Lotus Notes 4.0, covers all the important and difficult subjects that any systems manager will come across. Whether you are installing Notes on a single server and want help on efficient user set up, configuration and management, or if you are setting up several linked sites and need to know about WAN links, this book will be invaluable. The book is arranged progressively: the first chapter is an overview of Notes, the workstation software and interface. Following this is a guide to the hardware you'll need: from server specifications to workstation, remote connections and WAN links. Next is an overview of the software you will need to run Notes on different platforms and any likely problems you'll have with network software. Remote access to Notes follows, then a chapter describing how Notes distributes information between multiple servers -- and ensures that each database is up to date. The rest of the book is devoted to topics such as: how to manage Notes -- database, user and server administration; how to get the most from Notes' electronic mail feature and tie it in with mail enable applications, and how to create a Notes application. Completely updated to cover Lotus Notes version 4.5. Covers all aspects of Lotus Notes for the systems manager.
