Studyguide for Introduction to Maternity and Pediatric Nursing by Leifer, Gloria Saunders

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

"This third edition of Introductory Maternity and Pediatric Nursing reflects the underlying philosophy of love, caring, and support for the childbearing woman, the child, and the families of these individuals. The content has been developed according to the most current information available. In this text, we recognize that cultural sensitivity and awareness are important aspects of caring for the childbearing and child-rearing families. We also recognize that many children and pregnant women live in families other than traditional two-parent family homes and therefore refer to teaching and supporting the childbearing clients and family caregivers of children in all situations and family structures"--Provided by publisher.
