[Managing Tourism Crises](#) Scientific e-Resources

Sustainable development is a highly topical issue and is of critical importance to tourism as the environment is of utmost importance for the continued development and prosperity of the industry. There have been numerous texts written on sustainable tourism and the measures to mitigate and manage this but none which acknowledges Information and Communication Technologies (ICT) as a mechanism of doing so despite being an emerging area of research. ICT in this context refers to innovative tools which form an integrated system of software and networked equipment that facilitates data processing information sharing communication and the ability to search and select from an existing range of products and services for an organisation's benefits. Despite the symbiotic relationship, which exists between ICT and sustainable tourism, there has been little research, which has considered how the use of such technology can be used to make sustainable tourism development a more workable reality. This opportune book is the first to provide a focus on the interrelationship of these two important topics demonstrating their synergies and providing insight into a new and innovative approach to managing sustainable tourism development. It considers the use of technology to reduce the negative impacts of tourism from both the demand and supply side perspectives. A critical review of a range of cutting edge technologies used by tourists and businesses to assess their usefulness in managing sustainable tourism development from the macro to the micro level is also discussed. It further integrates examples and practical applications to show how ICT can be an invaluable mechanism in the management of sustainable tourism development. This cutting-edge volume provides a wealth of information on an important yet neglected subject. This book will be invaluable reading for students, researchers, academics and members of the tourism industry looking for new and innovate ways of fostering a more sustainable tourism industry.

[An Introduction To Travel And Tourism](#) Routledge

As one of the world's largest industries, tourism carries with it significant social, environmental, economic and political impacts. Although tourism can provide significant economic benefits for some destinations, the image of tourism as a benign and environmentally friendly industry has often been challenged. There is a clear and growing body of evidence that suggests that the effects of tourism development are far more complex than policy-makers usually suggest and that the impacts of tourism occur not just at the destination but at all stages of a tourist's trip. Furthermore, tourism does not exist in a vacuum. Broader social and environmental changes also shape the form, growth and experience of tourism development. This text provides a clear, accessible and up-to-date synthesis of tourism's role in our contemporary world, both as an agent of change, and as a response to it. Tourism-related change is approached from a framework that illustrates the changing environments in which they occur, including the spatial scale

of such impacts and the effects of these impacts over time. This framework is then applied to the economic, socio-cultural and physical dimensions of tourism. After examining the different forms of tourism-related impacts, the book then discusses the role of planning as part of an integrated approach to the mitigation of undesirable impacts and the maximization of the desirable benefits of tourism development. Case studies and illustrations from a variety of locations from around the world are used throughout the book to exemplify key themes and issues; additionally figures and tables serve to elucidate statistical data. *Understanding and Managing Tourism Impacts* illustrates that when well managed tourism can make a positive contribution to destinations. The books use of issues of scale, time and form to illustrate the effects of tourism provide an accessible and significant reminder that tourism's impacts vary over time and space, affects both the visitor and the host community, and can be unpredictable in its consequences. Chapter objectives, recommended readings, and links to web-based material help students, practitioners and researchers to grasp the broader implications of tourism development in today's world. With tourism increasingly being implicated as a factor in climate and environmental change, and with the benefits and costs of tourism as a form of economic development being examined more closely than ever, this book provides a timely contribution to help clarify the potentials and pitfalls of contemporary tourism.

Student readers will find this systematic approach invaluable when placing aviation within the wider tourism context, drawing upon the disciplines of economics and marketing." Brian King, Professor of Tourism and Associate Dean, School of Hotel and Tourism Management, The Hong Kong Polytechnic University, Hong Kong "The remarkable growth in international tourism over the last century has been directly influenced by technological, and operational innovations in the airline sector which continue to define the nature, scale and direction of tourist flows and consequential tourism development. Key factors in this relationship between tourism and the airline sector are marketing and economics, both of which are fundamental to the success of tourism in general and airlines in particular, not least given the increasing significance of low-cost airline operations. Hence, uniquely drawing together these three themes, this book provides a valuable introduction to the marketing and economics of tourism with a specific focus on airline operations, and should be considered essential reading for future managers in the tourism sector." Richard Sharpley, Professor of Tourism, School of Management, University of Central Lancashire, UK "The book's unique positioning in terms of the importance of and the relationships between tourism marketing, tourism economics and airline product will create a distinct niche for the book in the travel literature."
