HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our

audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

IAHCSMM is pleased to introduce the Instrument Resource Manual. This text was written for CS Instrument technicians, by CS Instrument technicians. That focus makes it a unique resource for every CS department. Emphasis has been placed on good work practices for instrument care and handling; including instrument inspection points, testing processes and other information that will enhance instrument skills. The Instrument Resource Manual provides a realistic look at surgical instrument inspection. Photos for the text were gathered from several sources and show instruments at varying stages in their life cycle. Some are new, and others are nearing, or at, the end of use. In other words, the photos in this text provide a snapshot of the devices instrument technicians encounter daily. Each healthcare facility is unique and instrument tray content is driven by surgeon and OR staff input. For that reason, tray content varies. It is impossible to include every surgical instrument in use in a single text. This text has attempted to include commonly used instruments. The

Instrument Resource Manual is designed to be user-friendly and an invaluable resource to Instrument technicians in any facility. Some features include:

- Learning objectives that introduce each chapter and outline learning expectations in the chapter.
- Use of green text boxes to define key terms throughout the text.
- Use of red arrow indicators to identify key inspection points on instruments.
- A glossary that not only defines all the terms introduced in the manual, but also many other terms important in today's dynamic CS environment.
