"This third edition of Introductory Maternity and Pediatric Nursing reflects the underlying philosophy of love, caring, and support for the childbearing woman, the child, and the families of these individuals. The content has been developed according to the most current information available. In this text, we recognize that cultural sensitivity and awareness are important aspects of caring for the childbearing and

child-rearing families. We also recognize that many children and pregnant women live in families other than traditional two-parent family homes and therefore refer to teaching and supporting the childbearing clients and family caregivers of children in all situations and family structures"--Provided by publisher.

One of the most complete nursing education learning systems available, Virtual Clinical Excursions 4.0 (VCE) is an interactive print and online workbook that guides you through a virtual hospital where the patients are real and their conditions are constantly changing. Each lesson features a core reading assignment from Introduction to Maternity and Pediatric Nursing, 8th Edition along with activities based on "visiting" the patients in the hospital. By immersing you in a realistic, yet safe, nursing environment, VCE simulates the average clinical rotation by allowing you to conduct a complete assessment of a patient and set priorities for care, collect information, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. This unique virtual setting is the best way to learn about the complexities of patient care by giving you the perfect environment to practice what you've learned. Duration for access to this product, which may be at the discretion of your institution, is up to 36 months. Elsevier reserves the right to restrict or remove access due to changes in product portfolio or other market conditions. Updated drug reference includes a comprehensive set of the latest drug monographs to help you make the best clinical judgments to complete each case. Online workbook lessons guide you throughout the patient scenarios to collect information, make decisions, and set priorities. Vital signs tool within each patient's room allows you to check the patient's status at critical moments, and promotes safe practice. Nurse-client interaction videos depict conversations and situations involving nurses, patients, family members, and hospital

staff to help you discern between communications that are ideal and those that need improvement. Unique records that house data from the virtual patient's hospital stay allows you to record new findings to see how the data for different attributes has changed over time. Laboratory guide provides standard value ranges for all laboratory values offered within the virtual patient hospital, so you can confirm and compare standard lab values against your patients' test results. Physical examination experience with unique images and assessment findings advance your understanding of each patient's system assessments. Patient medication administration enhances your ability to think critically about safe medication practices and follow safe medication standards. Allows for easy and quick access to various patient charts, including Physician's Orders,

Laboratory Reports, Patient Education, Nursing Admission, and many more. Kardex nursing information regarding patients' acute care provides quick access to vital information such as physician's orders, laboratory reports, patient education, nursing admission, and more, offering a richly detailed portrait of the patient. NEW! Updated content from Introduction to Maternity and Pediatric Nursing, 8th Edition addressed through patient care activities in the VCE workbook, providing you with active learning of the latest evidence-based care.
