The dynamic environment of investment banks, hedge funds, and private equity firms comes to life in David Stowell 's introduction to the ways they challenge and sustain each other. Capturing their reshaped business plans in the wake of the 2007-2009

global meltdown, his book reveals their key functions, compensation systems, unique roles in wealth creation and risk management, and epic battles for investor funds and corporate influence. Its combination of perspectives—drawn from his industry and academic backgrounds—delivers insights that illuminate the post-2009 reinvention and acclimation processes. Through a broad view of the ways these financial institutions affect corporations,

governments, and individuals, Professor Stowell shows us how and why they will continue to project their power and influence. Emphasizes the needs for capital, sources of capital, and the process of getting capital to those who need it. Integrates into the chapters ten cases about recent transactions, along with case notes and questions Accompanies cases with spreadsheets for readers to create their own analytical frameworks and consider

choices and opportunities. Transatlantic Security from the Sahel to the Horn of Africa United Nations Ties between the United States (US) and the European Union (EU) rival those between any other pair of international actors. After all, no other regions of the world are as closely connected in economics, security and politics as Europe and the US. This comprehensive volume makes conceptual progress and empirical contributions in accounting for how EU-US relations have been impacted by a context of multiple EU

crises alongside a parallel change in US policies. The authors find strong evidence to suggest that the transatlantic relationship is weakening. This is partly a consequence of the EU's internal policies, as it becomes more unified and autonomous of the US in some areas, while fragmenting in others. Most importantly, it is a consequence of the two actors' increasingly diverging perspectives and positions on international issues, institutions, norms and indeed the value of the transatlantic relationship. Although the long-term effects remain to be seen,

it is likely that the cracks in the foundation of transatlantic relations will continue into the present and foreseeable future. This book was originally published as a special issue of the Journal of European Integration. Crises and EU-US Relations Cambridge University Press The fourth edition of the Handbook of Human Factors and Ergonomics has been completely revised and updated. This includes an existing third edition chapters plus new chapters written to cover new areas.

---

These include the following subjects: Managing low-back disorder risk in the workplace  
Online interactivity  
Neuroergonomics Office ergonomics  
Social networking  
HF&E in motor vehicle transportation  
User requirements  
Human factors and ergonomics in aviation  
Human factors in ambient intelligent environments  
As with the earlier editions, the main purpose of this handbook is to serve the needs of the human factors and ergonomics researchers, practitioners, and graduate

students. Each chapter has a strong theory and scientific base, but is heavily focused on realworld applications. As such, a significant number of case studies, examples, figures, and tables are included to aid in the understanding and application of the material covered.

A remarkable document of ancient Chinese history: “ [An] indispensable addition to modern sinology. ” —China Review International This

volume of The Grand Scribe ' s Records includes the second segment of Han-dynasty memoirs and deals primarily with men who lived and served under Emperor Wu (r. 141 – 87 B.C.). The lead chapter presents a parallel biography of two ancient physicians, Pien Ch ' ü eh and Ts ' ang Kung, providing a transition between the founding of the Han dynasty and its heyday under Wu. The account of Liu P ' i is framed by the great rebellion he led in 154 B.C. and the remaining chapters trace the careers of court favorites, depict the tribulations of an ill-fated general, discuss the

---

Han ' s greatest enemy, the Hsiung-nu, and provide accounts of two great generals who fought them. The final memoir is structured around memorials by two strategists who attempted to lead Emperor Wu into negotiations with the Hsiung-nu, a policy that Ssu-ma Ch ' ien himself supported.

The development of new and social networking sites, as well as the growth of transnational Arab television, has

triggered a debate about the rise in transnational political and religious identification, as individuals and groups negotiate this new triad of media, religion and culture. This book examines the implications of new media on the rise of political Islam and on Islamic religious identity in the Arab Middle

East and North Africa, as well as among Muslim Arab Diasporas.

Undoubtedly, the process of globalization, especially in the field of media and ICTs, challenges the cultural and religious systems, particularly in terms of identity formation. Across the world, Arab Muslims have embraced new media

---

not only as a source of information but also as a source of guidance and fatwas, thereby transforming Muslim practices and rituals. This volume brings together chapters from a range of specialists working in the field, presenting a variety of case studies on new media, identity formation and political Islam in Muslim communities both within and beyond the MENA region. Offering new insight into the influence of media exposure on national, political, and cultural boundaries of the Islamic identity, this book is a valuable resource for students and scholars of Middle Eastern politics,

specifically political Islam and political communication. Foreign Direct Investment and Food and Water Security Nordic Council of Ministers

