Catalogue Wintergreen Orchard House Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group

of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

A process through which skills, knowledge, and resources are expanded, capacity building, remains a tantalizing and pervasive concept throughout the field of anthropology, though it has received little in the way of critical analysis. By exploring the concept's role in a variety of different settings including government lexicons, religious organizations, environmental

campaigns, biomedical training, and fieldwork from around the globe, Hope and Insufficiency seeks to question the histories, assumptions, intentions, and enactments that have led to the ubiquity of capacity building, thereby developing a much-needed critical purchase on its persuasive power.
