Investigating earth systems Oswaal Books and Learning Private Limited This is the first book developed specifically for the Final FFICM structured oral examination. It is written by two senior trainees who have recently passed the exam and is edited by a consultant intensivist with a special interest in education. The book is designed in the style of the SOE, and provides model answers which include summaries of the relevant evidence to guide trainees in their preparation for the exam. The 91 topics and questions therein are drawn from previous

exam sittings, and are expanded further to ensure each topic is covered in detail. This text is a valuable revision aid to those studying for the Final FFICM, and will also prove useful to trainees revising for the Final FRCA, as it covers popular ICM topics that often come up in the anaesthetic fellowship exams.

Quantile regression has emerged as an essential statistical tool of contemporary empirical economics and biostatistics. Complementing classical least squares regression methods which are designed to estimate conditional mean models, quantile regression provides an ensemble of techniques for estimating families of conditional quantile models, thus offering a more complete view of the stochastic relationship among variables. This volume

collects 12 outstanding empirical contributions in economics and offers an indispensable introduction to interpretation, implementation, and inference aspects of quantile regression. *Oswaal JEE (Mains) Solved Papers + JEE Main Mock Test 15 Sample Question Papers (Set of 4 Books) Physics, Chemistry, Mathematics (For 2022 Exam)* CRC Press

The critical care unit manages patients with a vast range of disease and injuries affecting every organ system. The unit can initially be a daunting environment, with complex monitoring equipment producing large volumes of clinical data. Core Topics in Critical Care Medicine is a practical, comprehensive, introductory-level text for any clinician in their first few months in the critical care unit. It guides clinicians in both the initial assessment and the clinical

management of all CCU patients, demystifying the critical care unit and providing key knowledge in a concise and accessible manner. The full spectrum of disorders likely to be encountered in critical care are discussed, with additional chapters on transfer and admission, imaging in the CCU, structure and organisation of the unit, and ethical and legal issues. Written by Critical Care experts, *Core Topics in Critical Care Medicine* provides comprehensive, concise and easily accessible information for all trainees.

Questions for the Final FFICM Structured Oral Examination
Pearson Education South Asia

Any study of communication must take into account the nature and role of speech acts in a broad context. This book addresses questions such as: - What do we mean? - How do we say it? and - How is it understood? in the broad context of universal, socio-cultural and psychological issues that bear on human communication. It presents an overview of

current issues in speech act theory that are at the center of human and social sciences dealing with language, thought and action, building on John Searle's famous article 'How Performatives Work' (included in this book). The contributions by linguists, psychologists, computer scientists, and philosophers thus address issues of communication that are crucial in conversation analysis, cognitive science, artificial intelligence, psychology and philosophy, and a general understanding of how we communicate. The book is suitable for courses with an extensive bibliography for further reading and an Index.
