This book provides the ICP with a review of the principles and practices in disinfection, sterilization and antisepsis and highlights recent advances in practice and technology to aid in preventing nosocomial infections. The text summarizes the Hand Hygiene Guideline published by CDC in October 2002, the Disinfection and Sterilization Guideline scheduled to be published by CDC in 2004, and the multi-society guideline for endoscope reprocessing. It also provides cutting edge information on a diverse range of topics including: current

regulatory activities that affect disinfectants, antiseptics and sterilization; links between germicide use and antibiotic resistance; activity of germicides against bioterrorism agents; special problems in antiseptics; new technologies and products; sterilization of tissue (bones, tendons); reprocessing endoscopes; surface disinfection; contribution of the environment to disease transmission; factors influencing the efficacy of germicides; and the tests used to measure the germicidal activity of disinfectants and antiseptics. The Panel Sessions document the participants' questions and the speakers' responses. Authors: Practicing experts in the field of infection control wrote all the chapters.

The AAMI recommended practice, Comprehensive guide to steam sterilization and sterility assurance in health care facilities, is a breakthrough standard in terms of its scope. AAMI has updated ST79 with the release of ST79:2010/A4:2013. Of particular importance, A4:2013 provides four new figures demonstrating the wrapping of items for steam sterilization and adds an annex focused on Moisture assessment. As of Oct. 25, 2013, purchasers of ST79 will receive ANSI/AAMI

ST79:2010 and A1:2010 and A2:2011 and A3:2012 and A4:2014 as a single consolidated document. Among other changes from the 2006 edition of ST79, this revised and expanded second edition of ST79 includes guidance on the use and application of Class 6 emulating indicators, a chemical monitoring device fairly new to the United States. Because ST79 essentially consolidates five AAMI steam sterilization standards (whose content was reviewed and updated to reflect current good practice prior to being incorporated into ST79), it truly is a comprehensive

guideline for all steam sterilization activities in healthcare facilities, regardless of the size of the sterilizer or the size of the facility, and provides a resource for all healthcare personnel who use steam for sterilization.

The Blind Men and the
Elephant is a story of a
group of blind men who touch

an elephant to learn what it is like. Each concludes that the elephant is like a wall, snake, spear, tree, fan or rope, depending on where they had touched. Their heated debate is never resolved. Retelling this Eastern parable, an American poet, John Godfrey Saxe, introduced the story to a Western audience in 1872. The poem is the poet's best remembered work.
