A provocative reassessment of the relationship between states and

environmental politics in Africa From climate related risks such as crop failure and famine to longer-term concerns about sustainable urbanization, environmental justice, and biodiversity conservation, African states face a range of environmental issues. As Carl Death demonstrates, the ways in which they are addressing them have important political ramifications, and challenge current understandings of green politics. Death draws on almost a decade of research to reveal how central African environmental politics are to the transformation of African states.

The Association of Chartered Certified
Accountants (ACCA) is the global body
for professional accountants. With over
100 years of providing world-class
accounting and finance qualifications,
the ACCA has significantly raised its
international profile in recent years and

now supports a BSc (Hons) in Applied
Accounting and an MBA. BPP Learning
Media is an ACCA Official Publisher. P2
is a very challenging paper which builds
on the knowledge and skills acquired at
earlier levels in the preparation and
analysis of financial reports for single
entities and groups. It takes these areas
to a higher level, putting into context the
role of the accountant as a professional
steward and adviser, who is responsible
to the stakeholders of an organisation. It
has five main sections: 1. Regulatory
and ethical framework and current
issues 2. Reporting the financial
performance of entities 3. Group
financial statements 4. Specialised
entities 5. Analysis of the financial

performance of entities. The main new topics introduced at this level relate to group accounts, but other topics are tested with a different emphasis and in more depth than at the Fundamentals Level. We provide material for both International and UK streams. International is now the ACCA main stream. Question practice is essential for all papers, but for P2, there is a strong 'fear factor'. Questions look intimidating, and it is only once you get into the detail that you realise that there are easy marks and more complicated parts that are not essential to get a pass. Our practice and revision kit follows the order of the text and there are a large number of questions on all

syllabus topics. Our kit gives ample opportunity to practice the long, 50 mark case studies, which will be the compulsory Section A question in the exam. Three mock exams, including the Pilot Paper, also reflect this format. As a gentle introduction to many of the topics, there are preparation questions giving instructions in basic techniques. Most questions have marking schemes, so that you can see that the examiner awards marks for these techniques. For P2 international, a revised edition of the kit is being produced for December 2008 to reflect the changes to IFRS 3 Business combinations. This will be available at the end of September. BPP Learning Media is the publisher of

choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams.

This is a kaleidoscopic account of the remarkable life story of Alladi Ramakrishnan (1923-2008), an internationally reputed physicist, and the son of Sir Alladi Krishnaswami Iyer (1883-1953), one of India's most eminent jurists. Part I of the autobiography gives a fascinating account his early life in Madras, India during the last decades of British colonial rule, and the leading role played by Sir Alladi in drafting the Constitution of India. Then follows the incredible saga of his creation of MATSCIENCE, The Institute of Mathematical Sciences, in Madras, inspired by his visit to the Institute for Advanced Study in Princeton, and the result of a Theoretical Physics Seminar which he organized in his family home

Ekamra Nivas in Madras, which received the endorsement of Nobel Laureate Niels Bohr, and the support of India's Prime Minister Jawaharlal Nehru. Part II covers the period of Ramakrishnan's term as Director of MATSCIENCE, and his visits to about 200 centres of learning the world over, where he interacted with leading scientists and lectured on his research in the fields of Probability, Stochastic Processes, Elementary Particle Physics, Matrix Theory, and on his novel treatment of Einstein's Special Relativity. Historical photos, letters, and documents of special interest are included.
