American foreign policy since 1947 cannot be understood apart from the U.S. security assistance program.

Beginning with Truman, every president has considered security assistance programs important means for furthering U.S. national interests. Security assistance has been used to support a wide variety of policies, including the Truman Doctrine and containment, the underwriting of the Camp

David Accords, and the channeling of aid to the newly democratic countries of Central and Eastern Europe.

American foreign policy since 1947 cannot be understood apart from the U.S. security assistance program.

Beginning with Truman, every president has considered security assistance programs important means for furthering U.S. national interests. Security assistance has been used to support a wide variety of policies, including the Truman Doctrine and containment, the underwriting of the Camp David Accords, and the channeling of aid to the newly democratic countries of Central and Eastern Europe. This book provides a comprehensive treatment

of the program from 1947 through fiscal year 1996. After discussing the legal foundations and components of the program, the authors provide an historical survey from 1947 through the first Clinton administration. They then detail the role of Congress, public opinion, and interest groups. Separate treatment is given to countries such as Israel, Egypt, Greece, and Turkey. The authors also suggest ideas on how the programs can be changed to mesh with American objectives and resources in the 21st century. This is a major study of interest to students, scholars, researchers, and policymakers.

Commission on the Organization of the Government for the Conduct of Foreign Policy: Appendices A-C Simon & Schuster

Integrating case studies and conceptual material to give students an historical perspective of US foreign policy, this work

develops an understanding of the mechanics of the foreign policy process. Congress, the Executive, and Foreign Policy Wadsworth This foreign policy analysis textbook is written especially for students studying to become national security professionals. It translates academic knowledge about the complex influences on American foreign policymaking into an intuitive, cohesive, and practical set of analytic tools. The focus here is not theory for the sake of theory, but rather to translate theory into practice. Classic paradigms are adapted to fit the changing realities of the contemporary national security environment. For example, the growing centrality of the White House is seen in the 'palace politics' of the president's inner circle, and the growth of the national security apparatus introduces new dimensions to organizational processes and subordinate levels of bureaucratic politics. Real-world case studies are used throughout to allow students to apply theory. These comprise recent events

that draw impartially across partisan lines and encompass a variety of diplomatic, military, and economic and trade issues.

Diplomacy and Crisis Management in the Balkans
Springer

The United States' foreign assistance program has become an instrument of declining efficacy in foreign policy. The ebbing of Soviet-American competition offers an occasion to restructure U.S. foreign policy objectives and modernize those instruments most likely to support the execution of new foreign policy objectives. This book sets out to identify new approaches to the management of resources in the foreign assistance program that would permit the flexible manipulation of these resources to cope with the fast-breaking pace of

international affairs. This work challenges the generally accepted view of contemporary political realities by explicating the historical roots of the current foreign assistance program and identifying a new approach to foreign assistance through changes in resource management statutory authorities and procedures. It will be of interest to professionals and scholars in foreign affairs, foreign policy, and international relations.

Proceedings form a forum which provided a collegial forum for a small and select

group of foreign policy and regional experts to formulate and recommend new directions for American foreign policy for each of the major regions of the world.

With a new American administration in office, this is an opportune time to assess American foreign policy and to set future directions: 1. What challenges and opportunities will the United States, and its allies and friends, face in the future? 2. What changes should be made to all elements of U.S. foreign policy, including the diplomatic, economic, military, and informational elements? 3. What elements should continue? 4. What are the varying perspectives of nations within the region concerning U.S. foreign policy? 5. What changes in U.S. foreign policy would

they desire? 6. Overall, what new directions for U.S. foreign policy will better support the interests and objectives of the United States, its allies, and its friends? A total of thirty-three foreign policy and regional experts participated in the workshop. Seventeen panelists presented papers on seven panels: A Global Perspective, Western Hemisphere, Asia and the Pacific, South Asia, The Greater Middle East, Europe and Russia, and Africa. Policymakers, members of government and governmental committees and agencies, and students and members of the general public interested in American foreign policy will be interested in this publication. Since the fall of the Berlin Wall, observers and players of American foreign policy have been wrestling with what US policy is and, more importantly, what it should be in the post-Cold War era. The breakdown of communism in the East has coincided with the outbreak of warfare in the former Yugoslavia to add a new sense of urgency for those seeking a direction for US foreign policy. This work seeks to demonstrate how reactive rather than proactive measures by the US, in both democracy promotion and in crisis management have been short-sighted, resulting in the present failure.
