ANSI/AAMI St79:
Comprehensive Guide to
Steam Sterilization and
Sterility Assurance in Health
Care Facilities Butterworth-
Heinemann Medical
The AAMI recommended
practice, Comprehensive guide
to steam sterilization and
sterility assurance in health
care facilities, is a
breakthrough standard in
terms of its scope. AAMI has
updated ST79 with the release
of ST79:2010/A4:2013. Of
particular importance,
A4:2013 provides four new
figures demonstrating the
wrapping of items for steam
sterilization and adds an annex
focused on Moisture
assessment. As of Oct. 25,
2013, purchasers of ST79 will
receive ANSI/AAMI
ST79:2010 and A1:2010 and
A2:2011 and A3:2012 and
A4:2014 as a single
consolidated document.
Among other changes from the
2006 edition of ST79, this
revised and expanded second
edition of ST79 includes
guidance on the use and
application of Class 6
emulating indicators, a
chemical monitoring device
fairly new to the United States.
Because ST79 essentially
consolidates five AAMI steam
sterilization standards (whose
content was reviewed and
updated to reflect current good
practice prior to being
incorporated into ST79), it

truly is a comprehensive
guideline for all steam
sterilization activities in
healthcare facilities, regardless
of the size of the sterilizer or the
size of the facility, and provides
a resource for all healthcare
personnel who use steam for
sterilization.
