This text presents a comprehensive overview of the psychopathological disorders of childhood and adolescence from a brain-based perspective. Based upon the highly respected Handbook of Pediatric Neuropsychology, this text covers all of the major pediatric disorders described in the DSM-IV-TR, while also offering hard-to-find coverage of childhood cognitive disorders that have not been addressed sufficiently in the DSM and other child psychopathology texts. Each chapter includes the etiology of each disorder (including genetics), its prevalence, clinical presentation, assessment considerations, and evidence-based treatments. Additionally, the volume features all-new material on neuroimaging in diagnosis and a

comprehensive, real-life case study for each disorder to enhance student and clinician understanding. Designed for graduate-level courses in child and adolescent psychopathology, this affordable text will also be a convenient resource for clinicians. Key Features: Presents a current, comprehensive overview of psychopathological disorders of childhood and adolescence from a brain-based perspective Includes cognitive disorders in children not well-covered in the DSM and other texts, including traumatic brain injury, seizures, pediatric HIV and other infectious conditions, fetal alcohol spectrum disorders, and perinatal-related complications Provides comprehensive case studies in each chapter, giving students a real-world understanding of assessment and diagnosis Addresses proposed changes to be included in the DSM-V Covers all-new material on neuroimaging in diagnosis

"In this profoundly moving memoir, Owita teaches Wall how to find grace amid heartbreak and to accept that beauty exists because it is fleeting—as in her garden, as in life." —People, 4 stars "A perfect spring awakening." —Good Housekeeping A true story of a unique friendship between two people who had nothing—and ultimately everything—in common. Carol Wall, a white woman living in a lily-white neighborhood in Middle America, was at a crossroads in her life. Her children were grown; she had

successfully overcome illness; her beloved parents were getting older. One day she notices a dark-skinned African man tending her neighbor's yard. His name is Giles Owita. He bags groceries at the supermarket. He comes from Kenya. And he's very good at gardening. Before long Giles is transforming not only Carol's yard, but her life. Though they are seemingly quite different, a caring bond grows between them. But they both hold long-buried secrets that, when revealed, will cement their friendship forever.

She's on the sheriff's most wanted list. Waking up with a naked woman holding a knife at his throat is just about the last thing Sheriff Travis Flynn expected. And the brother she's looking for? A murderer. And dead. Probably. But the real shock comes when she insists she's not a Lycan. LeAnn Wilcox isn't looking for love...especially not from some wolf in sheriff's clothing. She operates on the other side of the law. Once she finds her brother-alive-she'll get out of the pack's territory and go back to her regular, normal, non-furry life of changing jobs and her name whenever her past closes in. The cool, logical Sheriff has finally met his match, but LeAnn's life is at stake if she won't claim her place in the pack, especially once his control over the pack is challenged and her brother's fate is questioned.

Oral History for the Qualitative Researcher John Benjamins Publishing

Concepts from Tensor Analysis and Differential Geometry discusses coordinate manifolds, scalars, vectors, and tensors. The book explains some interesting formal properties of a skew-symmetric tensor and the curl of a vector in a coordinate manifold of three dimensions. It also explains Riemann spaces, affinely connected spaces, normal coordinates, and the general theory of extension. The book explores differential invariants, transformation groups, Euclidean metric space, and the Frenet formulae. The text describes curves in space, surfaces in space, mixed surfaces, space tensors, including the formulae of Gauss and Weingarten. It presents the equations of two

scalars  $K$  and  $Q$  which can be defined over a regular surface  $S$  in a three dimensional Riemannian space  $R$ . In the equation, the scalar  $K$ , which is an intrinsic differential invariant of the surface  $S$ , is known as the total or Gaussian curvature and the scalar  $U$  is the mean curvature of the surface. The book also tackles families of parallel surfaces, developable surfaces, asymptotic lines, and orthogonal ennuples. The text is intended for a one-semester course for graduate students of pure mathematics, of applied mathematics covering subjects such as the theory of relativity, fluid mechanics, elasticity, and plasticity theory.

This book unites research in philosophy and cognitive science with cultural history to re-examine memory in early modern religious practices. Offering an ecological approach to memory and culture, it argues that models derived from Extended Mind and Distributed Cognition can bridge the gap between individual and social models of memory.

Designing Integrated Industrial Policies Volume II World Scientific  
Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of "kissing" to describe the growing intimacy between architecture and new types of art--particularly multimedia installations that take place in and on the surfaces of buildings--and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. Kissing Architecture is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, Kissing Architecture is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation.

Oral history is a particularly useful way to capture ordinary people's lived experiences. This innovative book introduces the full array of oral history research methods and invites students and qualitative researchers to try them out in their own work. Using choreography as an organizing metaphor, the author presents creative strategies for collecting,

representing, analyzing, and interpreting oral history data. Instructive exercises and activities help readers develop specific skills, such as nonparticipant observation, interviewing, and writing, with a special section on creating found data poems from interview transcripts. Also covered are uses of journals, court transcripts, and other documents; Internet resources, such as social networking sites; and photography and video. Emphasizing a social justice perspective, the book includes excerpts of oral histories from 9/11 and Hurricane Katrina, among other detailed case examples.

How should teacher librarians or instructional leaders engage in action research to improve their school library and benefit students' learning? This book provides the answers. Teacher librarians need to get directly involved with the research process in the learning commons in order to create actions and strategies that will enhance student learning—and benefit their own professional development as well as demonstrate accountability through their action research efforts. This book provides practical tips and work spaces for educators at the local, state, and national levels, clearly modeling and explaining the process and the tools for conducting action research in a school library setting that will identify the program's strengths and weaknesses. The author coalesces current expert opinions on the topic of action research in the school library environment and highlighting what other teacher librarians in the field have identified as the pros and cons of using the process. Readers are directed to focus on mitigating the "cons" through the use of specific working pages and templates and by initially exploring "five favorite" links, thereby encouraging those who are new to action research to try what might otherwise seem a daunting process. School principals K – 12 who read this book will be better equipped to support their teacher librarians and teachers in this important professional process. Supplies invaluable insights from experts and practitioners on the subject of action research Provides a clear model of the process in
