Mesmerizing sci-fi
from the author the
Denver Post calls
"one of the

literary giants of science fiction." The melancholy memoir of Alden Dennis Weer, an embittered old man living in a small midwestern town, reveals a miraculous dimension. For Weer's imagination has the power to obliterate time and reshape reality, transcending even death itself. The Psychology of Teen

Violence and Victimization OUP Oxford
Making Belfield is the first book to examine the unique architecture of Ireland's largest university. This book--featuring rare and unseen illustration and photographs--challenges the often-limited conception of University College Dublin's architectural landscape. It is an exploration and celebration of the misunderstood and lesser known gems across campus, and will be published to coincide with the 50 year anniversary of the UCD Belfield campus. A Single Shard Scholastic Inc.

This Handbook offers a multiform sweep of theoretical, historical, practical and personal glimpses into a landscape roughly characterised as contemporary Irish theatre and performance. Bringing together a spectrum of voices and sensibilities in each of its four sections — Histories, Close-ups, Interfaces, and Reflections — it casts its gaze back across the past sixty years or so to recall, analyse, and assess the recent legacy of theatre and

performance on this island. While offering information, overviews and reflections of current thought across its chapters, this book will serve most handily as food for thought and a springboard for curiosity. Offering something different in its mix of themes and perspectives, so that previously unexamined surfaces might come to light individually and in conjunction with other essays, it is a wide-ranging and indispensable

resource in Irish theatre studies. The Life of Christina Markyate Routledge In recent years, the fabrication of nanomaterials and exploration of their properties have attracted the attention of various scientific disciplines such as biology, physics, chemistry, and engineering. Although nanoparticulate systems are of significant interest in various scientific and technological areas, there

is little known about the safety of these nanoscale objects. It has now been established that the surfaces of nanoparticles are immediately covered by biomolecules (e.g. proteins, ions, and enzymes) upon their entrance into a biological medium. This interaction with the biological medium modulates the surface of the nanoparticles, conferring a “biological identity” to their surfaces (referred to as a “corona”), which

determines the subsequent comprehensive cellular/tissue responses. The new interface between the nanoparticles and the biological medium/proteins, called "bio-nano interface," has been very rarely studied in detail to date, though the interest in this topic is rapidly growing. In this book, the importance of the physiochemical characteristics of nanoparticles for the properties of the protein corona is discussed in detail, followed by

descriptions of the methods for assessing the protein-nanoparticle interactions. The advantages and limitations of available corona evaluation methods (e.g. spectroscopy methods, mass spectrometry, nuclear magnetic resonance, electron microscopy, X-ray crystallography, and differential centrifugal sedimentation) are examined in detail, followed by a discussion of

the possibilities for enhancing the current methods and a call for new techniques. Moreover, the advantages and disadvantages of protein-nanoparticle interaction phenomena are explored and discussed, with a focus on the biological impacts. **The Legacy of Ireland's Economic Expansion** Bloomsbury Publishing Banks are usually better informed on the loans they originate than other financial intermediaries. As a result,

securitized loans might be of lower credit quality than otherwise similar nonsecuritized loans. We assess the effect of securitization activity on loans' relative credit quality employing a uniquely detailed dataset from the euro-denominated syndicated loan market. We find that, at issuance, banks do not seem to select and securitize loans of lower credit quality. Following securitization, however, the credit quality of borrowers whose loans are securitized deteriorates by more than those in the control group. We find

tentative evidence suggesting that poorer performance by securitized loans might be linked to banks' reduced monitoring incentives.

Narrative and Genre Open Road Media

Those aren't stars, darling That's your nervous system Nanna didn't take you to planetariums like this --from "Hyper-Berceuse: 3 A.M." August Kleinzahler's new poems stretch and go places he has never gone before: they have his signature high color and rhythmic jump, but they take on a breadth of voice and achieve registers that his earlier work only hinted at. Ranging from Vegas and Mayfair to the Asian steppes and

contemporary Berlin, these poems touch down at will in tableaux where Liberace unceremoniously meets with St. Kevin and Attila with Zsa Zsa Gabor. Surprise after surprise, nothing seems to lie outside Kleinzahler's purview. This is the strongest collection to date from a poet with "the vision and confident skill to make American poetry new" (Clive Wilmer, *The Times* [London]).

