Conferences Limited With the progression of technological breakthroughs creating dependencies on telecommunications, the internet, and social networks connecting our society, CIIP (Critical Information Infrastructure Protection) has gained significant focus in order to avoid cyber attacks, cyber hazards, and a general breakdown of services. Critical Information Infrastructure Protection and Resilience in the ICT Sector brings together a variety of empirical research on the resilience in the ICT sector and critical information infrastructure protection in the context of uncertainty

and lack of data about potential threats and hazards. This book presents a variety of perspectives on computer science, economy, risk analysis, and social sciences; beneficial to academia, governments, and other organisations engaged or interested in CIIP, Resilience and Emergency Preparedness in the ICT sector.

In some hands, history can be an inspirational and rewarding subject, yet in others it can seem dry and of little relevance.

The aim of this textbook is to enable student teachers to learn to teach history in a way that pupils will find interesting, enjoyable and purposeful. It incorporates a wide range of ideas about the teaching of history with practical suggestions for classroom practice. This is the third edition of a textbook that has established itself as the leading text for student teachers of history. It has been thoroughly updated, with a revised chapter

on the use of ICT in history teaching and major new sections in the areas of inclusion, resources, assessment and professional development. It provides an array of references and materials that give a sound theoretical foundation for the teaching of history, including weblinks to further resources. A range of tasks enable students to put their learning into practice in the classroom. The

book also provides reference and access to a wide range of recent and relevant research in the field of history education, which will be of use to student teachers pursuing courses that have a Masters Level component. In all, it is an invaluable resource for student and beginning history teachers.
