Bank Regulation BPP Learning Media

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

ACCA Paper P7 - Advanced Audit and Assurance (INT) Practice and revision kit John Wiley & Sons

The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of providing world-class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA. BPP Learning Media is an ACCA Official Publisher. P2 is a very challenging paper which builds on the knowledge and skills acquired at earlier levels in the preparation and analysis of financial reports for single entities and groups. It takes these areas to a higher level, putting into context the role of the accountant as a professional steward and adviser, who is responsible to the stakeholders of an organisation. It has five main sections: 1. Regulatory and ethical framework and current issues 2. Reporting the financial performance of entities 3. Group financial statements 4. Specialised entities 5. Analysis of the financial performance of entities

The main new topics introduced at this level relate to group accounts, but other topics are tested with a different emphasis and in more depth than at the Fundamentals Level. We provide material

for both International and UK streams. International is now the ACCA main stream. The study text has been reviewed by the examiner and takes account of his advice on approaching the paper. Ethics, which have an impact on all aspects of financial reporting, are introduced at an early stage in the text, as is corporate social responsibility, so that students do not neglect these topics when covering the numerical areas. Accounting standards come next, combining revision with extension into more advanced areas. After a brief revision of basic groups, the more advanced consolidation topics are covered. Current issues are covered throughout the text within the appropriate topics, and also summarised in a final chapter. The question bank contains practice at the case study-style question you will encounter in the real exam. BPP Learning Media is the publisher of choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams.

ACCA Paper P7 - Advanced Audit and Assurance (GBR) Practice and revision kit OUP Oxford

About one-quarter of the world's central banks apply IFRS with approximately a quarter more looking to IFRS for further guidance where their local standards do not provide enough guidance. Given the varied mandates and types of policy operations undertaken by central banks, there also exists significant variation in practice, style, and the extent of the financial disclosures in both the primary statements and in the note disclosures. By their nature, central banks are unique in their jurisdiction and so do not always have local practices and examples they can follow. Although the major accounting firms have created model disclosures intended for commercial banks, these are often not totally appropriate for a central bank. The application of IFRS across central

banks differs based on the mandate of the central bank and the capacity of the accounting profession in the specific jurisdiction. An analysis of international practices, such as those undertaken in preparing these model statements, may help address questions about the structure of the statements themselves as well as the organization of the note disclosures. As a consequence, each central bank following IFRS has largely developed its own disclosures with only limited reference to others. Input from the external auditors has been significant, but some of this has been determined by the approach used by the specific auditor's style for commercial banks rather than central banks. Auditors do not always fully appreciate the differences between a commercial bank and a central bank, which has a different role and undertakes transactions to meet its policy objectives. This has often led to an over emphasis of items not material in the context of a central bank and insufficient disclosures on operations or accountabilities specific to the functions of the central bank.

International Accounting Standards IAS 36, Impairment of Assets, and IAS 38, Intangible Assets BPP Learning Media

Auditing has hit the headlines over recent years, and for all the wrong reasons, and in today's environment, the result of negligent auditing can be serious resulting in sizeable fines and even withdrawal of audit registration which can be costly in terms of fee income. Frequently Asked Questions in International Standards on Auditing presents the relevant standards in a concise and jargon-free way, enabling auditors to appreciate the reasoning behind the standards and undertake audit work effectively. This book focuses on the main areas of the auditing standards and also addresses some key areas where audit firms are failing and which have been flagged up by audit regulators. The FAQs cover the main parts of each standard, and each question will be answered in a practical context, with worked examples showing how the standards are applied in real situations.

WILEY IAS 2004 BPP Learning Media

Bank Regulation: Effects on Strategy, Financial Accounting and Management Control discusses and problematizes how regulation is affecting bank strategies as well as their financial accounting and management control systems. Following a period of bank de-regulation, the new millennium brought a drastic change, with many new regulations. Some of these are the result of the financial crisis of 2008-2009. Other regulations, such as the introduction in 2005 of International Financial Reporting Standards (IFRS) for quoted companies in the EU, can be related to the introduction of a new global accounting regime. It is evident from annual reports of banks that the number of new regulations in recent years is high and that they cover many different functional areas. The objectives of these regulations are also ambitious; to improve governance and control, contributing to a high level of financial stability for banks. These objectives are obviously of great concern for an industry that directly and indirectly affects the financial situation not only of individuals and organizations but also nation states. Considering the importance of banks in society, it is of little surprise that the attention of both scholars and practitioners has been directed towards how banks comply with new regulations and if the intended objectives of the regulations are met. This book will be of great value to all those interested in financial stability matters

(practitioners, policy-makers, students, academics), as well as to accounting and finance scholars.
