Performance assessment is a hot topic in school systems, and educators continue to analyze its costs, benefits, and feasibility as a replacement for high-stakes testing. Until now, researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment. Beyond the Bubble Test: How Performance Assessments Support

21st Century Learning synthesizes the latest findings in the field, and not a moment too soon. Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world. The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy. Instead teachers need to engage students in deeper learning, assessing their ability to use higher-order skills. Skills like synthesizing information, understanding evidence, and critical problem-solving are not achieved when we teach to multiple-choice exams. Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests

with something that works better. This book provides new perspectives on current performance assessment research, plus an incisive look at what's possible at the local and state levels. Linda Darling-Hammond, with a team of leading scholars, bring together lessons learned, new directions, and solid recommendations into a single, readily accessible compendium. *Beyond the Bubble Test* situates the current debate on performance assessment within the context of testing in the United States. This comprehensive resource also looks beyond our U.S. borders to Singapore, Hong Kong, and other places whose reform-mindedness can serve as an example to us. **Understanding and Evaluating Research** John Wiley & Sons

Expert writers share reflections on their experience, and explore issues for the future, of the International Baccalaureate Middle Years Programme. The issues raised are of interest and relevance to those with responsibility for MYP teaching, learning and administration in schools and will provoke interest in the programme amongst those considering its adoption.

Britain's vote to leave the European Union in the summer of 2016 came as a shock to many observers. But writers had long been exploring anxieties and fractures in British society – from Euroscepticism, to immigration, to devolution, to post-truth narratives – that came to the fore in the Brexit campaign and its aftermath. Reading these tensions back into contemporary British writing, Kristian Shaw coins the term *Brexlit* to deliver the first in-depth study of how writers engaged with these issues before and after the referendum result.

Examining the work of over a hundred British authors, including Julian Barnes, Jonathan Coe, Kazuo Ishiguro, and Ali Smith, as well as popular fiction by Andrew Marr and Stanley Johnson, *Brexlit* explores how a new and urgent genre of post-Brexit fiction is beginning to emerge.

This book explores colonial and post-colonial intelligence services in South Asia. It traces the genealogy of the institutions to analyze changes and continuities throughout the region. The volume also provides a framework for analyzing how intelligence services developed in these countries by looking at both internal and external issues, and shows how vital and sometimes interconnected these issues are for understanding intelligence in South Asia. It demonstrates how some countries and intelligence services borrowed from the colonial era and others started new institutions to protect national security in response to the shifting demands of the Cold War and post-Cold War era. Bringing together a group of international scholars, the anthology delves into the intelligence services of Afghanistan, Bangladesh, Bhutan, India, the Maldives, Myanmar, Nepal, Pakistan and Sri Lanka and traces how these national services developed in similar and diverse ways. This book will be of much interest to students of intelligence studies, Asian politics, security studies and International Relations.

Exponence refers to the mapping of morphosyntactic structure to phonological representations, a research area which is not only highly controversial, but also approached in fundamentally different ways in theoretical morphology and phonology. This volume brings together leading specialists from morphosyntax and morphophonology. The authors address common problems, questions and solutions in both areas, and formulate a coherent research program for exponence which integrates the central insights of the last decades and provides important new challenges for the future. The book is aimed at phonologists, morphologists, and syntacticians of all theoretical persuasions at graduate level and above. Jihad Springer Science & Business Media Schools wishing to introduce the IB diploma programme are faced with major investment in terms of time, effort and money in order to become authorised. This manual is a resource for schools already offering the diploma, as well as for prospective diploma schools.

“ Lim and Hunter ’ s prolific writings shed light on the resultant effects of macro and micro-policies that have shaped Malaysia. Their analyses touch especially on the key actors—individuals and organisations—that have played a catalytic role in misshaping the nation ’ s development. Both their opinions and reflections on the issues written here have their foundation in fundamental economics, and rightly so. Civilisational progress or regression can be seen to be closely aligned to the foundational economics of society. The end of the crisis and the dark forces will come. The question is only when and how and whether we, the people,

