Tourism as a global industry is essentially a post Second-World War phenomenon. Though a number of research papers and articles have been written on different aspects of tourism, there has been a need for an authentic, comprehensive reference book on tourism. Tourism is an ever-expanding service oriented industry with high growth potential for national as well as for international community. Today, tourism has become a global as well as national level exhibition and description of places, prosperity, higher standards of living and the fast-growing concept of paid holidays. The process of tourism incorporates man, space and time as its principal

components. As such, it has far reaching significance and implications of a socio-economic nature alongside the environment ones. The tourism has emerged as a most instrumental phenomenon in the economic and social development of any society. The main objective of the present book of *Tourism* is to organize and put together the different aspects of this complex matrix of the multiple interrelated dimensions of the tourism.

Sustainable development is a highly topical issue and is of critical importance to tourism as the environment is of utmost importance for the continued development and prosperity of the industry. There have been numerous texts written on sustainable tourism and the measures to mitigate and manage this but none which acknowledges Information and Communication Technologies (ICT) as a mechanism of doing so despite being an emerging area of research. ICT in this context refers to innovative tools which form an integrated system of software and networked equipment that facilitates data processing information sharing communication and the ability to search and select from an existing range of products and services for an organisation's benefits. Despite the symbiotic relationship, which exists between ICT and sustainable tourism, there has been little research, which has considered how the use of such technology can be used to make sustainable tourism development a more workable reality. This opportune book is the first to provide a focus on the interrelationship of these two important topics demonstrating their synergies and providing insight into a new and innovative approach to managing sustainable tourism development. It considers the use of technology to reduce the negative impacts of tourism from both the demand and supply side perspectives. A critical review of a range of cutting edge technologies used by tourists and businesses to assess their usefulness in managing sustainable tourism development from the macro to the micro level is also discussed. It further integrates examples and practical applications to show how ICT can be an invaluable mechanism in the management of sustainable tourism development. This cutting-edge volume provides a wealth of information on an important yet neglected subject. This book will be invaluable reading for students, researchers, academics and members of the tourism industry looking for new and innovate ways of fostering a more sustainable tourism industry.

As one of the world's largest industries, tourism carries with it significant social, environmental, economic and political impacts. Although tourism can provide significant economic benefits for some destinations, the image of tourism as a benign and environmentally friendly industry has often been challenged. There is a clear and growing body of evidence that suggests that the effects of tourism development are far more complex than policy-makers usually suggest and that the impacts of tourism occur not just at the destination but at all stages of a tourist's trip. Furthermore, tourism does not exist in a vacuum. Broader social and environmental changes also shape the form, growth and experience of tourism development. This text provides a clear, accessible and up-to-date synthesis of tourism's role in our contemporary world, both as an agent of change, and as a response to it. Tourism-related change is approached from a framework that illustrates the changing environments in which they occur, including the spatial scale of such impacts and the effects of these impacts over time. This framework is then applied to the economic, socio-cultural and physical dimensions of tourism. After examining the different forms of tourism-related impacts, the book then discusses the role of planning as part of an integrated approach to the mitigation of undesirable impacts and the maximization of the desirable benefits of tourism development. Case studies and illustrations from a variety of locations from around the world are used throughout the book to exemplify key themes and issues; additionally figures and tables serve to elucidate statistical data. Understanding and Managing Tourism Impacts illustrates that when well managed tourism can make a positive contribution to destinations. The books use of issues of scale, time and form to illustrate the effects of tourism provide an accessible and significant reminder that tourism's impacts vary over time and space, affects both the visitor and the host community, and can be unpredictable in its consequences. Chapter objectives, recommended readings, and links to web-based material help students, practitioners and researchers to grasp the broader implications of tourism development in today's world. With tourism increasingly being implicated as a factor in climate and environmental change, and with the benefits and costs of tourism as a form of economic development being examined more closely than ever, this book provides a timely contribution to help clarify the potentials and pitfalls of contemporary tourism.

