Computer games have become ubiquitous in today's society. Many scholars have speculated on the reasons for their massive success. Yet we haven't considered the most basic questions: Why do computer games exist? What specific circumstances led to the creation of this entirely new type of game? What sorts of knowledge facilitated the requisite technological and institutional transformations? With Computer Game Worlds, Claus Pias sets out to answer these questions. Tracing computer games from their earliest forms to the unstoppable commercial and cultural phenomena they have become today, Pias then provides a careful epistemological reconstruction of the process of playing games, both at computers and by computers themselves. The book makes a valuable theoretical contribution to the ongoing discussion about computer games.

It is not a peaceful time in the Algardis Empire. War is raging between the mages and seventeen-year-old Sara Fairchild will be right in the middle of it. She just doesn't know it yet. Sara is the daughter of a disgraced imperial commander, executed for desertion. Sara is also the best duelist and hand-to-hand combatant in Sandrin. She lives quietly with her family's shame but when challenged about her family's honor, her opponent inevitably loses. On the night she finds out her father's true last actions, she takes the Mercenary Guilds' vows to serve in the emperor's army. Using her quick wits and fierce fighting skills, she earns a spot in the first division. There she discovers secrets the mages on both sides would prefer stay hidden. Dark enemies hunt her and soon it's not just Sara questioning the motivation behind this war. While fighting mages, blackmailing merchants and discovering new friends, Sara comes across something she's never had before - passion. The question is - can she fight for her empress against a mage who might unwittingly claim her heart? This is year one of the Initiate Wars. Sara is hoping it doesn't become the year she dies.

A QUEST to discover the original language and symbols of humankind places Dr. Hope Taylor and her dedicated associates - a British archeologist, a biblical historian, and an ex-Legionnaire/NSA operative - in deadly danger. Secret societies, the Vatican, and rogue mercenaries pursue them to both suppress and unleash the power of ancient knowledge and biblical prophecy. THE ENIGMA of the Black Opal, the sub rosa plot to usher in The Second Coming, and the real power of The Ark of the Covenant are all revealed in this quest to solve mysteries unknown for centuries. Originating from the distant stars, hidden for centuries, and now scattered throughout the world - Sumer, Luxor, Roswell ...- etched on shimmering triangular Tablets, come oracles and compelling evidence of alien intervention. Hugh Fraser is a college English professor, trained Acupuncturist, and ex Top Secret International Courier Officer for the U.S. Army. His goal is to bring to the reader thought-provoking novels that enlighten, engage, and entertain. He lives in Reno, NV with his wife Louise and their three West Highland White Terriers.

With the quantity and quality of available works in Information Systems (IS) research, it would seem advantageous to possess a concise list of exemplary works on IS research, in order to enable instructors of IS research courses to better prepare students to publish in IS venues. To that end, The Handbook of Information Systems Research provides a collection of works on a variety of topics related to IS research. This book provides a fresh perspective on issues related to IS research by providing chapters from world-renowned leaders in IS research along with chapters from relative newcomers who bring some interesting and often new perspectives to IS research. This book should serve as an excellent text for a graduate course on IS research methods.
