The last half-century has witnessed substantial change in the opportunities and rewards available to men and women in the workplace. While the gender pay gap narrowed and female labor force participation rose dramatically in recent decades, some dimensions of gender inequality—most notably the division of labor in the family—have been more resistant to change, or have changed more slowly in recent years than in the past. These trends suggest that one of two possible futures could lie ahead: an optimistic scenario in which gender inequalities continue to erode, or a pessimistic scenario where contemporary institutional arrangements persevere and the gender revolution stalls. In *The Declining Significance of Gender?*, editors Francine Blau, Mary Brinton, and David Grusky bring together top gender scholars in sociology and economics to make sense of the recent changes in gender inequality, and to judge whether the optimistic or pessimistic view better depicts the prospects and bottlenecks that lie ahead. It examines the economic, organizational, political, and cultural forces that have changed the status of women and men in the labor market. The

contributors examine the economic assumption that discrimination in hiring is economically inefficient and will be weeded out eventually by market competition. They explore the effect that family-family organizational policies have had in drawing women into the workplace and giving them even footing in the organizational hierarchy. Several chapters ask whether political interventions might reduce or increase gender inequality, and others discuss whether a social ethos favoring egalitarianism is working to overcome generations of discriminatory treatment against women. Although there is much rhetoric about the future of gender inequality, *The Declining Significance of Gender?* provides a sustained attempt to consider analytically the forces that are shaping the gender revolution. Its wide-ranging analysis of contemporary gender disparities will stimulate readers to think more deeply and in new ways about the extent to which gender remains a major fault line of inequality.

The Declining Significance of Gender? Cambridge University Press

“A pleasure to read and nearly impossible to put down.” –Army Times “Embodies an experience that many have enjoyed in fantasy—few in reality.” –The Washington Post The French Foreign Legion—mysterious, romantic, deadly—is filled with men of dubious character, and hardly the place for a proper Englishman just nineteen years of age. Yet in 1960, Simon Murray traveled alone to Paris, Marseilles, and ultimately Algeria to fulfill the toughest contract of his life: a five-year stint in the Legion. Along the way, he kept a diary. *Legionnaire* is a compelling, firsthand account of Murray’s experience with this legendary band of soldiers. This gripping journal offers stark evidence that the Legion’s reputation for pushing men to their breaking points and beyond is well deserved. In the fierce, sun-baked North African desert, strong men cracked under brutal officers, merciless training methods, and barbarous punishments. Yet Murray survived, even thrived. For he shared one trait with these hard men from all nations and backgrounds: a determination never to surrender. “The drama, excitement, and color of a good guts-and-glory thriller.” –Dr. Henry Kissinger

Dubbed “the little French Bill Gates” in his native country, Alexandre Mars quit the startups that made him rich, transforming himself from entrepreneur to philanthropist. Determined to become a responsible and effective giver, Mars traveled around the world, asking two very simple questions. “Do you give to charity?” “Do you give enough?” While all answered yes to the first question, their second answer—“no” surprised him. From Hong Kong to Paris to New York, he met numerous people passionate about making the world a better place, yet unsure of how to do so. Certain there must be a better answer than volunteerism or blank checks, Mars began Epic, a foundation that allows for users to donate directly to rigorously vetted charities while seeing their impact in real time. Epic takes no cut—100 percent of the donations reach the people who need them. In this vital book, Mars not only tells the story of Epic and its new formula for giving but redefines what it means to give and have purpose. Like the millennial generation driving much of today’s change, Giving is about holding the new centers of power—multinational corporations—accountable to society. People are passionate about social causes, and want to donate their time, money, and skills. Combining Mars’ extensive knowledge and experience in tech and economics with the real-life stories of NGOs, Giving provides the inspiration, tools, and insight we can use to make our modern and unpredictable world a better place. 100% of the author's proceeds will go the Epic portfolio organizations to help disadvantaged youth.

Why has the interlacing of gender issues and the family become a dominant strand of political discourse and policy development in the late twentieth century? Will the historical contradictions that have beset the relationship between the family and feminist aspirations continue through the new millennium? Is the 'new feminism' a resolution of these tensions or part of the 'anti-feminist backlash'? This study examines the continuing 'war over the family' in the USA and the UK in the context of major socio-economic and cultural changes that have fundamentally shifted the ground of traditional gender relations and redrawn the material and psychological conditions for family life in the next century.

The study of education and social mobility has been a key area of sociological research since the 1950s. The importance of this research derives from the systematic analysis of functionalist theories of industrialism. Functionalist theories assume that the complementary demands of efficiency and justice result in more 'meritocratic' societies, characterized by high rates of social mobility. Much of the sociological evidence has cast doubt on this optimistic, if not utopian, claim that reform of the education system could eliminate the influence of class, gender and ethnicity on academic performance and occupational destinations. This book brings together sixteen cutting-edge articles on education and social mobility. It also includes an introductory essay offering a guide to the main issues and controversies addressed by authors from several countries. This comprehensive volume makes an important contribution to our theoretical and empirical understanding of the changing relationship between origins, education and destinations. This timely collection is also relevant to policy-makers as education and social mobility are firmly back on both national and global political agendas, viewed as key to creating fairer societies and more competitive economies. This book was originally published as a special issue of the *British Journal of Sociology of Education*.
