Foreign Policy Analysis of a Baltic State Collins

Presents short essays exploring the key concepts in cultural geography.

[Geography for the IB Diploma SL and HL Core: Prepare for Success](#) Oxford University Press, USA

The legacy of Alexander von Humboldt (1769–1859) looms large over the natural sciences. His 1799–1804 research expedition to Central and South America with botanist Aimé Bonpland set the course for the great scientific surveys of the nineteenth century, and inspired such essayists and artists as Emerson, Goethe, Thoreau, Poe, and Church. The chronicles of the expedition were published in Paris after Humboldt’s return, and first among them was the 1807 “Essay on the Geography of Plants.” Among the most cited writings in natural history, after the works of Darwin and Wallace, this work appears here for the first time in a complete English-language translation. Covering far more than its title implies, it represents the first articulation of an integrative “science of the earth,” encompassing most of today’s environmental sciences. Ecologist Stephen T. Jackson introduces the treatise and explains its enduring significance two centuries after its publication.

Examination guidance is also provided. New edition now available - ISBN 9780198389989

[Mathematics Higher Level for the IB Diploma Exam Preparation Guide](#) Cambridge University Press

This book provides a comprehensive analysis of Lithuanian foreign policy by employing the theory of small states and the agent-perspective to assess how President Dalia Grybauskaitė impacted Lithuanian foreign policy in 2009 – 2019 and which, in turn, could affect changes in international structures. The book is based on original interviews with Grybauskaitė and all her foreign policy advisors, as well as other Lithuanian diplomats and Ministers of Foreign Affairs. In addition to providing an important case study of Lithuanian foreign policy, this monograph also discusses the impact an agent formulating and executing small-state foreign policy may have on the ‘ grand structures ’ of international relations, such as the EU and NATO. For its investigation of the mutual relationship between agent and structure, this monograph draws on the literature on foreign policy analysis (FPA) and asks questions about the extent to which a particular leader of foreign policy may determine a specific policy decision or outcome. This book will be of particular interest to students of the Baltic region and Russia-Baltic relations, as well as to political scientists and researchers interested in FPA literature, and small-state security.

[20th Century World History](#) Cambridge University Press

Geography for the IB Diploma HL Core Extension: Prepare for Success Oxfam

Geopolitics and Development examines the historical emergence of development as a form of governmentality, from the end of empire to the Cold War and the War on Terror. It illustrates the various ways in which the meanings and relations of development as a discourse, an apparatus and an aspiration, have been geopolitically imagined and enframed. The book traces some of the multiple historical associations between development and diplomacy and seeks to underline the centrality of questions of territory, security, statehood and sovereignty to the pursuit of development, along with its enrolment in various (b)ordering practices. In making a case for greater attention to the evolving nexus between geopolitics and development and with particular reference to Africa, the book explores the historical and contemporary geopolitics of foreign aid, the interconnections between development and counterinsurgency, the role of the state and social movements in (re)imagining development, the rise of (re)emerging donors like China, India and Brazil, and the growing significance of South – South flows of investment, trade and development cooperation. Drawing on post-colonial and postdevelopment approaches and on some of the author ’ s own original empirical research, this is an essential, critical and interdisciplinary analysis of the complex and dynamic political geographies of global development. Primarily intended for scholars and post-graduate students in development studies, human geography, African studies and international relations, this book provides an engaging, invaluable and up-to-date resource for making sense of the complex entanglement between geopolitics and development, past and

present.

IB Review Magazine Volume 3 2016/17 Cambridge University Press

Future Folk Horror: Contemporary Anxieties and Possible Futures analyzes folk horror by looking at its recent popularity in novels and films such as *The Ritual* (2011), *The Witch* (2015), and *Candyman* (2021). Countering traditional views of the genre as depictions of the monstrous, rural, and pagan past trying to consume the present, the contributors to this collection posit folk horror as being able to uniquely capture the anxieties of the twenty-first century, caused by an ongoing pandemic and the divisive populist politics that have arisen around it. Further, this book shows how, through its increasing intersections with other genres such as science fiction, the weird, and eco-criticism as seen in films and texts like *The Zero Theorem* (2013), *The Witcher* (2007 – 2021), and *Annihilation* (2018) as well as through its engagement with topics around climate change, racism, and identity politics, folk horror can point to other ways of being in the world and visions of possible futures.
