republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

A Midsummer Nights Dreame
Prentice Hall

George Bruce Malleson was a British army officer and military historian who had served in India and who wrote prolifically on the history of India and Afghanistan. One of his major works was History of Afghanistan from the Earliest Period to the Outbreak of the War of 1878, a political and military history of Afghanistan that was published in London in 1879, shortly after the

outbreak of the Second Anglo-Afghan War (1878-80). The Russo-Afghan Question and the Invasion of India, published six years later, has the same theme as the earlier book, namely the strategic importance to the British Empire of Afghanistan as a buffer against Russian expansionism and the growing seriousness of the Russian threat to Afghanistan and by extension to India. The immediate impetus to Malleson's writing the second book was the Russian annexation of Merv (in present-day Turkmenistan) and the formation of a joint Anglo-Russian boundary commission to determine the northern frontier of Afghanistan. The author argues that the territories recently seized by Russia historically belonged to the amir of Afghanistan and should be returned to him. The key strategic point, Malleson argues, is Herat, "the outlying redoubt of India" and in his view the next objective in the Russian campaign of expansion. Malleson calls for a forceful response to the threat from Russia, and specifically the concentration of "all our available troops in the Pishin valley, ready for a prompt advance" to Herat. Chapter nine, "The Armies on Both Sides," contains a detailed accounting of the size, composition, and strength of Russian military units deployed in Central Asia and of the British and Indian troops available for the protection of India. The book presented here is the second edition of *The Russo-Afghan Question and the Invasion of India*, published in 1885.

The Condominium Remembered: The transformation of the old order in the Sudan John Wiley & Sons
A New York Review Books

Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

edition, Medical Statistics at a Glance is a concise and accessible introduction to this complex subject. It provides clear instruction on how to apply commonly used statistical procedures in an easy-to-read, comprehensive and relevant volume. This new edition continues to be the ideal introductory manual and reference guide to medical statistics, an invaluable companion for statistics lectures and a very useful revision aid. This new edition of Medical Statistics at a Glance: Offers guidance on the practical application of statistical methods in conducting research and presenting results Explains the underlying concepts of medical statistics and	presents the key facts without being unduly mathematical Contains succinct self- contained chapters, each with one or more examples, many of them new, to illustrate the use of the methodology described in the chapter. Now provides templates for critical appraisal, checklists for the reporting of randomized controlled trials and observational studies and references to the EQUATOR guidelines for the presentation of study results for many other types of study Includes extensive cross-referencing, flowcharts to aid the choice of appropriate tests, learning objectives for each chapter, a glossary of terms and a glossary of annotated full computer output relevant to the

Can we unlock
resilience to climate

stress by better understanding linkages between the environment and biological systems? Agroclimatology allows us to explore how different processes determine plant response to climate and how climate drives the distribution of crops and their productivity. Editors Jerry L. Hatfield, Mannava V.K. Sivakumar, and John H. Prueger have taken a comprehensive view of agroclimatology to assist and challenge researchers in this important area of study. Major themes include: principles of energy exchange and climatology, understanding climate change and agriculture, linkages of specific biological systems to climatology, the

context of pests and diseases, methods of agroclimatology, and the application of agroclimatic principles to problem-solving in agriculture.

A World of Imagination

New York Review of Books

The aims in drying out a building are to bring it to a fit state to receive internal finishes and decoration and to avoid damage or disfigurement of work already done. This digest describes some ways of drying out and also methods of testing the condition of walls, floors and joinery. Although economic considerations will usually call for early completion and, hence, rapid drying, excessively fast drying will cause

troubles.

IICRC S520

Heinemann

What would you do on a day off from school? Go on an adventure, of course! Meet Charlie, an eight-year-old boy with a flare for using his imagination. Join him as he turns his snow day into a day filled with fun, excitement, and fantasy. Travel with Charlie to the Wild West, the Amazon jungle, and into outer space. Ride along for the thrills as he becomes a race car driver, a pirate, a cowboy, and even a superhero! With a little creativity

(and a basement full of junk), there is no limit to where your imagination can take you!

The complete illustrated guide to planning, growing, storing and preserving your own garden produce from 'the grand master of self-sufficiency' (Kitchen Garden), John Seymour John Seymour's classic guide gives you the knowledge and expertise to create your own self-sufficient garden and produce what you need. Whatever the size of your space, discover how to garden organically and maximise your harvest, without the need for radical changes to

your lifestyle. From cultivating vegetables to making cider, keeping chickens to training vines, you'll garden in tune with the seasons, growing for the year, eating for today and storing for tomorrow. No specialist knowledge required: just clearly explained principles and practicalities ideal for any gardener.

Science Focus John Wiley & Sons

It is a pioneer attempt of its kind to study Indian Buddhism in its entirety as a system of rational philosophy, profound faith, and as a historical matrix of creative human culture and civilized institution during

the 7th and 8th centuries the brilliant epoch of the University of Nalanda, the mere name of which spells the great wonder that was Buddhism in Ancient India. A chapter on the contribution of Buddhism to Indian Civilization has also been added. The treatment of the subject is critical and integral though not traditional.
