King of the Slot Machines Casino Vacationsstage-to-screen musical has evolved, PressInc

Hollywood's conversion to sound in the 1920s created an early peak in the film musical, following the immense success of The Jazz Singer. The opportunity to synchronize moving pictures with a soundtrack suited the musical in particular, since the heightened experience of song and dance drew attention to the novelty of the technological development. Until the near-collapse of the genre in the 1960s, the film musical enjoyed around thirty years of development, as landmarks such as The Wizard of Oz, Meet Me in St Louis, Singin' in the Rain, and Gigi showed the exciting possibilities of putting musicals on the silver screen. The Oxford Handbook of Musical Theatre Screen Adaptations traces how the genre of the

starting with screen adaptations of operettas such as The Desert Song and Rio Rita, and looks at how the Hollywood studios in the 1930s exploited the publication of sheet music as part of their income. Numerous chapters examine specific screen adaptations in depth, including not only favorites such as Annie and Kiss Me, Kate but also some of the lesser-known titles like Li'l Abner and Roberta and problematic adaptations such as Carousel and Paint Your Wagon. Together, the chapters incite lively debates about the process of adapting Broadway for the big screen and provide models for future studies.

ubiquitous social and cultural phenomenon. It is also undergoing significant change, with new products and technologies, regulatory models, changing public attitudes and the sheer scale of the gambling enterprise necessitating innovative and mixed methodologies that are flexible, responsive and ' agile '. This book seeks to demonstrate that researchers should look beyond the existing disciplinary territory and the dominant paradigm of ' problem gambling ' in order to follow those changes across territorial, political, technical, regulatory and conceptual boundaries. The book draws on cutting-edge qualitative work in disciplines including geography, organisational studies, sociology, East Asian studies and anthropology to explore the production and consumption of risk, risky places, risk technologies, the gambling industry and connections between gambling

and other kinds of speculation such as financial derivatives. In doing so it addresses some of the most important issues in contemporary social science, including: the challenges of studying deterritorialised social phenomena; globalising technologies and local markets; regulation as it operates across local, regional and international scales; and the rise of games, virtual worlds and social media.

A boy who was adopted by an ebullient owner of a thriving Las Vegas casino, but was born as a laiving composite. His entire torso was an unobstructed rendition of a "flat top" slot machine. A tale of high action, but deep insights into one who is handicapped, and where love takes the often chaotic foreground of this little family. The child is actually a mystical King, the "King of the Slot Machines," and came here on his own accord as a diving "mission" to communicate the needs of his gentle slot machines of the world. However in the process, he succumbs to a myriad of medical afflictions from being birthed in this manner, which he was known as the "CASINO CHILD." He pases away from his body's reluctant holdings, but long prior to his death, he touches lives of those around

the Las Vegas gambling strip in a perplexity of ways; making the slot machines respond by a mere spoken word or a whispering conversation. Facing catastrophic loneliness and truthfully realizing life from no longer the perspective of his obedient slot machines, he brings people into the state of awareness in ways not normally achieved. When the child passes away at his father's sparking casino at night, the entire strip is doused into an inky blackness, as every slot machine the world over, mourns for the death of their gentle and mystical King and Creator, has passed into the very Heaven He has long ago created for his quiet and gentle own. 'King of the Slot Machines' came to his parents in a dream three days after his passing, and bequeathed his divine knowledge about his mission-"to communicate the needs of his slot machines, but perhaps "our" needs as well."

The world is full of uncertainty. In unpredictable circumstances, can emotions facilitate advantageous decision-making?

A neuroscience team, led by Antonio Damasio, explored this question using the Iowa Gambling Task (IGT). To the present day, the findings of numerous IGT-related investigations strongly influence clinical and interdisciplinary research, for example, in neuroeconomics and neuromarketing.

This special issue examines IGT-based

research progress over the past 20 years through literature reviews, clinical examinations, model construction, theoretical integration, and brain imaging technology. Both supportive and opposing viewpoints are provided to frame correlations between rationality, emotion, decision-making, and IGT. Potential future directions for IGT studies are discussed

With the good fortune to be mentored by financial industry visionaries Ron Baron and Alan Greenberg, Jason learned to think outside the box and challenge conventional wisdom early in his career. Companies can fall out of favor with the investment herd and see their share price plunge, not because of diminished inherent value but because of programmed trading volatility and a lack of accurate, reliable information. In some instances, poor performance is due to misdirected or disengaged leadership. These situations often present investment opportunities for seasoned turnaround investors like Jason Ader. One of the key principles of Jason's unique investment perspective is that "the crowd is usually wrong." When industry analysts reach a consensus view about a stock, he often reaches the opposite conclusion. Jason's approach is not that of what is typically referred to as an activist investor--hostile, flamboyant

and boisterous--but rather that of a corporate collaborator, a sympathetic advocate for uncovering value, enhancing performance, and achieving a higher stock price for shareholders. Jason's history of successful turnaround investments spans a variety of industries and includes Las Vegas Sands Corp., Bwin Interactive Entertainment, The Stars Group Inc., International Game Technology, Papa John's Pizza, First Bank of Nevada, Adelle Foods Group, and others. In his book, Jason explains his unconventional analysis that uncovers underperforming companies with underlying value, and the solutions that helped return them to profitability and restore shareholder value.
