My Revision Notes: Pearson Edexcel A Level Design and Technology (Product Design) Hodder Education

This Student Book provides a grammar-led approach with extensive exam preparation to develop independent, culturally aware students of German, ready for the exam. This book is endorsed by Cambridge International Examinations for the latest IGCSE® (0525) and International Level 1/Level 2 Certificate (0677) syllabuses. Extensive use of German reflects the style of the exams and, with specific advice and practice, it helps students use the acquired skills to their best ability. Topics on German-speaking cultures are integrated throughout to ensure students gain the cultural awareness that is at the heart of this qualification. - Develop students' ability to use German effectively - Stretch and challenge students to achieve their best grades - Ensure the progression required for further study at A-level or equivalent - Provide insight and encourage a positive attitude towards other cultures The book provides up-to-date content following a clear sequencing of topics designed specifically for teaching German at this level. It is designed to develop spontaneous, confident linguists who are able to progress to further study of German. - Teacher Resource + Audio-CDs (ISBN 9781471833076) includes all recordings and transcripts together with detailed guidance, editable vocabulary lists, cultural PowerPoints and interactive quizzes - Grammar Workbook (ISBN 9781471833182) Vocabulary is also available online at Vocab Express, an interactive learning application Visit www.vocabexpress.co.uk/hodder for more information.

Foundation 2 contains everything you need to deliver effective lessons in mathematics with confidence for students working at Grades G to C. Fully matched to Edexcel's new GCSE Maths Modular specification, these teacher resources offer well-differentiated lesson plans and additional support.

Hodder Murray

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-

development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.
