IGCSE Cambridge International Mathematics (0607) Extended

Oxford University Press - Children

The 2018 edition of The State of World Fisheries and Aquaculture emphasizes the sector's role in achieving the 2030 Agenda for Sustainable Development and the Sustainable Development Goals, and measurement of progress towards these goals. It notes the particular contributions of inland and small-scale fisheries, and highlights the importance of rights-based governance for equitable and inclusive development. As in past editions, the publication begins with a global analysis of trends in fisheries and aquaculture production, stocks, processing and use, trade and consumption, based on the latest official statistics, along with a review of the status of the world's fishing fleets and human engagement and governance in the sector. Topics explored in Parts 2 to 4 include aquatic biodiversity; the ecosystem approach to fisheries and to aquaculture; climate change impacts and responses; the sector's contribution to food security and human nutrition; and issues related to international trade, consumer protection and sustainable value chains. Global developments in combating illegal, unreported and unregulated fishing, selected ocean pollution concerns and FAO's efforts to improve capture fishery data are also discussed. The issue concludes with the outlook for the sector, including projections to 2030. As always, The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide audience, including policy-makers, managers, scientists, stakeholders and indeed all those interested in the fisheries and aquaculture sector.

Mathematics Higher Level for the IB Diploma Exam Preparation Guide Cambridge University Press

The WHO Regional Office for Europe commissioned this report to support the implementation of the health 2020 Framework. It builds on "Governance for Health in the 21st Century," a study conducted for the WHO Regional office for Europe. This report provides policy-makers with examples from around the world of how whole-of-government and whole-of-society approaches have been implemented together with a set of tools to manage the complex policy process. These policy examples have been selected with a view to the priority areas set by the Health 2020 policy framework and with the following criteria in mind: they provide useful lessons, often illustrate best practices, cover a wide variety of different contexts and countries and, as far as possible, have been implemented and, ideally, evaluated. The report aims to contribute, in particular, to the Health 2020 strategic policy objective of "improving leadership and participatory governance for health." It is conceived as a living document that will be continually enriched with new examples and analysis.
