From Homer to Helen Keller, from Dune to Stevie Wonder, from the invention of braille to the science of echolocation, M. Leona Godin explores the fascinating history of blindness, interweaving it with her own story of gradually losing her sight. “[A] thought-provoking mixture of criticism,

memoir, and advocacy.” —The New Yorker There Plant Eyes probes the ways in which blindness has shaped our ocularcentric culture, challenging deeply ingrained ideas about what it means to be “blind.” For millennia, blindness has been used to signify such things as thoughtlessness (“blind faith”), irrationality (“blind rage”), and unconsciousness (“blind evolution”). But at the same time, blind people have been othered as the recipients of special powers as compensation for lost sight (from the poetic gifts of John Milton to the heightened senses of the comic book hero Daredevil). Godin—who began losing her vision at age ten—illuminates the often-surprising history of both the condition of blindness and the myths and ideas that have grown up around it over the course of generations. She combines an analysis of blindness in art and culture (from King Lear to Star Wars) with a study of the science of

blindness and key developments in accessibility (the white cane, embossed printing, digital technology) to paint a vivid personal and cultural history. A genre-defying work, *There Plant Eyes* reveals just how essential blindness and vision are to humanity's understanding of itself and the world.

As the founder and head of Atlantic Records, Ahmet Ertegun signed and/or recorded many of the greatest musical artists of all time, from Ray Charles to Kid Rock. Working alongside his older brother, Nesuhi, one of the preeminent jazz producers of all time, and the legendary Jerry Wexler, Ertegun transformed Atlantic Records from a small independent record label into a hugely profitable multinational corporation. In successive generations, he also served as a mentor to record-business tyros like Phil Spector, David Geffen, and Lyor Cohen. Brilliant, cultured, and irreverent, Ertegun was as renowned for his incredible sense of personal style and nonstop A-list social life as his work in the studio. Blessed with impeccable taste and brilliant business acumen, he brought rock 'n roll into the mainstream while creating the music that became the sound track for the lives of multiple generations.--From publisher description.

*I Will Survive* is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was

nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

First published a half-century ago, Rachel Carson's award-winning *The Sense of Wonder* remains the classic guide to introducing children to the marvels of nature. In 1955, acclaimed conservationist Rachel Carson—author of *Silent Spring*—began work on an essay that she would come to consider one of her life's most important projects. Her grandnephew, Roger Christie, had visited Carson that summer at her cottage in Maine, and together they had wandered the surrounding woods and tide pools. Teaching Roger about the natural wonders around them, Carson began to see them anew herself, and wanted to relate that same magical feeling to others who might hope to introduce a child to the beauty of nature.

“If a child is to keep alive his inborn sense of wonder,” writes Carson, “he needs the companionship of at least one adult who can share it,

rediscovering with him the joy, excitement and mystery of the world we live in.” Now available in paperback, *The Sense of Wonder* is a timeless volume that will be passed on from generation to generation, as treasured as the memory of an early-morning walk when the song of a whippoorwill was heard as if for the first time. Featuring serene color photographs from renowned photographer Nick Kelsh, “this beautifully illustrated edition makes a fine gift for new and prospective mothers and fathers” (Gregory McNamee), and helps us all to tap into the extraordinary power of the natural world.

Remember When All You Wanted Was Your MTV? The perfect gift for the music fan or child of the eighties in your life. Named One of the Best Books of 2011 by NPR – Spin - USA Today – CNBC - Pitchfork - The Onion - The Atlantic - The Huffington Post – VEVO - The Boston Globe - The San Francisco Chronicle Remember the first time you saw Michael Jackson dance with zombies in "Thriller"? Diamond Dave karate kick with Van Halen in "Jump"? Tawny Kitaen turning cartwheels on a Jaguar to Whitesnake's "Here I Go Again"? The Beastie Boys spray beer in "(You Gotta) Fight for Your Right (To Party)"? Axl Rose step off the bus in "Welcome to the Jungle"? It was a pretty radical idea—a channel for teenagers, showing nothing but music videos. It was such a radical idea that almost no one thought it would actually succeed, much less become a force in the worlds of music, television, film, fashion, sports, and even politics. But it did work. MTV became more than anyone had ever imagined. *I Want My MTV* tells the story of the first decade of MTV, the golden era when MTV's programming was all videos, all the time, and kids watched religiously

to see their favorite bands, learn about new music, and have something to talk about at parties. From its start in 1981 with a small cache of videos by mostly unknown British new wave acts to the launch of the reality-television craze with *The Real World* in 1992, MTV grew into a tastemaker, a career maker, and a mammoth business. Featuring interviews with nearly four hundred artists, directors, VJs, and television and music executives, *I Want My MTV* is a testament to the channel that changed popular culture forever.

Smart homes are intelligent environments that interact dynamically and respond readily in an adaptive manner to the needs of the occupants and changes in the ambient conditions. The realization of systems that support the smart homes concept requires integration of technologies from different fields. Among the challenges that the designers face is to make all the components of the system interact in a seamless, reliable and secure manner. Another major challenge is to design the smart home in a way that takes into account the way humans live and interact. This later aspect requires input from the humanities and social sciences fields. The need for input from diverse fields of knowledge reflects the multidisciplinary nature of the research and development effort required to realize smart homes that are acceptable to the general public. The applications that can be supported by a smart home are very wide and their degree of sophistication depends on the underlying technology used. Some of the application areas include monitoring and control of appliances, security, telemedicine, entertainment, location based services, care for children and the elderly... etc. This book consists of eleven chapters that cover various aspects of smart home systems.
