Written by two experienced psychology teachers, this is the second edition of Psychology Sorted Book 1, in the recent series for students and teachers. It is structured to help them understand and select from the wealth of psychological research that is relevant to the IB Diploma Psychology syllabus. The book has been developed independently of the International Baccalaureate Organization (IB), which in no way endorses it. However, the topics and content are especially chosen to be relevant to the 2019 IB Diploma psychology curriculum, while also providing useful support to teachers and students of other curricula, including those taught as part of university courses. This second edition has been updated to include new material suggested by the IB in December 2019. The book provides organised overview grids suggesting classic and recent key studies for the core biological, cognitive and sociocultural approaches. Links are made between content and studies from other areas, including the options. There are hyperlinks and details for further relevant resources, journal articles and media talks and summaries of every study, written in clear language and including evaluation points. The authors have also included critical thinking suggestions for each topic and a full bibliography and author index. Further support is available from the authors' Psychology Sorted blog and their Psychology Sorted Facebook page

Prepare to enter a world requiring students to have high critical thinking skills, good health habits, and an understanding of other cultures. This book follows the International Baccalaureate psychology curriculum course but is a good choice for any course wanting a global perspective and an in-depth view of how classic psychology theory and research is developing into a mature and globally relevant discipline. Each chapter demonstrates thinking strategies (command terms for IB) to increase critical thought. Topics covered are biological, cognitive, and sociocultural approaches to behavior, along with abnormal, health, and developmental psychology. Qualitative and quantitative research methods are detailed, along with guidelines for the IB internal assessment. Added benefits are advice for extended essays, lesson such as the psychology of terrorism, and health projects. IB CAS ideas, links to Theory of Knowledge, and approaches to teaching and learning are woven into each section. Kali the tiger is pictured on the back of the book and perhaps your class will do a CAS project about her situation!
