When he became a commercial pilot at age nineteen, Bill Grenier never imagined that one day he'd be captain of the largest commercial plane the world had seen, flying the highest profile routes of a proud national carrier. Even less could he have imagined, at age nineteen and with barely a penny to his name, that he'd one day be a wealthy man. But he would ultimately control an empire worth nearly a billion dollars. With liberal doses of wit and humour, Miles to Millions shows what a little luck, lots of perseverance, and an appetite for adventure can do. From boarding house to boardroom, from cradle to cockpit, Grenier offers a fascinating story of success both as a commercial pilot and as a businessman. Filled with anecdotes you'd never expect from a single career from acting as repo man taking planes for payment to saving hundreds of passengers in a stricken 747 with a collapsed co-pilot Miles to Millions is a high-flier of a story bound to entertain both aviation experts and enthusiasts alike.

This proceedings volume presents recent theoretical and practical advances in operational research (OR). The papers focus on a number of key areas including combinatorial optimization, integer programming, heuristics, and mathematical programming. In addition, this volume highlights OR applications in different areas such as financial decision making, marketing, e-business, project management, scheduling, traffic and transportation. The chapters are based on papers presented at the 13th Balkan Conference on Operations Research (BALCOR). BALCOR is an established biennial conference. The selected papers promote international collaboration among researchers and practitioners, with a particular focus on the Balkan countries.

Redefining Airmanship offers the first concrete model of the abstract ideal of "airmanship," and gives the reader step-by-step guidance for self-appraisal and improvement in the areas of flight proficiency, teamwork, and good judgment in crisis situations. The author, Major Tony Kern, draws on his extensive flight and crew-training experience in the U.S. Air Force, but his model is invaluable for all pilots, whether military, recreational, or commercial. "Kern's work is a breakthrough, and a benchmark." --John J. Nance, author of Blind Trust

The purpose of this book is to introduce the student, by the most direct path, to the language of the Pali Canon. Existing primers and readers from the study of Pali teach the later language of the Commentaries and other medieval writings, and indeed of the present day-for this very copious and flexible language is still in use. Our grammatical analysis is based on the admirable science of the medieval monks. Their terminology is

given, to aid reference, but may of course be ignored by the beginner. The intention here is to cover Pali grammar intention here is to cover Pali grammar and syntax in a comprehensive manner.

World Bank Discussion Paper No. 337. Draws on household survey data from 87 rural villages in Bangladesh to examine the contribution that government family planning programs, as well as other health care interventions, have made toward the recent reduction in fertility by increasing contraceptive use and reducing infant mortality. The paper suggests that the programs have been effective and finds that targeted credit program placement, such as the Grameen Bank and the Bangladesh Rural Advancement Committee (BRAC), contributed to the effort as well.

A History of the Greek Language is a kaleidoscopic collection of ideas on the development of the Greek language through the centuries of its existence.

Introduction to Pali

The Arabs played an important role in Roman-controlled Oriens in the four centuries or so that elapsed from the Settlement of Pompey in 64 B.C. to the reign of Diocletian, A.D. 284–305. In Rome and the Arabs Irfan Shahîd explores this extensive but poorly known role and traces the phases of the Arab-Roman relationship, especially in the climactic third century, which witnessed the rise of many powerful Roman Arabs such as the Empreses of the Severan Dynasty, Emperor Philip, and the two rulers of Palmyra, Odenathus and Zenobia. Philip the Arab, the author argues, was the first Christian Roman emperor and Abgar the Great (ca. 200 A.D.) was the first Near Eastern ruler to adopt Christianity. In addition to political and military matters, the author also discusses Arab cultural contributions, pointing out the role of the Hellenized and Romanized Arabs in the urbanization of the region and in the progress of Christianity, particularly in Edessa under the Arab Abgarids.

The FAA'S concise Study aids for passing the checkride. The Practical Test Standards (PTS) series guides student pilots, flight instructors, and FAA-designated examiners through checkrides, the final test in acquiring a pilot license. Each PTS guide details the skill and knowledge that must be successfully demonstrated before an examiner can issue a certificate or rating. The knowledge requirements detail which subjects will be covered--which weather reports and forecasts candidates will be asked to analyze, which physiological conditions (such as dehydration, spatial disorientation, and hypoxia) candidates will need to discuss, and what kind of flight planning exercises will need to be demonstrated. The skill requirements include what kind of takeoff and landing must be performed, such as crosswind or short-field; how a steep turn should be executed, with specifics that include what bank angle and airspeed to use; and what areas will be tested on a continuous basis, such as the checklist usage, positive exchange of flight controls, and crew resource management. The tolerances are defined so the candidates know what altitude, airspeed, headings, and banks must be maintained to complete each maneuver successfully. Each PTS guide lists the knowledge and experience prerequisites for a particular certificate or rating and provides background information and study and reference materials.