Protein-Nanoparticle Interactions Springer

Enjoying a successful career at the side of a destructive friend who helped him escape bullies in childhood, Ian fears for his life when his friend becomes irrationally

angry about Ian's new relationship. By the New York Times best-selling author of Beautiful Lies and In the Blood.

Fanny Hensel Greenwood Ann Martin's phenomenal Newbery Honor book, now in paperback The summer Hattie turns 12, her predictable smalltown life is turned on end when her uncle Adam returns home for the first time in over ten years. Hattie has never met him, never known about him. He's been institutionalized; his

condition involves schizophrenia and autism. Hattie, a shy girl who prefers the company of adults, takes immediately to her excitable uncle, even when the rest of the family -- her parents and grandparents -- have trouble dealing with his intense way of seeing the world. And Adam, too, sees that Hattie is special, that her quiet, shy ways are not a disability, Encyclopedia of Hip Hop Literature Philip Wilson Publishers

This book summarizes our current knowledge of MDS,

from very basic aspects to the clinical management. It provides guidance to the diagnosis, an understanding of disease mechanisms, and a discussion of treatment strategies.

Wish Her Safe At Home

Oxford University Press
We live in a noisy world! In all applications (telecommunications, hands-free communications, recording, human-machine interfaces, etc) that require at least one microphone, the signal of interest is usually contaminated by noise and

reverberation. As a result, the microphone signal has to be "cleaned" with digital signal processing tools before it is played out, transmitted, or stored. This book is about speech enhancement. Different well-known and state-of-the-art methods for noise reduction, with one or multiple microphones, are discussed. By speech enhancement, we mean not only noise reduction but also dereverberation and separation of independent signals. These topics are also covered in this book.

However, the general emphasis is on noise reduction because of the large number of applications that can benefit from this technology. The goal of this book is to provide a strong reference for researchers, engineers, and graduate students who are interested in the problem of signal and speech enhancement. To do so, we invited well-known experts to contribute chapters covering the state of the art in this focused field. [The Strange Hours Travelers](#) [Keep Hassell Street Press](#)

Art is continuously subjected to insidious forms of censorship. This may be by the Church to guard against moral degeneration, by the State to promote a specific political agenda or by the art market, to elevate one artist above another. Now, and in the last century, artwork that touches on ethnic, religious, sexual, national or institutional sensitivities is liable to be destroyed or hidden away, ignored or side-lined. Drawing from new research into historical and contemporary case-studies, [Censoring Art: Silencing the Artwork](#) provides

diverse ways of understanding the purpose and mechanisms of art censorship across distinct geopolitical and cultural contexts from Iran, Japan, and Uzbekistan to Britain, Ireland, Canada, Macedonia, Soviet Russia, and Cyprus. Its contributions uncover the impact of this silent control of the production and exhibition of art and consider how censorship has affected art practice and public perceptions of artworks.

Speech Enhancement

Springer Nature

The narrator of Hogg is a Huck Finn–like youngster

caught in society’s most sinister seams—but unlike Huck, he passes no moral judgments on the violence he takes part in . . . Hogg is the story of a man—a depraved trucker named Franklin Hargus, whom the people he works for call Hogg—and of the nameless boy who tells the story of three days of unspeakable sexual violence and devastation, which, together, they initiate in a small seaside American city in the middle of the last century. Hogg is a towering brute who makes his living as

a rapist for hire. By the end of a series of vicious attacks, kidnappings, and mass murders, the reader will wonder who is more corrupt: the man or the boy. Samuel R. Delany completed his first draft of Hogg within a day, if not within hours, of the 1969 Stonewall Riots in New York City and revised it over the next four years, though it was not released until 1995. The Florist’s Daughter John Wiley & Sons This New York Times Notable memoir of a middle-class, middle-America family is a “beautiful bouquet of a book”

