Reading is the second part of the IELTS test, and takes 60 minutes. It consists of three or sometimes four reading passages of increasing difficulty, and there is a total of 40 questions to answer. Though you can mark and write on the Question Paper, you must enter your answers on the Reading Answer Sheet, and be aware that no extra time is given for transferring your answers from the test booklet to the Reading Answer Sheet. The Academic and General Training Reading Tests are graded to the same

level. However, because the texts in the Academic Reading Test are more challenging overall than those in the General Training Test, more questions need to be answered correctly on a General Training Test to receive the same grade.

What goes on in human beings when they make or listen to music? What is it about music, what gives it such peculiar power over

us, power delectable and beneficent for the most part, but also capable of uncontrollable and sometimes

destructive force? Music has no concepts, it lacks images; it has no power of representation, it has

no relation to the world. And yet it is evident in all of us—we tap our feet, we keep time, hum, sing, conduct music, mirror the melodic contours and

feelings of what we hear in our movements and expressions. In this book, Oliver Sacks explores the power music wields over us—a power that sometimes we control and at other

times don't. He explores, in his inimitable fashion, how it can provide access to otherwise unreachable emotional states, how it can revivify neurological avenues that have been frozen, evoke memories of earlier, lost events or states or bring those with neurological disorders back to a time when the world was much richer.

This is a book that explores, like no other, the myriad dimensions of our experience of and with music.

Success Group  
The #1 New York  
Times–bestselling  
author of *A  
Discovery of  
Witches* examines  
the real-life history  
of the scientific  
community of  
Elizabethan  
London. Travel to  
the streets, shops,  
back alleys, and  
gardens of  
Elizabethan  
London, where a  
boisterous and  
diverse group of  
men and women  
shared a keen  
interest in the study  
of nature. These  
assorted merchants,  
gardeners, barber-  
surgeons,  
midwives,  
instrument makers,  
mathematics  
teachers, engineers,  
alchemists, and

other experimenters  
formed a patchwork  
scientific  
community whose  
practices set the  
stage for the  
Scientific  
Revolution. While  
Francis Bacon has  
been widely  
regarded as the  
father of modern  
science, scores of  
his London  
contemporaries also  
deserve a share in  
this distinction. It  
was their  
collaborative, yet  
often contentious,  
ethos that helped to  
develop the ideals of  
modern scientific  
research. The book  
examines six  
particularly  
fascinating episodes  
of scientific inquiry  
and dispute in  
sixteenth-century

London, bringing to  
life the individuals  
involved and the  
challenges they  
faced. These men  
and women  
experimented and  
invented, argued  
and competed,  
waged wars in the  
press, and struggled  
to understand the  
complexities of the  
natural world.  
Together their  
stories illuminate  
the blind alleys and  
surprising twists and  
turns taken as  
medieval  
philosophy gave  
way to the  
empirical,  
experimental culture  
that became a  
hallmark of the  
Scientific  
Revolution.
