The Educational Policy Improvement Center (EPIC) conducted an investigation of the Intersegmental Committee for the Academic Senates (ICAS) Statements of Competencies for Mathematics and Academic Literacy. The purpose of this work is to understand how the ICAS competencies relate to college and career readiness, as represented by the augmented Common Core State Standards (CCSS) adopted by the California State Board of Education (SBE) on August 2, 2010. This study investigated a crosswalk analysis between (a) the Academic Literacy (ELA) ICAS competencies and the CCSS ELA Anchor Standards and (b) the mathematics ICAS competencies and the CCSS Standards for Mathematical Practice and the High School Mathematics Standards at the cluster level. Overall, the study finds that the ICAS competencies do relate to the augmented Common Core State Standards. This study also reveals the absence of certain "habits of mind" and English as a Second Language (ESL) standards in the CCSS ELA standards, and the absence of discrete mathematics and calculus in the augmented CCSS mathematics standards. The ICAS framework is broader than the CCSS ELA standards in addressing additional components related to supporting ESL students and includes key cognitive strategies all students need to be successful in postsecondary settings. The results of this study also raise the issue of the level of desired preparation in mathematics for high school graduates in California. The CCSS mathematics standards strongly relate to the ICAS competencies identified as "essential" for all students, but have gaps with the ICAS competencies deemed "desirable" for all students. Appended are: (1) Standards and Competencies; and (2) Competencies and Frequencies of Ratings. (Contains 5 figures, 17 tables, and 5 footnotes.) In *The Revolutionary Imagination in the Americas and the Age of Development*, María Josefina Saldaña-Portillo boldly argues that crucial twentieth-century revolutionary challenges to colonialism and capitalism in the Americas have failed to resist—and in fact have been constitutively related to—the very developmentalist narratives that have justified and naturalized postwar capitalism. Saldaña-Portillo brings the critique of development discourse to bear on such exemplars of revolutionary and resistant political thought and practice as Ernesto “Che” Guevara, Malcolm X, the Sandinista government of Nicaragua, and the Guatemalan guerrilla resistance. She suggests that for each of these, developmentalist constructions frame the struggle as a heroic movement from unconsciousness to consciousness, from a childlike backwardness toward a disciplined and self-aware maturity. Reading governmental reports, memos, and policies, Saldaña-Portillo traces the arc of development narratives from its beginnings in the 1944 Bretton Woods conference through its apex during Robert S. McNamara's reign at the World Bank (1968–1981). She compares these narratives with models of subjectivity and agency embedded in the autobiographical texts of three revolutionary icons of the 1960s and 1970s—those of Che Guevara, Guatemalan insurgent Mario Payeras, and Malcolm X—and the agricultural policy of the Sandinista National Liberation Front (FSLN). Saldaña-Portillo highlights a shared paradigm of a masculinist transformation of the individual requiring the “transcendence” of ethnic particularity for the good of the nation. While she argues that this model of progress often alienated the very communities targeted by the revolutionaries, she shows how contemporary insurgents such as Rigoberta Menchú, the Zapatista movement, and queer Aztlán have taken up the radicalism of their predecessors to retheorize revolutionary subjectivity for the twenty-first century.

"How did a 75-year old Star Trek actor become a social media juggernaut with nearly four million fans on Facebook? Why does everything he posts spread like wildfire across the ether, with tens to hundreds of thousands of likes and shares? And what can other sites, celebrities, brands and companies do to attain his stratospheric engagement levels, which hover near 100

percent while most languish in the single digits? In this candid, hilarious and informative book, Takei recounts his experiences on platforms such as Twitter, YouTube and Facebook, where fans and pundits alike have crowned him King. He muses about everything from the nature of viral sharing, to the taming of Internet trolls, to why Yoda, bacon and cats are such popular memes. Takei isn't afraid to tell it like he sees it, and to engage the reader just as he does his legions of fans.
