International Standard Banking Practice (ISBP) for the examination of documents under

documentary credits, answers the most relevant questions practitioners have concerning how

UCP 500, ICC's universally used rules on documentary credits, are to be integrated into day-to-

day practice. The product of more than two years of work by the ICC Banking Commission, ISBP

is based on the official Opinions issued by the Banking Commission in response to

queries submitted by users of UCP 500. The text provides responses to the key questions

relating to the examination of drafts, multimodal transport documents, insurance documents,

certificates of origin and a range of other documents associated with letters of credit. This

publication reflects international standard banking practice for all parties to a documentary

credit. Figures show that 60%-70% of credits are rejected for discrepancies on first

presentation. The new ISBP, by encouraging a uniformity of practice worldwide, is expected to

cut these figures dramatically and, by doing so, to facilitate the flow of world trade.

*Color Management* serves as a comprehensive guide to the implementation of the ICC (International Color Consortium) profile specification, widely used for maintaining color fidelity across multi-media imaging devices and software. The book draws together many of the White Papers produced by the ICC to promote the use of color management and disseminate good practice; the ICC specification has become widely accepted within the color industry, and these papers have been updated, expanded and edited for this collection. Other chapters comprise material that will go on to form future ICC White Papers, as well as some original content. The ICC review process ensures that the material and recommendations included are collaborative, reflecting the input of the wide community of color and imaging scientists and developers who make up its membership. Readers can be assured of the best advice for achieving optimum results. Provides an overview of color management in applications and the role of ICC profiles in a color reproduction system. Presents user guidelines on color measurement procedures and discusses measurement issues for media such as optically-brightened papers and inkjet prints. Offers comprehensive guidance on the latest version of the specification and the application of the perceptual rendering intent with its reference gamut. Examines the construction and benefits of different types of ICC profiles, and sets out compliance test considerations, implementation notes and evaluation of profile quality. Includes a glossary of terms. This book is written for color and imaging scientists developing, implementing and using color management systems within a range of imaging devices and software. Senior undergraduate and postgraduate students will also find the book of use.