This book provides a comprehensive introduction to travel marketing, tourism economics and the airline product. At the same time, it provides an overview on the political, socio-economic, environmental and technological impacts of tourism and its related sectors. This publication covers both theory and practice in an engaging style, that will spark the readers' curiosity. Yet, it presents tourism and airline issues in a concise, yet accessible manner. This will allow prospective tourism practitioners to critically analyze future situations, and to make appropriate decisions in their workplace environments. Moreover, the book prepares undergraduate students and aspiring managers alike with a thorough exposure to the latest industry developments. "Dr. Camilleri provides tourism students and practitioners with a clear and comprehensive picture of the main institutions, operations and activities of the travel industry." Philip Kotler, S.C. Johnson & Son Distinguished Professor of International Marketing, Kellogg School of Management, Northwestern University, Evanston/Chicago, IL, USA "This book is the first of its kind to provide an insightful and well-structured application of travel and tourism marketing and economics to the airline industry. Student readers will find this systematic approach invaluable when placing aviation within the wider tourism context, drawing upon the disciplines of economics and marketing." Brian King, Professor of Tourism and Associate Dean, School of Hotel and Tourism Management, The Hong Kong Polytechnic University, Hong Kong "The remarkable growth in international tourism over the last century has been directly influenced by technological, and operational innovations in the airline sector which continue to define the nature, scale and direction of tourist flows and consequential tourism development. Key factors in this relationship between tourism and the airline sector are marketing and economics, both of which are fundamental to the success of tourism in general and airlines in particular, not least given the increasing significance of low-cost airline operations. Hence, uniquely drawing together these three themes, this book provides a valuable introduction to the marketing and economics of tourism with a specific focus on airline operations, and should be considered essential reading for future managers in the tourism sector." Richard Sharpley, Professor of Tourism, School of Management, University of Central Lancashire, UK "The book's unique positioning in terms of the importance of and the relationships between tourism marketing, tourism economics and airline product will create a distinct niche for the book in the travel literature." C. Michael Hall, Professor of Tourism, Department of Management, Marketing and Entrepreneurship, University of Canterbury, Christchurch, New Zealand "A very unique textbook that offers integrated lessons on marketing, economics, and airline services. College students of travel and tourism in many parts of the world will benefit from the author's thoughtful writing style of simplicity and clarity." Liping A. Cai, Professor and Director, Purdue Tourism & Hospitality Research Center, Purdue University, West Lafayette, IN, USA "An interesting volume that provides a good coverage of airline transportation matters not always well considered in tourism books. Traditional strategic and operational issues, as well as the most recent developments and emerging trends are dealt with in a concise yet clear and rational way. Summaries, questions and topics for discussion in each chapter make it a useful basis for both taught courses or self-education." Rodolfo Baggio, Professor of Tourism and Social Dynamics, Bocconi University, Milan, Italy "This is a very useful introductory book that summarises a wealth of knowledge in an accessible format. It explains the relation between marketing and economics, and applies it to the business of airline management as well as the tourism industry overall." Xavier Font, Professor of Sustainability Marketing, School of Hospitality and Tourism Management, University of Surrey, UK and Visiting Professor, Hospitality Academy, NHTV Breda, Netherlands "This book addresses the key principles of tourism marketing, economics and the airline industry. It covers a wide range of theory at the same time as offering real-life case studies, and offers readers a comprehensive understanding of how these important industries work, and the underpinning challenges that will shape their future. It is suitable for undergraduate students as well as travel professionals, and I would highly recommend it." Clare Weeden, Principal Lecturer in Tourism and Marketing at the School of Sport and Service Management, University of Brighton, UK "In the current environment a grasp of the basics of marketing to diverse consumers is very important. Customers are possessed of sophisticated knowledge driven by innovations in business as well from highly developed technological advances. This text will inform and update students and those planning a career in travel and tourism. Mark Camilleri has produced an accessible book, which identifies ways to accumulate and use new knowledge to be at the vanguard of marketing, which is both essential and timely." Peter Wiltshier, Senior Lecturer & Programme Leader for Travel & Tourism, College of Business, Law and Social Sciences, University of Derby, UK "This contemporary text provides an authoritative read on the dynamics, interactions and complexities of the modern travel and tourism industries with a necessary, and much welcomed, mixture of theory and practice suitable for undergraduate, graduate and professional markets." Alan Fyall, Orange County Endowed Professor of Tourism Marketing, University of Central Florida, FL, USA

This book consolidates international, contemporary and topical case study based research in tourism, travel, hospitality and events. Case studies can make learning more attractive and interesting as well as enable students to understand the theory better and develop their analytical and problem-solving skills. Using industry as an open living lab, case study based research infuses scholars into real-world industry challenges and inspires them to theorise and advance our knowledge frontiers. The book includes international case studies that can

help tourism scholars build and advance (new) theories and enrich their educational practices. Case studies are accompanied with a teaching note guiding scholars to integrate case studies into instruction. Dr Kirsten Holmes, Chair, Council for Australasian Tourism and Hospitality Education (CAUTHE) There is a vital need for contemporary and well-structured case studies for use in tourism teaching. By including case studies from Australasia and key destination regions in Asia, Europe, and the Caribbean, the book is helpful for tertiary teachers globally. Professor Xander Lub, President, EuroCHRIE The book inspires educators and students. The cases provide context to students learning and demonstrate the richness and variation of the industry. The book also clearly demonstrates how research can inform our teaching. Professor Brian King, Chair, THE-ICE Assessment Panel The book includes cases under five themes: experiences, operations, technologies, strategy and marketing, and destinations. The book provides subject lecturers with a structure to guide students of applying theory into practice. Dr Paul Whitelaw, Academic Director, Southern Cross University This book marks a significant contribution to hospitality, tourism and events pedagogy at undergraduate and postgraduate level. At a time when the industry is demanding that our graduates have a strong grasp of "real world issues", the case study approach provides an accessible, meaningful and relatable means by which students can engage in real world issues.
