Colin Dyer's Research in Psychology provides a concise and accessible introduction to research methods and statistics in the field, presenting a clear focus on the practicalities of how to effectively conduct research. Presents thorough coverage of key areas and topics. Provides consistently clear exposition and explanation, while remaining succinct and concise. Coverage of SPSS Versions 11, 12 and 13. Focuses on the practicalities of research, (the "how to do it" element). Includes qualitative, as well as quantitative, approaches. Meets the current needs of students with little background in research methods and statistics.

Theory of Knowledge for the IB Diploma OUP Oxford

Written by an experienced teacher and senior examiner with an in-depth understanding of teaching and assessments for the IB psychology SL and HL courses. This new TestPrep book helps students to familiarise themselves with the psychology SL and HL exams. It provides information about the approach of the papers and the types of exam questions they will come across. Students can practice answering the questions by writing directly into the book, just like they do in the exam. And, as they work through, there are strategies, hints and support for answering the questions PLUS fully worked solutions at the end. From some excellent and unique practice questions for Paper 1 to invaluable advice from the experts on how to tackle Paper 2 (plus some unseen stimulus material for HL students for Paper 3), this book provides essential exam practice support for students revising for their psychology exams. Students will: understand what to expect from the psychology exam papers - with a breakdown of the format of Paper 1 (SL and HL), Paper 2 (SL and HL) and Paper 3 (HL only), the command terms and the assessment objectives see example answers to Paper 1, Paper 2 and Paper 3-style questions - with brand new, unseen sample answers to exam-style questions and answer analysis from the point of view of an examiner test themselves - with three complete sets of exam-style psychology practice papers (the first set includes loads of additional tips, examiner commentary and support to guide students to achieve high marks; the second set has fewer helpful prompts; the last set has no additional help and is designed so students can have a go at it themselves!) check answers - with fully-worked solutions in the back of the book.

Biology John Wiley & Sons

What is psychology? When did it begin? Where did it come from? How does psychology compare with related subjects such as psychiatry and psychotherapy? To what extent is it scientific? *Introducing Psychology* answers all these questions and more, explaining what the subject has been in the past and what it is now. The main "schools" of thought and the sections within psychology are described, including Introspection, Biopsychology, Psychoanalysis, Behaviourism, Comparative (Animal) Psychology, Cognitive Approaches (including the Gestalt movement), Social Psychology, Developmental Psychology and Humanism. The key figures covered include: Freud, Pavlov, Skinner, Bandura, Piaget, Bowlby, Maslow and Rogers, as well as many lesser-known but important psychologists.

Psychology Oxford University Press, USA

Comprehensively updated to match the new DP Psychology syllabus, for first teaching September 2017, the second edition of this assessment-focused study tool presents all the key concepts covered at Standard and Higher Level, building learners' confidence and promoting long-term achievement in examinations. Key concepts are broken down into manageable segments as part of a concise, accessible format, reinforcing understanding and facilitating effective revision. Rigorous extension material provides opportunities for learners to be stretched, whilst clear, straightforward language and visual aids support EAL learners.

Psychology for the Ib Diploma Study and Revision Guide Ib Diploma Program

Written by two experienced psychology teachers, this is the second edition of Psychology Sorted Book 1, in the recent series for students and teachers. It is structured to help them understand and select from the wealth of psychological research that is relevant to the IB Diploma Psychology syllabus. The book has been developed independently of the International Baccalaureate Organization (IB), which in no way endorses it. However, the topics and content are especially chosen to be relevant to the 2019 IB Diploma psychology curriculum, while also providing useful support to teachers and students of other curricula, including those taught as part of university courses. This second edition has been updated to include new material suggested by the IB in December 2019. The book provides organised overview grids suggesting classic and recent key studies for the core biological, cognitive and sociocultural approaches. Links are made between content and studies from other areas, including the options. There are hyperlinks and details for further relevant resources, journal articles and media talks and summaries of every study, written in clear language and including evaluation points. The authors have also included critical thinking suggestions for each topic and a full bibliography and author index. Further support is available from the authors' Psychology Sorted blog and their Psychology Sorted Facebook page

Includes established theories and cutting-edge developments. Presents the work of an international group of experts. Presents the nature, origin, implications, an future course of major unresolved issues in the area.

OUP Oxford

In this accessible student's guide, an experienced professor examines the study of psychology from a distinctly Christian perspective, introducing readers to key issues such as the origins of morality, nature vs. nurture, the relationship between the mind and the brain, and the concept of personal identity. Whether examining the history of psychological reflection, the legacy of the Enlightenment and Darwinism, or the development of modernist psychology, this volume will help students think carefully about the influential ideas that continue to shape discussions about what it means to be human.
