It is 1956, and although Jonathon Statler is barely fifteen, he is already a proven survivor. Locked in a world of loneliness and abuse, Jonathon has nonetheless managed to learn golf and tennis, and embrace a levelheaded approach to life. He has paid a price, however. He is grossly overweight and short on self confidence. His eyes are more often on the tops of his sneakers than level with the world around him. Until one magical summer when Jonathon meets Malcolm Platt, the Director of Robert Morris Camp for

Boys, and Angus McClatchy, a former teacher who now considers himself nothing more than an old man and, finally, a sensitive young woman named Becky Wilson. The Echoes of Summer is set against a background of racial and religious tension so prevalent during the 1950s. Author John Kendall captures the interaction of youth and age that provides the catalyst for a story that lifts the spirit and makes it soar.

This book contains 182 papers presented at the 12th Symposium of Computer Aided Process Engineering (ESCAPE-12), held in The Hague, The Netherlands, May 26-29, 2002. The objective of ESCAPE-12 is to highlight advances made in the development and use of computing methodologies and information technology in the area of Computer

Aided Process Engineering and Process Systems Engineering. The Symposium addressed six themes: (1) Integrated Product&Process Design; (2) Process Synthesis & Plant Design; (3) Process Dynamics & Control; (4) Manufacturing & Process Operations; (5) Computational Technologies; (6) Sustainable CAPE Education and Careers for Chemical Engineers. These themes cover the traditional core activities of CAPE, and also some wider conceptual perspectives, such as the increasing interplay between product and process design arising from the often complex internal structures of modern products; the integration of production chains creating the network structure of the process industry and optimization over life span dimensions, taking sustainability as the ultimate driver.

We are pleased to present the proceedings of the Second Workshop on Algorithms in Bioinformatics (WABI 2002), which took place on September 17-21, 2002 in Rome, Italy. The WABI workshop was part of a three-conference meeting, which, in addition to WABI, included the ESA and APPROX 2002. The three conferences are jointly called ALGO 2002, and were hosted by the Faculty of Engineering, University of Rome "La Sapienza". See <http://www.dis.uniroma1.it/algo02> for more details. The Workshop on Algorithms in Bioinformatics covers research in all areas of algorithmic work in bioinformatics and computational biology. The emphasis is on discrete algorithms that address important problems in molecular biology, genomics, and genetics, that are found

edonsoundmodels,thatarecomputati- ally e?cient, and that have been implemented and tested in simulations and on real datasets. The goal is to present recent research results, including signi?cant work in progress, and to identify and explore directions of future research. Original research papers (including signi?cant work in progress) or sta- of-the-art surveys were solicited on all aspects of algorithms in bioinformatics, including, but not limited to: exact and approximate algorithms for genomics, genetics, sequence analysis, gene and signal recognition, alignment, molecular evolution, phylogenetics, structure determination or prediction, gene expression and gene networks, proteomics, functional genomics, and drug design.

Vineet was an average engineer at an IT firm. His office sucked the life out of him making him hate every moment he spent there. Cricket was his passion, a passion which he never had the guts to pursue until fate bestowed upon him an opportunity which would change his life forever. Shrugging off a sparkling career as a management consultant that lay ahead, this rubber ball stroking bloke embarks upon the most mercurial excursion to fulfil his dream of donning the navy blue jersey that reads INDIA. The expedition which is riddled with the most crushing lows and mind numbing highs proves to be the ultimate test of his fortitude and makes him even more resolute. How much more can he sacrifice to get there? And most importantly, will he get there?

Getting into one of the country's top management schools is hard. Dreams are many. Expectations are high. So what happens when a budding leader from one of India's famous Public sector company ends up there, hoping IIM – A is all about leadership. And then, his dreams start to crumble. There's probably no one who can narrate those feelings better than Naren, a simple student at IIM – Ahmedabad. His journey, through a fiercely competitive world, that is, the most premier management school in India, is by turn thoughtful, poignant and hilarious; sometimes laced with sadness. And it quickly becomes apparent, that it is not what he was looking for. And the pressure of memories, of unrequited love, and the expectations of everyone around make things that much harder. The course is tough. The hours are long. Grades are hard to come by... Is all lost? Or is there a treasure left for Naren to take back...

How was IIMA born? Who were the key players? What has made it synonymous to success? These questions become even more relevant as the Indian Institute of Management Ahmedabad (IIMA) marks its Golden Jubilee year in 2011. Established in 1961, IIMA is the first Indian business school to achieve international recognition. In 2002, Economist Intelligence Unit 's list declared IIMA as the most selective management school in the world. And in

2011, IIMA has been ranked number 7 in Financial Times (FT) 's global ranking of Masters in Management Programme. In this well researched and timely book, Prafull Anubhai charts the journey of this premier institution from its inception to what is it today—the construction of its iconic campus by American architect Louis Kahn, policies and processes that set the benchmark, exemplary leadership exhibited by its various chairmen and directors, and the vision and future challenges for the institute. In The IIMA Story, Prafull weaves all the threads together to present a vivid history of one of India 's greatest pride that has shaped the lives of many individuals through generations.

Evaluation is a part of everyday life. Competences, knowledge and skills are assessed in ordinary as well as in institutional settings like hospitals, clinics and schools. This volume investigates how evaluations are being carried out interactionally. More specifically, it explores how people evaluate each others ' cognitive competences as they deal with each others ' understandings, knowings, feelings, doings, hearings and learnings face-to-face. The contributions focus on different evaluation activities in a variety of institutional settings in Denmark, Finland, Sweden, Holland and the United States of America. All the

contributions approach the theme by use of Ethnomethodology (EM) and/or Conversation Analysis (CA). Thus, the analytic interests concern how participants organize activities of evaluating cognitive competences by means of recognizable interactional methods. This approach differs from other approaches and research interests within cognitive science as it concentrates on how people in interaction orient towards cognitive competence irrespective of scientific theories.
