What are "essential
questions," and how
do they differ from
other kinds of
questions? What's
so great about
them? Why should
you design and use
essential questions
in your classroom?

Essential questions
(EQs) help target
standards as you
organize curriculum
content into
coherent units that
yield focused and
thoughtful
learning. In the
classroom, EQs are
used to stimulate
students'
discussions and
promote a deeper
understanding of
the content.

Whether you are an
Understanding by
Design (UbD)
devotee or are
searching for ways
to address
standards—local or
Common Core State
Standards—in an
engaging way, Jay
McTighe and Grant
Wiggins provide
practical guidance
on how to design,
initiate, and embed
inquiry-based
teaching and
learning in your
classroom. Offering
dozens of examples,
the authors explore
the usefulness of
EQs in all K-12
content areas,
including skill-
based areas such as

math, PE, language
instruction, and
arts education. As
an important
element of their
backward design
approach to
designing
curriculum,
instruction, and
assessment, the
authors *Give a
comprehensive
explanation of why
EQs are so
important; *Explore
seven defining
characteristics of
EQs; *Distinguish
between topical and
overarching
questions and their
uses; *Outline the
rationale for using
EQs as the focal
point in creating
units of study; and
*Show how to create
effective EQs,
working from
sources including
standards, desired
understandings, and
student
misconceptions.
Using essential
questions can be
challenging—for
both teachers and
students—and this
book provides
guidance through

practical and proven processes, as well as suggested "response strategies" to encourage student engagement. Finally, you will learn how to create a culture of inquiry so that all members of the educational community—students, teachers, and administrators—benefit from the increased rigor and deepened understanding that emerge when essential questions become a guiding force for learners of all ages.

A Practical Manual for Principals, IB Coordinators, Heads of Department and Teachers Geography for the IB Diploma Study and Revision Guide SL and HL Core
SL and HL Core
The International Year of Planet Earth (IYPE) was established as a means of raising worldwide public and political awareness of the vast, though frequently under-used, potential the Earth Sciences possess for improving the quality of life of the peoples of the world and safeguarding Earth's rich and diverse environments. The

International Year project was jointly initiated in 2000 by the International Union of Geological Sciences (IUGS) and the Earth Science Division of the United Nations Educational, Scientific and Cultural Organisation (UNESCO). IUGS, which is a Non-Governmental Organisation, and UNESCO, an Inter-Governmental Organisation, already shared a long record of productive cooperation in the natural sciences and their application to societal problems, including the International Geoscience Programme (IGCP) now in its fourth decade. With its main goals of raising public awareness of, and enhancing research in the Earth sciences on a global scale in

both the developed and less-developed countries of the world, two operational programmes were demanded. In 2002 and 2003, the Series Editors together with Dr. Ted Nield and Dr. Henk Schalke (all four being core members of the Management Team at that time) drew up outlines of a Science and an Outreach Programme. In 2005, following the UN proclamation of 2008 as the United Nations International Year of Planet Earth, the "Year" grew into a triennium (2007-2009). OUP Oxford Directly linked to Oxford's bestselling DP Science resources, this new Course Preparation resource thoroughly prepares students to meet the demands of IB Diploma Programme Biology. Ideal for students who have studied

non-IB courses at pre-16 level, the text introduces learners to the IB approach, terminology and skills.

Essential Questions
Oxford University Press - Children
This yearbook is the official guide to schools offering the International Baccalaureate Diploma, Middle Years and Primary Years programmes. It tells you where the schools are and what they offer, and provides up-to-date information about the IB programmes and the International Baccalaureate Organization.
