Forensic Science CRC Press Science is really beautiful. With original illustrations that deftly explain the strange-but-true world of science, Seeing Science offers a curated ride through the great mysteries of the universe. Artist and lay scientist Iris Gottlieb explains among other things: neap tides, naked mole rats, whale falls, the human heart, the Uncertainty Principle, the ten dimensions of string theory, and how glaciers are like Snickers bars. With quirky visual metaphors and concise factual explanations, she offers just the right amount of information to stoke the curious mind with a desire to know more about the life forces that animate both the smallest cell and the biggest black hole. Seeing Science illustrates, explicates, and celebrates the marvels of science as only art can.

the elements of plant science

With colourful illustrations for every word, this is a perfect introduction to the first science words and concepts that children encounter in their early years at school.

OUP Oxford

The Concise Illustrated Dictionary of Biocontrol Terms includes basic terminology related to the biological control of pests, together with state-of-the-art scientific and practical terms, for expedient comprehension and analysis of present, forecasted or in situ pest management problems. In addition, it also provides the names of the most common pesticides and predators commercially available in different continents (Americas, Europe, Asia, Australia, Africa), as well as target pests and diseases of these agents, making it a tangible tool for prompt management actions. The dictionary is copiously illustrated with original pictures

clarifying the most commonly used terms and the identity of organisms in biocontrol technology, with content that is both scientifically rigorous and clear. The biological control of pests using living organisms, or products from their activities, is an independent branch of science based on multiple disciplines including general biology, zoology, entomology, phytopathology, microbiology and others. As a result, the field of biological control has its own specific terminology that needs to be understood and applied correctly across this variety of disciplines, including among those approaching the field from a different area of expertise and who may have difficulty understanding the terms used by experts in the field. This compact illustrated guide will appeal to the scientific community working in integrated pest management disciplines, as well as those researching, studying, and working with interest in protecting natural resources at a global, local, and individual level, in a variety of locations including the lab, garden, field, or forest. Enables understanding of the terminology used in biological control for professionals, researchers and students in a variety of scientific fields Features clear images and photographs to help identify insects and pathogens Ideal for in situ use in both the lab and field pest management protocols

Illustrated Dictionary of Physics

Usborne Pub Limited

Now in its fourth edition, this illustrated dictionary gives readers a visual representation of all elements of maritime transport which relate to the handling and movement of cargo. This is particularly for the benefit of shore-based personnel who often do not get the opportunity to see first-hand how the cargoes they are working on are handled and moved. The book covers: every major commodity how it is loaded how it is discharged what equipment is used to handle and store it any specialised terminal required This new edition not only includes many new definitions, it also benefits from several photographic sequences showing cargo loading and discharging processes in action from start to finish. This book is a valuable reference to any professionals working in the shipping and cargo handling industry.

The fourth edition of the BKSTS dictionary provides clear and concise explanations of the terminology and acronyms encountered in the broadcasting and moving image industries. Convergence of these industries means that those practising within them are increasingly faced with unfamiliar terminology. Martin Uren has reflected this change in his extended choice of industry terms, acronyms and colloquialisms. He provides: - Over 3300 definitions covering film, television, sound and multimedia technologies, together with technical terms from the computing, networks and telecommunications industries. - Nearly 700 acronyms in a quick look-up section. - 26 Appendices of useful technical information across a range of topics. Whether you are an experienced professional or a new industry entrant, you will find this dictionary an essential reference for every-day and specialist jargon. Martin Uren is a broadcast training consultant and member of the Education and Training Committee and the Television Committee of the BKSTS. He is also a member of the SMPTE and the RTS. BKSTS, The Moving Image Society, represents the interests of those who are creatively and technologically involved in the business of providing moving images in all areas of the media.
