World Bank Discussion Paper
No. 337. Draws on household

survey data from 87 rural villages in Bangladesh to examine the contribution that government family planning programs, as well as other health care interventions, have made toward the recent reduction in fertility by increasing contraceptive use and reducing infant mortality. The paper suggests that the programs have been effective and finds that targeted credit

program placement, such as the Grameen Bank and the Bangladesh Rural Advancement Committee (BRAC), contributed to the effort as well.

Diabetes. Its Medical and Cultural History covers the history of scientific inquiry into this affliction from antiquity to the discovery of insulin (1921) with concurrent consideration of the history of the patient and the cultural historical background. The reprints of medical historical studies discuss general relationships as well as specific details and exceptional

research achievements of the past. Included in the bibliography of primary sources are the most important historical contributions in diabetic research and diabetic therapy with the author's name and information on the place of publication. The bibliography of secondary literature consolidates international studies from the past century to the present on the history of the theory of diabetes and therapeutic approaches. "A review of basic physical principles and vector analysis, lift, weight, thrust, drag, as well as other aviation topics as they relate to aerodynamics. This textbook takes the private and commercial student pilot through a review of basic physical principles and vector analysis

and covers the four forces in flight -- lift, weight, thrust and drag, as well as other aviation topics as they relate to aerodynamics, such as the atmosphere, stability, power and performance, aircraft limitations and maneuvering flight, and stalls and spins. The 2nd Edition now includes a chapter on high-speed (transonic) aerodynamics. The authors teach aviation subjects at the University of North Dakota's Aerospace Sciences Department and also have extensive

This 2002 book is a
guide to Italian usage
for students who have
already acquired the
basics of the language
and wish to extend
their knowledge.

Unlike conventional
grammars, it gives
special attention to
those areas of
vocabulary and grammar
which cause most
difficulty to English-
speakers. Careful
consideration is given
throughout to
questions of style,
register, and
politeness which are
essential to achieving
an appropriate level
of formality or
informality in writing
and speech. It surveys
the contemporary
linguistic scene in
Italy and gives ample

space to the new
varieties of Italian
that are emerging in
modern Italy. The
influence of the
dialects in shaping
the development of
Italian is also
acknowledged. Clear,
readable and easy to
consult via its two
indexes, this is an
essential reference
for learners seeking
access to the finer
nuances of the Italian
language.

Statistical
information is an
important tool for
analysing changing
patterns of urban
development and the
impact that policy
decisions have on life
in our cities, towns
and suburbs. Urban
Europe - statistics on
cities, towns and

suburbs provides detailed information for a number of territorial typologies that can be used to paint a picture of urban developments and urban life in the EU Member States, as well as EFTA and candidate countries. Each chapter presents statistical information in the form of maps, tables and figures, accompanied by a description of the policy context and a set of main findings. The publication is broken down into two parts : the first treats topics under the heading of city and urban developments, while the second focuses on the people in cities and the lives they lead. Overall there are 12 main chapters, covering : the urban

paradox, patterns of urban and city developments, the dominance of capital cities, smart cities, green cities, tourism and culture in cities, living in cities, working in cities, housing in cities, foreign-born persons in cities, poverty and social exclusion in cities, as well as satisfaction and the quality of life in cities.

The Turbine Pilot's Flight Manual

This book examines the legality of the use of force by states against individuals and non-state groups located beyond its borders, in light of applicable international law. The issues discussed include force used in the 'war on terror', pre-emptive self defence, and targeted

killings of individuals.

Redefining Airmanship offers the first concrete model of the abstract ideal of "airmanship," and gives the reader step-by-step guidance for self-appraisal and improvement in the areas of flight proficiency, teamwork, and good judgment in crisis situations. The author, Major Tony Kern, draws on his extensive flight and crew-training experience in the U.S. Air Force, but his model is invaluable for all pilots, whether military, recreational, or commercial. "Kern's work is a breakthrough, and a benchmark." --John J.