can rise to save what is rightfully ours. ” Siti Z Kasim Lawyer and activist “ Can Malaysia return to the nation-building principles our forefathers agreed to—constitutional monarchy, separation of powers, rule of law, democracy, good governance and a plural society? Lim and Hunter have grappled with these issues which will decide the future of Malaysia. ” Lim Kit Siang MP for Iskandar Puteri and former leader of the opposition “ Lim and Hunter take on the daunting task of unravelling the complexities of the Malaysian journey since independence. They have dared to touch on all the issues that really matter which have been bullied out of the public space for being ‘ sensitive ’ and therefore off-limits to any reasonable discussion. Yet discuss them we must. Through the years, Malaysia, or rather her politicians, have woven a tangled web of power, race, religion and corruption that seems impenetrable. These power dynamics have brought us to our current sorry state. This book helps us to take that crucial first step of looking at ourselves honestly and critically. If we can all put the nation first and do just that, we have a chance of the Malaysia we dreamed of. This book is essential reading for all Malaysians who believe this is yet possible. ” Ambiga Sreenevasan Lawyer and human rights advocate

This book offers the first comprehensive examination of Russia's Arctic strategy, ranging from climate change issues and territorial disputes to energy policy and domestic challenges. As the receding polar ice increases the accessibility of the Arctic region, rival powers have been manoeuvring for geopolitical and resource security. Geographically, Russia controls half of the Arctic coastline, 40 percent of the land area beyond the Circumpolar North, and three quarters of the Arctic population. In total, the sea and land surface area of the Russian Arctic is about 6 million square kilometres. Economically, as much as 20 percent of Russia's GDP and its total exports is generated north of the Arctic

Circle. In terms of resources, about 95 percent of its gas, 75 percent of its oil, 96 percent of its platinum, 90 percent of its nickel and cobalt, and 60 percent of its copper reserves are found in Arctic and Sub-Arctic regions. Add to this the riches of the continental shelf, seabed, and waters, ranging from rare earth minerals to fish stocks. After a spike of aggressive rhetoric when Russia planted its flag in the Arctic seabed in 2007, Moscow has attempted to strengthen its position as a key factor in developing an international consensus concerning a region where its relative advantages are manifest, despite its diminishing military, technological, and human capacities.

In this collection, senior experts explore all aspects of extreme right wing political violence, from the nature of the threat, processes of engagement, and ideology to the lessons that can be drawn from exiting such engagement. Further, right wing activism and political violence are compared with Jihadi violence and engagement. Also, the European experience is placed within a greater framework, including that of the United States and the Arab Spring. The book opens with an essay on U.S. far right groups, investigating their origins and processes of recruitment. It then delves into violence against UK Mosques and Islamic centers, the relationship between Ulster loyalism and far right extremism, the Dutch extremist landscape, and the July 2011 Norway attacks. Also discussed are how narratives of violence are built and justified, at what point do individuals join into violence, and how differently states respond to left-wing vs. right-wing extremism. This comparative work offers a unique look into the very nature of right wing extremism and will be a must-read for anyone studying political violence and terrorism

This book critically examines the process of statebuilding by the EU, focusing on its attempts to build Member States in the Western Balkan region. This book analyses the European Union's policies towards, and the impact they have, upon the states of the Western Balkans, and assesses how these affect the nature of EU foreign policy. To this end, it focuses on the tools and mechanisms that the EU

employs in its enlargement policy and examines the new instruments of direct intervention (in Bosnia and Kosovo), political coercion (in the case of Croatia and Serbia in relation to the International Criminal Tribunal for the former Yugoslavia), and stricter conditionality in the Western Balkan countries. The book discusses the key aim of this special form of statebuilding, which is to establish functional liberal-democratic states in Albania, Bosnia and Herzegovina, Croatia, Kosovo, Macedonia, Montenegro, and Serbia in order for them to join the EU and to cope with the responsibilities and pressures of membership in the future. However, the authors argue that while the EU sees itself as an international actor that promotes and protects liberal-democratic values, norms and principles, its experiences in the Western Balkans demonstrate how the EU's actions in the region have undermined the basic principles of democratic decision-making (such as the European support for impositions in Bosnia) and international law (Kosovo), and have consequently contributed to new tensions (see police reform in Bosnia, and the tensions between Kosovo and Serbia) and dependencies. This book will be of much interest to students of statebuilding, EU politics, global governance and IR/Security Studies in general. Israel, Jordan, and Palestine Hachette+ORM

A sweeping account of the global rise of English and the high-stakes politics of language Spoken by a quarter of the world's population, English is today's lingua franca - its common tongue. The language of business, popular media, and international politics, English has become commodified for its economic value and increasingly detached from any particular nation. This meteoric "rise of English" has many obvious benefits to communication.

