Careers in Science and Technology Asian Development Bank

BPP Learning Media's ICFE Workbook is the ideal companion to assist students with technical English learning and to gain certification of their abilities which are recognised by thousands of educational organisations and employers worldwide.

Audit and Assurance Penguin (Non-Classics)

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Port Competitiveness Cambridge University Press

Ireland. Social research monograph based on questionnaire interviews of deserted married women in dublin to determine the reasons

for marriage breakdown and conflict - covers demographic aspects such as social status, educational level, age at marriage, etc., attitudes and communication levels, the effects of children on the marriage, legal aspects, sociological aspects, etc. Bibliography pp. 181 to 183, and statistical tables.

Martine Syms: Shame Space Cima

Rooted in strategic management research, Business Model Innovation explores the concepts, tools, and techniques that enable organizations to gain and/or maintain a competitive advantage in the face of technological innovation, globalization, and an increasingly knowledge-intensive economy. Updated with all-new cases, this second edition of the must-have for those looking to grasp the fundamentals of business model innovation, explores the novel ways in which an organization can generate, deliver, and monetize benefits to customers.

Cambridge International Certificate in Financial English (Icfe) World Bank Publications

The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful pr é cis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on ‘ hot topics ’ not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.

Introducing Accounting for As Emerald Group Publishing

Despite the spread of automation and new supply chain management paradigms, logistics remains dependent on a rather specific set of skills and competencies, whether for managerial, administrative, or blue-collar jobs, such as trucking or warehousing. This dependence implies that the logistical performance of businesses, industries, and nation states is strongly influenced by the quantity and quality of the workforce. Insufficient resources of a competent and properly trained workforce in logistics adversely affect the quality of service, reduce productivity in sectors dependent on logistics, and ultimately reduce trade competitiveness. While other interventions that affect logistics performance—such as international infrastructures, trade corridors, regulations, and services—have already been reviewed extensively, this report is the first to cover the contributions of human resources and explore how to develop skills and improve competencies, especially in developing countries. The study proposes a framework for the skills needed according to the logistics activity (such as transportation or warehousing) or the type and level of responsibility. Based on several sources, including recent surveys carried out by the World Bank and the K ü hne Logistics University, the report uncovers where the skills constraints are according to the type of job or countries. Findings include that logistics is an industry struggling to hire skilled workers, although with differences between developed countries (where trucker shortages are more acute) and developing economies (where managerial shortages are more widespread). Typically, blue-collar logistics jobs have lower status and lower pay than blue-collar jobs in other industries; they are thus less attractive for skilled workers. In developing countries with a potentially available workforce, lack of vocational preparation for careers in logistics means that less-skilled workers are not easily re-skilled. Logistics tasks at the upper end of the occupational hierarchy and those with high information technology content often require an upskilling of employees to keep pace with new technology. Yet the problem is not confined to recruitment. The surveys point to limited resources, money, and staff time allocated to training, especially in developing countries. Realizing the promise of quality jobs from the growth of logistics worldwide requires a coordinated effort by logistics companies, professional associations, training providers, and policy makers. Through a combination of facilitation, regulation, advice, financial instruments, and land use planning, governments can exert significant influence.

Business Model Innovation John Wiley & Sons

Diaries of an avatar: a Bible-style artist's book of writings by Martine Syms A new artist's book by California-based artist Martine Syms (born 1988), Shame Space explores the possibilities of narrative and identity, collecting journal writings by the artist from 2015 to 2017 in which she attempts to capture her shadow self, alongside image stills from the video project Ugly Plymouths. The text entries form the voiceover of Mythiccbeing (pronounced "my thick being"), a "black, upwardly mobile, violent, solipsistic, sociopathic, gender-neutral femme" digital avatar who has iterated across several of Syms' recent exhibitions. In Syms' installations, Mythiccbeing manifests variously in video, audio and as an interactive chatbot that responds to the viewer's communications with messages and animations. In Shame Space, the character's autofictional, diaristic commentary is gathered into 15 chapters. Its design updates the Bible format with its A5 size, embossed leather-textured cover and silver edge painting. The Ugly Plymouths still-image selection was coded using a programming script, such that the design, like the chatbot's SMS responses, is an exercise in machine automation.

