The step-by-step approach will lead students through the course in a logical learning order building knowledge and practical skills with regular questions and practical activities. Extension material will stretch the highest ability students and prepare them to take the next step in their learning. Practice exam questions will consolidate student understanding and prepare them for exam success. Each book is accompanied by online access to a wealth of extra support for students including practice exam questions, revision checklists and advice on how to prepare for an exam.

Cambridge International AS & A Level Biology Student's Book 2nd edition
Letts and Lonsdale

This book contains the proceedings of the International Symposium on the Mechanisms of Sexual Reproduction in Animals and Plants, where many plant and animal reproductive biologists gathered to discuss their recent progress in investigating the shared mechanisms and factors involved in sexual reproduction. This now is the first book that reviews recent progress in almost all fields of plant and animal fertilization. It was recently reported that the self-sterile mechanism of a hermaphroditic marine invertebrate (ascidian) is very similar to the self-incompatibility system in flowering plants. It was also found that a male factor expressed in the sperm cells of flowering plants is involved in gamete fusion not only of plants but also of animals and parasites. These discoveries have led to the consideration that the core mechanisms or factors involved in sexual reproduction may be shared by animals, plants and unicellular organisms. This valuable book is highly useful for reproductive biologists as well as for biological scientists outside this field in understanding the current progress of reproductive biology.

Cambridge International AS and A Level Biology Revision Guide
Collins Educational

This title is endorsed by Cambridge Assessment International Education to support the full syllabus for examination from 2022.

Confidently navigate the updated Cambridge International AS & A Level Biology (9700) syllabus with a structured approach ensuring that the link between theory and practice is consolidated, scientific skills are applied, and analytical skills developed. - Enable students to monitor and build progress with short 'self-assessment' questions throughout the student text, with answers at the back of the book, so students can check their understanding as they work their way through the chapters. - Build scientific communication skills and vocabulary in written responses with a variety of exam-style questions. - Encourage understanding of historical context and scientific applications with extension boxes in the student text. - Have confidence that lessons cover the syllabus completely with a free Scheme of Work available online. - Provide additional practice with the accompanying write-in Practical Skills Workbooks, which once completed, can also be used to recap learning for revision.

Limited

Cambridge IGCSE® Combined and Co-ordinated Sciences

Coursebook with CD-ROM Cambridge University Press

Thinking Skills Cambridge University Press

A unique series that provides a framework for teaching coding skills. Learn the basics of coding quickly! This lively book is an introduction to the world of coding and to Python 3 - a fantastic language to start coding with. Young programmers will learn how to code and customise several fun applications including their own Magic8Ball and an Etch A Sketch® game. The fun challenges and Quick Quizzes help to consolidate new skills and the companion web site provides the full source code for all the projects and challenges as well as help for readers.

Aircraft Engineering Principles Springer Science & Business Media

This volume looks at the study of oligodendrocytes through in vitro and in vivo techniques, multiple model organisms, using approaches that bridge scales from molecular through system. Chapters in this book cover topics such as fundamental molecular analyses of oligodendrocytes and myelin; in vitro, ex vivo, and in vivo molecular-cellular-electrophysiology-based techniques; oligodendrocyte formation, homeostasis, and disruption in zebrafish and Xenopus; and parallel system-level imaging of animal and human models. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding

known pitfalls. Authoritative and thorough, Oligodendrocytes: Methods and Protocols is a valuable reference guide that highlights the expansive and fast-paced nature of research into oligodendrocyte biology underlying health and function.

LAW and ETHICS for HEALTH PROFESSIONS 8E Hodder Education

Law and Ethics for Health Professions explains how to navigate the numerous legal and ethical issues that health care professionals face every day. Topics are based upon real-world scenarios and dilemmas from a variety of health care practitioners. Through the presentation of Learning Outcomes, Key Terms, From the Perspective of, Ethics Issues, Chapter Reviews, Case Studies, Internet Activities, Court Cases, and Video Vignettes, students learn about legal and ethical problems and situations that health care professions currently face. In the eighth edition, chapter 3 contains an expanded section on accreditation of hospitals and other patient care facilities, and of health care education programs. Students also use critical thinking skills to learn how to resolve real-life situations and theoretical scenarios and to decide how legal and ethical issues are relevant to the health care profession in which they will practice.

Advanced Biology Cambridge IGCSE® Combined and Co-ordinated Sciences Coursebook with CD-ROM

This second edition provides full coverage of the most recent IGCSE syllabus in a highly illustrative and accessible way. It also comes with a free CD, including additional exam style questions, interactive exercises and revision tips. Fully endorsed by University of Cambridge International Examinations.

Biology for You Hodder Education

There is a Language of Creation, within which we all exist,

whether a sun, a tiger, or a human being... this language carries our Original Design. The flower opening toward the sun... is that language. The spiritual feeling of being one with God... is that language. The smile on a mother ' s face when her infant is placed in her arms... is that language. The tears in our eyes when we feel heard or feel seen... are that language. Over the course of time, we have forgotten. But now, once again, something is stirring. And we are Awakening... We are in the midst of a phenomenal global shift. We are awakening to the discovery that much of what we have believed until now, in fact, isn ' t true. Awakening is no longer secreted away in unconventional thinking. Awakening is what is happening. We just had no idea it would look or feel like it does. We have mistaken awakening for overwhelm, physical exhaustion, mental confusion, emotional anxiety. What we are experiencing, the old systems of understanding cannot sort out. Our minds and bodies are awakening into the Language of Creation. Our entire system is actively restoring this Original Design. We are beginning to remember, once again, that we are an integral part of life. New perceptions and applications are now demanded. After eons of time, we are in a powerful creative process as our Original Design reformats our minds, re configures our bodies, and reboots our physical and non-physical systems. This book is a road-map to navigate your path to your Original Design. Through the use of template-writing exercises you reconfigure your neural pathways to be life-enhancing rather than life-defeating, manifesting your life in the majesty of what it was always meant to be. The Language of Creation is a tool for re-formatting HOW you think to create the life you want.
