The ISEP meets the industry's need for a resource that contains the complete solar energy-related provisions from the 2018 International Codes

and NFPA 70: 2017 NEC National Electrical Code, and selected standards in one document. The ISEP is organized such that it provides the best and most comprehensive tool for the design, installation and administration of both solar thermal (or solar heating and cooling) and photovoltaic systems. Similar to the organization of the International Energy Conservation Code (IECC), the Solar Commercial and Residential provisions have been presented in separate parts, to make it user friendly and easy to apply. Three important solar referenced standards have been included in their entirety: Solar Rating & Certification Corporation (SRCC) Standard 100 (Minimum Standards for Solar Thermal Collectors); SRCC Standard 300 (Minimum Standards for Solar Water Heating Systems); and SRCC

Standard 600 (Minimum Standards for Solar Thermal Concentrating Collectors). Additional resources, such as sample solar permitting forms and links to the U.S.

Department of Energy solar site access, have also been included, making this 2018 ISEP the single, most comprehensive document for solar energy code provisions and standards in the nation.

Recommended Practices for Remote Virtual Inspections (RVI) Jove

This code is founded upon certain basic principles of environmental sanitation and safety through properly designed, acceptably installed, and adequately maintained plumbing systems. Some of the details of plumbing

construction may vary, but the basic sanitary and safety principles desirable and necessary to protect the health of the people are the same everywhere. As interpretations may be required, and as unforeseen situations arise that are not specifically covered in this code, the 23 principles in items A to W shall be used to define the intent.

This is a book about Courage and Patriotism. It tells the dramatic stories of a number of American politicians of various political and regional allegiances whose one overriding loyalty was to the United States and to the right as God gave them to see it. They range from born aristocrats to self-made men. Some are well-known, some almost forgotten. But all of them, in the face of dreadful consequences, exhibited a special kind of greatness. These stories about them remind us sharply that there is, in addition to a courage with which men die, a courage by which men must

live. —Print Ed.

Developed by ICC and American
Wood Council, this first edition
provides an overview of
requirements for mass timber
construction as found in the 2021
International Building Code®
(IBC®). The document reviews
the 2015 IBC's recognition of
cross-laminated timber (CLT),
the reorganization of heavy
timber provisions in the 2018
IBC, followed by the historic
changes in the 2021 IBC and
International Fire Code® (IFC®)
for tall mass timber construction.
The 2021 IBC and IFC include
important changes in material
technologies and their expanded
use as proposed by the ICC Ad
Hoc Committee on Tall Wood
Buildings. Three new types of
construction (Types IV-A, IV-B
and IV-C) defined and included
in the 2021 codes allow the use
of mass timber for buildings of
taller heights, more stories above
grade, and greater allowable

areas compared to existing
provisions for heavy timber
buildings.

DISCIPLE IV UNDER

THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH

BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for **DISCIPLE IV: UNDER THE TREE OF LIFE.** The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video

segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

The 2019 Edition of the California Plumbing Code© (CPC) contains plumbing design and construction standards. Provisions contained in the CPC provide minimum standards to safeguard life or limb, health, property and public welfare. It also protects against hazards that may arise from the use of plumbing piping and systems by regulating and controlling the design, construction, installation, quality of materials, location and operation of plumbing piping systems within the State of California.

Recommended Practices for Remote Virtual Inspections (RVI) is the most complete source of information on remote inspections. RVI is an alternative to on-site inspections using a video call on a 4G or WiFi telephony (smartphone, tablet, etc.) in order to interact with the inspector. It is a comprehensive tool for local jurisdictions and the building industry alike that desire to implement a remote inspection program. This publication covers the RVI process, inspection scheduling, preparation, what the owner/contractor should expect, training and communications, and recording and maintaining records. While all types of inspections may not be suitable for RVI, a list of potential construction activities suitable for remote inspections is provided. RVI also lends itself to connect seamlessly as part of an overall

online program that will allow jurisdictions to provide complete services to the public utilizing the latest technology. Online permitting and electronic plan review together with remote virtual inspections can provide a complete program that keeps the construction industry moving while providing a healthy environment for all participants.
