The Newbery Medal and Coretta Scott King Award-winning classic about a boy who decides to hit the road to find his father—from Christopher Paul Curtis, author of *The Watsons Go To Birmingham—1963*, a Newbery and Coretta Scott King Honoree. It's 1936, in Flint Michigan. Times may be hard, and ten-year-old Bud may be a motherless boy on the run, but Bud's got a few things going for him: 1. He has his own suitcase full of special things. 2. He's the author of Bud Caldwell's *Rules* and *Things for Having a Funner Life* and *Making a Better Liar Out of Yourself*. 3. His momma never told him who his father was, but she left a clue: flyers advertising Herman E. Calloway and his famous band, the Dusky Devastators of the Depression!!!!!! Bud's

got an idea that those flyers will lead him to his father. Once he decides to hit the road to find this mystery man, nothing can stop him—not hunger, not fear, not vampires, not even Herman E. Calloway himself. The collapse of socialism at the end of the twentieth century brought devastating changes to Mongolia. Economic shock therapy—an immediate liberalization of trade and privatization of publicly owned assets—quickly led to impoverishment, especially in rural parts of the country, where *Tragic Spirits* takes place. Following the travels of the nomadic Buryats, Manduhai Buyandelger tells a story not only of economic devastation but also a remarkable Buryat response to it—the revival of shamanic practices after decades of socialist suppression. Attributing their current misfortunes to returning ancestral spirits who are vengeful over being abandoned under socialism, the Buryats are now

at once trying to appease their ancestors and recover the history of their people through shamanic practice. Thoroughly documenting this process, Buyandelger situates it as part of a global phenomenon, comparing the rise of shamanism in liberalized Mongolia to its similar rise in Africa and Indonesia. In doing so, she offers a sophisticated analysis of the way economics, politics, gender, and other factors influence the spirit world and the crucial workings of cultural memory. The *Kompilasi Hukum Islam and Legal Practice in the Indonesian Religious Courts* Amsterdam University Press Despite their close geographic and cultural ties, Indonesia and Malaysia have dramatically different Islamic education, with that in Indonesia being relatively decentralized and discursively diverse, while that in Malaysia is centralized and discursively restricted. The book explores the nature of the Islamic education systems in Indonesia and Malaysia and the different approaches taken by these states in managing these systems. The book argues that the post-colonial state in Malaysia has been more successful in centralising its control over Islamic education, and more concerned with promoting a restrictive orthodoxy, compared to the post-colonial state in Indonesia. This is due to three factors: the ideological makeup of the state institutions that oversee Islamic education; patterns of societal Islamisation that have prompted different responses from the states; and control of resources by the central government that influences centre-periphery relations. Informed by the theoretical works of state-in-society relations and historical institutionalism, this book shows that the three aforementioned factors can help a state to minimize influence from the society and exert its dominance, in this case by centralising control over Islamic education. Specifically, they help us understand the markedly different landscapes of Islamic education in Malaysia and Indonesia. It will be of interest to academics in the field of Southeast Asian Studies, Asian Education and Comparative Education.

The Expansion of Protest Space South Asia in Motion

The book deals with the complicated relationships between national security and human rights, and between public health and human rights. Its premise is the fact that national security and public health are both included in human rights instruments as 'exceptions' to the human rights therein sanctioned, yet they can arguably be considered as human rights themselves and be equally valuable. The book therefore asks to what extent the protection of the individual could – or should – be overridden to enable the protection of the national security or public health of the general public. Both practice and case law have shown that human rights risk being set aside when they clash with the protection of national security or public health. Through theoretical analysis and practical examples, the book addresses the conflicts that arise when the concepts of national security and public health are used – and abused – and other rights, including freedom of speech, procedural freedoms, individual health, are violated as a consequence. It provides many interesting findings on the values that states are ready to protect – and forego – to ensure their safety, which can contribute to the ongoing debate on the protection of human rights. This book was originally published as a special issue of *The International Journal of Human Rights*.

National Security, Public Health: Exceptions to Human Rights? MIT Press

A new, thoroughly updated edition of a comprehensive overview of knowledge management (KM), covering theoretical foundations, the KM process, tools, and professions. The ability to manage

knowledge has become increasingly important in today's knowledge economy. Knowledge is considered a valuable commodity, embedded in products and in the tacit knowledge of highly mobile individual employees. Knowledge management (KM) represents a deliberate and systematic approach to cultivating and sharing an organization's knowledge base. This textbook and professional reference offers a comprehensive overview of the field. Drawing on ideas, tools, and techniques from such disciplines as sociology, cognitive science, organizational behavior, and information science, it describes KM theory and practice at the individual, community, and organizational levels. Chapters cover such topics as tacit and explicit knowledge, theoretical modeling of KM, the KM cycle from knowledge capture to knowledge use, KM tools, KM assessment, and KM professionals. This third edition has been completely revised and updated to reflect advances in the dynamic and emerging field of KM. The specific changes include extended treatment of tacit knowledge; integration of such newer technologies as social media, visualization, mobile technologies, and crowdsourcing; a new chapter on knowledge continuity, with key criteria for identifying knowledge at risk; material on how to identify, document, validate, share, and implement lessons learned and best practices; the addition of new categories of KM jobs; and a new emphasis on the role of KM in innovation. Supplementary materials for instructors are available online.

This is the first work of its kind. Original contributions from leading academicians, practitioners and accounting associations

from around the world make this handbook a unique source of information on international accounting education and certification processes. A uniform format in most of the chapters allows for easy comparison between countries. This volume documents the development of accounting education and practice at country and global levels; studies the sensitivity of accounting education and practices to the unique socio-economic needs of its environment; and allows comparative studies at a time when attempts have begun to harmonize accounting education internationally. Most importantly, it shows how educational programmes around the world are preparing future accounting professionals to deal with the rapid technological and environmental changes of the 21st century.

Knowledge and Practice in Business and Organisations contributes to scholarly understanding of knowledge and practice, mapping the conceptual terrain, providing a critical review of debates in the field and setting out key theoretical perspectives. Knowledge and practice are explored in a range of organisational and policy settings through six context-specific discussions. The collection helps shape the field, identify areas for future research inquiry, and suggest implications for practitioners. The range of sites of inquiry represented in the book (e.g. craft working, accounting, public sector organisations, creative industries, health care, and so on) make the book distinctive, enabling the reader to connect debates and ideas from across a range of sectors and disciplines. The book charts different currents of debate which have hitherto tended to remain unconnected. In one accessible volume, this book provides an excellent introduction to a set of concepts that have animated scholarly conversations across a range of disciplines and provides cases and examples of practices which come from beyond any one particular sector. Aimed at researchers and academics in the field, this book is a valuable source, helping define and progress the scholarly debate.