Land Reform and Economic Development Llewellyn Worldwide

This irreverent guide to chaos magic emphasizes experimentation and finding out what works best for you. Andrieh Vitimus presents a revolutionary hands-on course of study for the average Jane or Joe. Vitimus banishes the severe tone of other esoteric orders, offering an accessible and practical approach that makes it easier to perform successful chaos magic that is uniquely your own. Hands-On Chaos Magic is just what it says, and the next best thing to working with the master himself."--Lon Milo DuQuette, author of The Magick of Aleister Crowley, Homemade Magick, and Low Magick "A must-have for any magician."-- Taylor Ellwood, author of Multi-Media Magic "Written with intelligence, experience, and a genuine desire to empower readers."--Raven Digitalis, author of Shadow Magick Compendium "A usable introduction to the concepts and practical techniques of chaos magic."--Donald Michael Kraig, author of Modern Magick "A well-considered and thorough contribution to the chaos magic current."--Dave Lee, author of Chaotopia

The Corporate Governance of Listed Companies Springer

This report documents Sri Lanka's financial management systems covering budgeting, funds flow, accounting and reporting, and auditing systems. It provides insights into Sri Lanka's internal control systems, staffing resource capacity, and information technology structure. The intent is to give project teams and consultants a better understanding of the country's financial management systems to improve project preparation. Find out how high-quality financial management assessments support projects by identifying key risks and enabling the implementation of appropriate actions and reforms to mitigate those risks.

International Convergence of Capital Measurement and Capital Standards Lulu.com

Every industrialized country is concerned with maintaining an adequate supply of individuals interested in careers in science and technology, yet little is known about these efforts outside national borders. This book represents the proceedings of an international conference on Trends in Science and Technology Careers, held in Brussels in 1993. Organized at the behest of OSEP and the OIA Committee on International Organizations and Programs, in cooperation with the European Commission (DG XII) and in response to a resolution of the International Council of Scientific Unions, the conference identified international data on career trends, assessed the research base engaged in studying science and technology careers, and identified ways in which international organizations could promote greater interest in science and technology human resource development. The conference laid the groundwork for continuing international discussions about the best ways to study and promote careers in science and technology and national dialogues about the ways to integrate this knowledge into human resources policies.

Public Financial Management Systems—Sri LankaPrimary Information

"Each iteration of Made in L.A. sheds new light on the creative work of artists based in Los Angeles, expanding on the work of its predecessors and forging new relationships with the city's diverse artistic communities. 'Made in L.A. 2016: a, the, though, only' continues in this vein and investigates what is vital and distinctive about Los Angeles as an international destination and cutting-edge art center and how its artists--from vastly different backgrounds and disciplines--resist and defy categorization"--Foreword.

Diagnostic Study of Accounting and Auditing Practices in the Marshall Islands

The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the “ 2030 Agenda for Sustainable Development ” . On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. It encompasses 17 volumes, each devoted to one of the 17 SDGs. This volume addresses SDG 2, namely "End hunger, achieve food security and improved nutrition and promote sustainable agriculture" and contains the description of a range of related terms, to allow for a better understanding and foster knowledge. Our planet produces enough food to feed everyone. Malnutrition and hunger are the result of inappropriate food production processes, bad governance and injustice. SDG 2 seeks to guarantee quality and nutritious food to ensure healthy life by adopting a holistic approach that involves various actions targeting different actors, technologies, policies and programs. These initiatives have to face challenges coming from extensive environmental degradation, loss of biodiversity and the interrelated effects of climate change. Concretely, the defined targets are: End hunger and ensure access by all people, in particular the poor and people in vulnerable situations, including infants, to safe, nutritious and sufficient food all year round End all forms of malnutrition, including achieving the internationally agreed targets on stunting and wasting in children under 5 years of age, and address the nutritional needs of adolescent girls, pregnant and lactating women and older persons Double the agricultural productivity and incomes of small-scale food producers, in particular women, indigenous peoples, family farmers, pastoralists and fishers, including through secure and equal access to land, other productive resources and inputs, knowledge, financial services, markets and opportunities for value addition and non-farm employment Ensure sustainable food production systems and implement resilient agricultural practices that increase productivity and production, that help maintain ecosystems, that strengthen capacity for adaptation to climate change, extreme weather, drought, flooding and other disasters and that progressively improve land and soil quality Maintain the genetic diversity of seeds, cultivated plants and farmed and domesticated animals and their related wild species, including through soundly managed and diversified seed and plant banks at the national, regional and international levels, and promote access to and fair and equitable sharing of benefits arising from the utilization of genetic resources and associated traditional knowledge, as internationally agreed Increase investment, including through enhanced international cooperation, in rural infrastructure, agricultural research and extension services, technology development and plant and livestock gene banks in order to enhance agricultural productive capacity in developing countries, in particular least developed countries Correct and prevent trade restrictions and distortions in world agricultural markets, including through the parallel elimination of all forms of agricultural export subsidies and all export measures with equivalent effect, in accordance with

the mandate of the Doha Development Round Adopt measures to ensure the proper functioning of food commodity markets and their derivatives and facilitate timely access to market information, including on food reserves, in order to help limit extreme food price volatility Editorial Board Datu Buyung Agusdinata, Mohammad Sadegh Allahyari, Usama Awan, Nerise Johnson, Paschal Arsein Mugabe, Vincent Onguso Oeba, Tony Wall/div
