Handbook of Intercultural Training, Volume II: Issues in Training Methodology is a major attempt to describe, critique, and summarize the major known ways to provide cross-cultural training. The collection of essays discusses the stresses of intercultural encounter, as well as how to reduce these. This volume is divided in two parts. The first part discusses context factors, including stress factors in intercultural relations and aspects of organization effectiveness. A cross-cultural experience from the perspective of a program manager is presented, as well as a situational analysis and designing a translator-based training program where alternative designs are forwarded for trainers to use effectively in multicultural and multilingual environments. The second part presents different methods of training. Learning from sojourners and from individuals from various cultures results in different frameworks for interpreting cross-cultural interactions. Consultants, advisors, and experts may find themselves performing outside and beyond their home ground and social groups, so training programs pertaining to their particular situation need to be addressed more profoundly. The training program in race relations by the U.S. Department of Defense is reviewed, and the effects of stereotyping people are discussed and considered as other factors in the preparation of training programs. English is then examined as a tool for intercultural communication, where aspects of intercultural training should be integrated. This book is suitable for overseas workers, foreign students, foreign technical advisers, diplomats, immigrants, and many others who are going to live and work and be exposed to other cultures.

A wide variety of professionals find themselves intimately involved in the criminal justice system; firefighters, emergency medical providers, nurses, physicians, public health personnel, environmental

professionals, public works personnel, and many others. No previous work has attempted to address the criminal justice system in terms relevant to these professionals. **Interface: A Guide for Professionals Supporting the Criminal Justice System** explains the system, provides the reader with guidance to documenting incidents so that the data is both of value to the professional in the future and for use by the other components of the system. Further, this volume presents evidence from the aspect of these professionals, their needs in handling evidence, and basics of collection and preservation for those instances where it falls to them to do so. Professionals, not familiar with safety issues outside of their fields of expertise, have been injured or died as a result of exposure to hazards; it also educates them to considerations for their safety when out of their area of comfort. In addition, this book considers the role of the professional as interviewer, and provides basic guidance to this often valuable skill. Finally, **Interface** attempts to make the professional knowledgeable and comfortable in the courts, especially on the stand, where the professional may appear as a witness or even as an expert.