Following the 1979 Islamic Revolution, there was a dramatic reversal of women's rights, and the state revived many premodern social conventions through modern means and institutions. Customs such as the enforced veiling of women, easy divorce for men, child marriage, and polygamy

were robustly reintroduced and those who did not conform to societal strictures were severely punished. At the same time, new social and economic programs benefited the urban and rural poor, especially women, which had a direct impact on gender relations and the institution of marriage. Edited by Janet Afary and Jesilyn Faust, this interdisciplinary volume responds to the growing interest and need for literature on gender, marriage and

family relations in the Islamic context. The book examines how the institution of marriage transformed in Iran, paying close attention to the country's culture and politics. Part One examines marital changes in the rural and tribal sectors of society through the works of anthropologists Erika Friedl and Mary Hegland. Part Two turns its eye to look at changes in urban marriages to new forms of cohabitation. In Part Three, the

---

contributors explore the way technology and social media has impacted and altered the institution of family. Based on the work of new and established scholars, the collection provides an up-to-date study of an important and intensely politicized subject.

This book argues that Internet diffusion and use

in the Middle East enables meaningful micro-changes in citizens' lives, even in states where no Arab Spring revolution occurred. Using ethnographic evidence and taking a comparative perspective, it presents a grass roots look at how new media use fits into the practice of everyday life. It explores why

citizens use social media to digitally route around state and other forms of power at work in their lives. This increase in citizen civic engagement, supported by new media use, offers the possibility of a new order of things, from redefining patriarchal power relations at home, to reconfigurations of citizens'

---

relationships with the state, broadly defined. The author argues that new media channels offer pathways to empowerment widely and cheaply in the Middle East.

to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally

---

dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related

disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the

private sector and academic researchers. Informing Policy with Evidence and Analysis Routledge  
Twenty five years ago the first Human Development Report in 1990 began with a simple notion: that development is about enlarging people's choices—focusing broadly on the richness of human lives rather than narrowly on the richness of

---

economies. This Report starts with a fundamental question—how can work enhance human development? The Report takes a broad view of work, going beyond jobs and taking into account such activities as unpaid care work, voluntary work and creative work—all of which contribute to the richness of human lives. The Report highlights impressive progress on human

development over the past quarter century. The Iron Age Cambridge University Press The Nordic countries have collaborated in setting guidelines for dietary composition and recommended intakes of nutrients for several decades through the joint publication of the Nordic Nutrition Recommendations

(NNR). This 5th edition, the NNR 2012, gives Dietary Reference Values (DRVs) for nutrients, and compared with earlier editions more emphasis has been put on evaluating the scientific evidence for the role of food and food patterns contributing to the prevention of the major diet-related

---

chronic diseases. Recommendations on physical activity are included and interaction with physical activity has been taken into account for the individual nutrient recommendations wherever appropriate. A chapter on sustainable food consumption has been added. A Nordic perspective has been accounted

for in setting the reference values. The NNR 2012 has used an evidence-based and transparent approach in assessing associations between nutrients and foods and certain health outcomes. Systematic reviews form the basis for the recommendations of several nutrients and

topics, while a less stringent update has been done for others. The systematic reviews and individual chapters have been peer reviewed and the systematic reviews are published in the Food & Nutrition Research journal. The draft chapters were subject to an open public consultation. Recommendations

This report takes a  
broad view of the  
link between work

and human development. Work is a critical tool for economic growth and security, poverty reduction and gender equality. It enables full participation in society while affording people a sense of dignity and worth. Humans working together not only increase their material well-being, they also

accumulate a wide body of knowledge that serves as the basis for cultures and civilizations. The report finds that work enhances human development when policies are taken to expand productive, remunerative and satisfying work opportunities. Workers' skills and potentials are enhanced, their well-being in terms

of rights, safety and benefits are ensured with targeted interventions, and an agenda incorporating decent work, a new Social Contract and a Global Deal is pursued.

disorder (AUD) is a major public health problem in the United States. The estimated 12-month and lifetime prevalence values for AUD are 13.9% and 29.1%, respectively, with approximately half of individuals with lifetime AUD having a severe disorder. AUD and its sequelae also account for significant excess mortality and cost the United States more than \$200 billion annually. Despite its high prevalence and numerous negative consequences, AUD remains undertreated. In fact, fewer than 1 in 10 individuals in the United States with a 12-month diagnosis of AUD receive any treatment. Nevertheless, effective and evidence-based interventions are available, and treatment is associated with reductions in the risk of relapse and AUD-associated mortality. The guideline focuses specifically on evidence-based pharmacological treatments for AUD in outpatient settings and includes additional information on treatment planning, which are an integral part of using pharmacotherapy to treat AUD. In addition to reviewing the available evidence on the use of AUD pharmacotherapy, the guideline offers clear, concise, and actionable recommendation statements, each of which reflects the level of confidence that potential benefits of an intervention outweigh potential harms. The guideline provides guidance on implementing these recommendations into clinical practice, with the goal of improving quality of care and treatment outcomes of AUD.

Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this

challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those

preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.
