Munson, Young, and Okiishi's Fundamentals of Fluid Mechanics is intended for undergraduate engineering students for use in a first course on fluid mechanics. Building on the well-established principles of fluid mechanics, the book offers improved and evolved academic treatment of the subject. Each important concept or notion is considered in terms of simple and easy-to-understand circumstances before more complicated features are introduced. The presentation of material allows for the gradual development of student confidence in fluid mechanics problem solving. This International Adaptation of the book comes with some new topics and updates on concepts that clarify, enhance, and expand certain ideas and concepts. The new examples and problems build upon the understanding of engineering applications of fluid mechanics and the edition has been completely updated to use SI units.

The definitive edition of the classic, myth-shattering history of the American family Leave It to Beaver was not a documentary, a man's home has never been his castle, the "male breadwinner marriage" is the least traditional family in history, and rape and sexual assault were far higher in the 1970s than they are today. In The Way We Never Were, acclaimed historian Stephanie Coontz examines two centuries of the American family, sweeping away misconceptions about the past that cloud current debates about domestic life. The 1950s do not present a workable model of how to conduct our personal lives today, Coontz argues, and neither does any other era from our cultural past. This revised edition includes a new introduction and epilogue, exploring how the clash between growing gender equality and rising economic inequality is reshaping family life, marriage, and male-female relationships in our modern era. More relevant than ever, The Way We Never Were is a potent corrective to dangerous nostalgia for an American tradition that never really existed.

"The Secrets of CEOs" reveals frank discussions with some of the West's most influential CEOs, such as Tesco's Sir Terry Leahy, Sir Martin Sorrell of WPP Group, former BP chief

executive Lord Browne and Ben Verwaayen, formerly of BT. It also incorporates radical and thought-provoking comments from the heads of new corporate champions of India like Infosys, Tata and Wipro, leading Chinese and Russian companies such as Lenovo and Severstal, and US corporate giants including Google, Dell and News Corporation. This work helps readers to discover what it's really like to be a top CEO, what motivates and drives the world's top business leaders, how they really lead their businesses, the leadership skills and experience that you need to succeed in the new world of work, and how businesses and leaders are going to have to evolve in the future. Being a CEO should be one of the best jobs in the world, offering the chance to make a real difference. But real life for most CEOs is tough and many are finding it very demanding. Steve Tappin and Andrew Cave have interviewed over 150 of the world's leading CEOs at length to discover their thoughts on the reality of leadership, life and business. "The Secrets of CEOs" gives fascinating insights into where today's top leaders have come from and what motivates and drives them, as well as the best kind of apprenticeship to become a global leader. It also explores the secrets of dealing successfully with the five facts of life that will be critical to business success in the coming decade: profiting from hard globalization; decoding sustainability; surfing the third wave of the web; coping with a capital crunch; and, waging the first world war for talent. How do chief executives really run their businesses? How do they need to change to ensure that their companies are successful and sustainable in the 21st century? And is it possible to have career success and a happy personal life? Discover the answers to these questions and much more in this provocative and stimulating book.

When you write a memoir, there's no place to hide. author Lynda Filler "Powerful and unforgettable" Jack Magnus, 5 Star Readers' Favorite "This is a book every human alive should read and take away the lessons given. If I could give it ten stars, I would. It's that good." J. Sikes When your cardiologist tells you to "Get your affairs in order, your heart condition is incurable," what do you do? Lynda shares her personal story in the typical fast-paced, edgy, in-your-face style she's known for in her writing. She will walk you through her journey to self-love sharing her belief in journals, love, prayer, soul, spirituality and positive mindset. She's hard-hitting but compassionate. She writes about romantic experiences that may shock you but makes no apologies for her unconventional lifestyle. Nor does she hold back taking responsibility for the things that she believes created her dis-ease. You will definitely question a woman who walks around in denial; then makes a decision to drive, all alone, from Puerto Vallarta, Mexico to Whistler, Canada with undiagnosed Idiopathic Dilated Cardiomyopathy. Men and women are often self-care-challenged and Lynda was no the exception. If you are fighting any kind of illness or dis-ease, you are not alone! Lynda has walked her talk, and after an experience in the summer of 2015 relating to Dr. Wayne Dyer, she is now ready to release her story Lynda knows how it feels to be told you're not healing or your condition is incurable. At no

point will she undermine anything your physicians tell you to do. She is not a medical doctor. She will explain the powerful, yet simple concepts, beliefs, balance and faith that she believes led to her healing. Most of all, she will show you how she used these simple principles to design and live, the fully healed life she now enjoys in 2017. You will shake your head in wonder, laugh, and maybe cry too. If you want less pain, worry, and stress about dis-ease and life in general, you will want to read this simple yet powerful story.

Hardbound. How to deal with uncertainty is a subject of much controversy in Artificial Intelligence. This volume brings together a wide range of perspectives on uncertainty, many of the contributors being the principal proponents in the controversy. Some of the notable issues which emerge from these papers revolve around an interval-based calculus of uncertainty, the Dempster-Shafer Theory, and probability as the best numeric model for uncertainty. There remain strong dissenting opinions not only about probability but even about the utility of any numeric method in this context.

Did you know that 'flavour of the month' originated in a marketing campaign in American ice-cream parlours in the 1940s, when a particular flavour would be specially promoted for a month at a time? And did you know that 'off the cuff' refers to the rather messy practice of writing impromptu notes on one's shirt cuff before speaking in public? These and many more idioms are explained and put into context in this third edition of the Oxford Dictionary of Idioms. The volume takes a fresh look at the idiomatic phrases and sayings that make English the rich and intriguing language that it is. This major new edition contains entries for over 6000 idioms, including 700 entirely new entries, based on Oxford's language monitoring and the ongoing third edition of the Oxford English Dictionary.

These include a range of recently established idioms such as 'the elephant in the corner', 'go figure', 'like a rat up a drainpipe', 'sex on legs', 'step up to the plate', 'too posh to push', 'a walk in the park', 'win ugly'. This edition also features a greatly increased number of cross-references, making it ideal for quick reference. Many entries include additional features which give more detailed background on the idiom in question. For example, did you know that 'taken aback' was adopted from nautical terminology that described a ship unable to move forward because of a strong headwind pressing its sails back against the mast? Anyone interested in the colourful side of the English language will get hours of fun browsing from this fascinating and informative volume.

A fascinating journey through the world's musical cultures. Every culture on Earth has music. Every culture that's ever existed has had it, but we don't exactly know why. Music is not like food, shelter, or having opposable thumbs. We don't need it to live, and yet we can't seem to live without it. Glenn Dixon travels the globe exploring how and why people make music. From a tour of Bob Marley's house to sitar lessons in India, he experiences music around the world and infuses the stories with the latest in brain research, genetics, and evolutionary psychology. Why does music give us chills down the backs of our necks? What exactly are the whales singing about and why does some

music stick in our minds like chewing gum? Through his adventures, Dixon uncovers the real reasons why music has such a powerful hold on us — and the answers just might surprise you.

Linear Circuit Analysis, Introductory Circuit Analysis Electric Circuits is the most widely used introductory circuits textbook of the past decade. The book has remained popular due to its success in implementing three themes throughout the text: (1) It builds an understanding of concepts based on information the student has previously learned; (2) The text helps stress the relationship between conceptual understanding and problem-solving approaches; (3) The authors provide numerous examples and problems that use realistic values and situations to give students a strong foundation of engineering practice.