(Entertainment Weekly). They say “a daughter is a daughter all her life,” and no statement could be truer for Patricia Hampl. Born to a Czech father—an artistic florist—and a wary Irish mother, Hampl experienced a childhood in St. Paul, Minnesota, that couldn’t have been more normal, the perfect example of a twentieth century middle-class, middle-American upbringing. But as she faces the death of her mother, Hampl reflects on the struggles her parents went through to provide that normal, boring existence, and her own struggles with fulfilling the role of dutiful daughter as she grew through the postwar years to the turbulent sixties and couldn’t help wanting

to rebel against the notion of a “relentlessly modest life.” Named a Chicago Tribune Best Book of the Year, *The Florist’s Daughter* is Hampl’s most extraordinary work to date—a “quietly stunning” reminiscence of a Midwestern girlhood, and a reflection on what it means to be a daughter (People).

A NEW

PSYCHOLOGICAL
SUSPENSE NOVEL FROM

THE AUTHOR OF

IDENTITY X I was

thoroughly intrigued, and
could not give it anything

less than five stars for the dark, aura of doom you created and sustained throughout the tale. It was truly suspenseful. Early reviewer Plagued with strange memory gaps, Charlotte wants her life back, even if someone has to die for her to get it. She has tried so hard to be what Gregory wanted her to be, and yet still he doesn't love her. Pregnant, miserable, and knowing she is being betrayed by the one person she had left to rely on, she promises herself that she will do whatever it takes. She

must learn the truth about what happened before that day on the lake, but lies can be seductive and easier to believe, especially when they are her own.

Identity X ABC-CLIO

This compilation of original essays does more than just illuminate the serious problem of teen violence and victimization; it also provides resources that parents and teachers can use to address issues of violence with their teens and make a difference.

Independent Component

Analysis Columba Press (IE)

This beautifully illustrated book documents the life and work of David Milne (1882-1953), one of

Canada's greatest modern painters whose vast body of work shows him to be an artist of true originality and vision. Like the members of the Group of Seven, Milne primarily chose landscape as his subject matter. However, his true subject was the process of perception and representation, reducing his painting to its essentials and infusing it with his own distinctive modern sensibility. The book presents an account of one man's spiritual and emotional voyage into modernity - from the bustling sidewalks of New York to the war-torn landscapes of northern France and back to rural Canada. With more than one hundred works in oil and watercolour, this publication

provides an appreciation of one of Canada's most sophisticated modern painters.

Peace CreateSpace

Howard Zinn's cogent defense of civil disobedience with a new introduction by the author. In this slim volume, Zinn lays out a clear and dynamic case for civil disobedience and protest, and challenges the dominant arguments against forms of protest that challenge the status quo. Zinn explores the politics of direct action, nonviolent civil disobedience, and strikes, and draws lessons for today.

Myelodysplastic Syndromes
Routledge

Any life story, whether a written autobiography or an

oral testimony, is shaped not only by the reworkings of experience through memory and re-evaluation, but also art. Any communication has to use shared conventions not only of language itself but also the more complex expectations of 'genre': of the forms expected within a given context and type of communication. This collection of essays by international academics draws on a wide range of disciplines in the social sciences and the humanities to examine how far the expectations and forms of genre shape different kinds of autobiography and influence

what messages they can convey. After investigating the problem of genre definition, and tracing the evolution of genre as a concept, contributors explore such issues as: * How far can we argue that what people narrate in their autobiographical stories is selected and shaped by the repertoire of genre available to them? * To what extent is oral autobiography shaped by its social and cultural context? * What is the relationship between autobiographical sources and the ethnographer? Narrative and Genre presents exciting new debates in an emerging

field and will encourage
international and
interdisciplinary debate. Its
authors and contributors are
scholars from the fields of
anthropology, cultural studies,
literary analysis,
psychoanalysis, social history,
and sociology.