Tourists can travel abroad with greater ease. Political leaders can directly engage their counterparts. Researchers can collaborate with foreign colleagues. Business interests can flourish in the global economy. But the rise of English has very real downsides as well. In Europe, imperatives of political integration and job mobility compete with pride in national language and heritage. In the United States and England, English isolates us from the cultural and economic benefits of speaking other languages. And in countries like India, South Africa, Morocco, and Rwanda, it has stratified society along lines of English proficiency. In *The Rise of English*, Rosemary Salomone offers a commanding view of the unprecedented spread of English and the far-reaching effects it has on global and local politics, economics, media, education, and business. From the inner workings of the European Union to linguistic battles over influence in Africa, Salomone draws on a wealth of research to tell the complex story of English - and, ultimately, to argue for English not as a force for domination but as a core component of multilingualism and the transcendence of linguistic and cultural borders. *The Morphology and Phonology of Exponence* Routledge

Kenya is a country of geopolitical and economic importance in East Africa. It shares borders with unstable states such as Somalia and Sudan while being a hub for trade, communication, finance, and transportation across the region. Although relatively stable since its independence in 1963, the country still faces poverty, inequality, and corruption. In addition, the contested election of 2007 led to severe ethnic strife that tested its political stability, leading to a new constitution in 2010. This unique survey by a leading expert on the region provides a critical analysis of the socio-economic development in Kenya from a political economy perspective. It

highlights Kenya's transition from being a centralized state to having a clear separation of powers and analyzes key issues such as economic growth, urbanization, corruption, and reform. The book identifies Kenya's key socio-development problems and offers solutions to improve both governance and economic performance, making it an essential resource to researchers, academics, and policy makers working on development issues and African politics.

Written by a global group of leading scholars, this wide-ranging Research Handbook provides insightful analysis, useful historical perspective, and a point of reference on the controversial nexus of climate change law and policy, intellectual property law and policy, innovation policy, technology transfer, and trade. The contributors provide a unique review of the scientific background, international treaties, and political and institutional contexts of climate change and intellectual property law.

They further identify critical conflicts and differences of approach between developed and developing countries. Finally they put forward and analyse the relevant intellectual property law doctrines and policy options for funding, developing, disseminating, and regulating the required technologies and their associated activities and business practices. The book will serve as a resource and reference tool for scholars, policymakers and practitioners looking to understand the issues at the interface of intellectual property and climate change.

Although group conflict is hardly new, the last decade has seen a proliferation of conflicts engaging intrastate ethnic groups. It is estimated that two-thirds of violent conflicts being fought each year in every

part of the globe including North America are ethnic conflicts. Unlike traditional warfare, civilians comprise more than 80 percent of the casualties, and the economic and psychological impact on survivors is often so devastating that some experts believe that ethnic conflict is the most destabilizing force in the post-Cold War world. Although these conflicts also have political, economic, and other causes, the purpose of this volume is to develop a psychological understanding of ethnic warfare. More specifically, Handbook of Ethnopolitical Conflict explores the function of ethnic, religious, and national identities in intergroup conflict. In addition, it features recommendations for policy makers with the intention to reduce or ameliorate the occurrences and consequences of these conflicts worldwide.

This book makes an original contribution to credential sociology by analysing how high school certificates become and remain valuable in a context of mass high school participation (i.e. credentialism). Building on a detailed analysis of the International Baccalaureate (IB) Diploma, a senior secondary school certificate offered in over 150 countries, Quentin Maire argues that the advent of new private credentials can be understood as a phenomenon of credential stratification in a context of intensified academic competition. Using original data on high school credentials in Australia and internationally, the author makes a strong case for certificates to be studied relationally, by locating them in the credentialing structures in which they are inserted. He systematically applies the comparative method to explain the role of the curriculum, family resources, school segregation and higher education selection in creating a credential hierarchy. His robust

combination of theoretical construction and detailed empirical work allows him to offer new insights into social inequality in education systems, credential theory and the IB Diploma.

Understanding and Evaluating Research: A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.
