Arabic-English-Arabic Legal Translation provides a groundbreaking

investigation of the issues found in legal translation between Arabic and English. Drawing on a contrastive-comparative approach, it analyses parallel authentic legal documents in both Arabic and English to examine the features of legal discourse in both languages and uncover the different translation techniques used. In so doing, it addresses the following questions: What are the features of English and Arabic legal texts? What are the similarities and differences of English and Arabic legal texts? What are the difficult areas of legal translation between English and Arabic legal texts? What are the techniques for translating these difficult areas on the lexical and syntactic levels? Features include: A thorough description of the features of legal translation in both English and Arabic, drawing on empirical new research, corpus data analysis and strategic two-way comparisons between source texts and target texts Coverage of a broad range of topics including an outline of the chosen framework for data analysis, a historical survey of legal discourse developments in both Arabic and English and detailed analyses of legal literature at both the lexical and syntactic levels Attention to common areas of difficulty such as Shariah Law terms, archaic terms and model auxiliaries Many examples and excerpts from a wide selection of authentic legal documents, reinforced by practical discussion points, exercises and practice drills to encourage active engagement with the material and opportunities for hands-on learning. Wide-ranging, scholarly and thought-provoking, this will be a valuable resource for advanced undergraduates and postgraduates on Arabic, Translation Studies and Comparative Linguistics courses. It will also be essential reading for translation professionals and researchers working in the field.

Many English words are formed by taking basic words and adding combinations of prefixes and suffixes to them. A basic word to which affixes (prefixes and suffixes) are added is called a root word because it

forms the basis of a new word. The root words are mostly from Latin and Greek. This is very similar to Chinese language, which contains Radicals. Radicals normally give you some hints in meaning. By decoding the root words from Latin and Greek, you will find most deep words such as biology and medical terms are easier to remember, you can even sense out a new word meaning even if it is new to you or it is even French, German or Italian. You will not be intimidated by English words, on the opposite, you will enjoy the “ decoding ” approach as a fun way to expand your English vocabulary.

Cambridge IGCSE First Language English 4th edition Cambridge University Press

This book is at once the history of a remarkable and fascinating phenomenon--a British-style public school rooted in Egyptian soil boasting such alumni as King Hussein of Jordan, Omar Sharif, and Edward Said--and a reflection of the spirit of Alexandria during the first half of the twentieth century. Its publication in October 2002 is timed to coincide with the school's centenary. Victoria College,

Alexandria, founded in October 1902, was named after the British queen Victoria, who had died the year before. It was the brainchild of a group of British businessmen who formed the nucleus of Alexandria's small British community. Deliberately fashioned as an independent, secular school, open to anyone who could afford its fees, it attracted the children both of the elite--royalty, diplomats, magnates, politicians, landowners--and of very ordinary people. Its pupils came not only from all over Egypt, but from the entire Middle East and beyond. This immensely readable history is, in the first place, a book about and for the Old Victorians. In a series of colorful sketches, backed by plentiful quotation from documents in the school archives, a series of engaging and distinguished characters come to life, not least Victoria's first two headmasters, C.R. Lias and his successor R.W.G. Reed--the two men whose enlightened vision and skillful leadership made the school what it was. Yet at the same time, this is a book whose appeal extends far beyond its immediate subject matter. In the process of putting together the story of a school, the authors have uncovered a wealth of material that will interest Middle East and postcolonial scholars as well as educationists, social historians, and students of human nature.
