Fundamentals of Thermal-fluid Sciences Simon and Schuster
The brilliant, controversial, bestselling critique of American culture that “ hits with the approximate force and effect of electroshock therapy ” (The New York Times)—now featuring a new afterword by Andrew Ferguson in a twenty-fifth anniversary edition. In 1987, eminent political philosopher Allan Bloom published The Closing of the American Mind, an appraisal of contemporary America that “ hits with the approximate force and effect of electroshock therapy ” (The New York Times) and has not only been vindicated, but has also become more urgent today. In clear, spirited prose, Bloom argues that the social and political crises of contemporary America are part of a larger intellectual crisis: the result of a dangerous narrowing of curiosity and exploration by the university elites. Now, in this twenty-fifth anniversary edition, acclaimed author and journalist Andrew Ferguson contributes a new essay that describes why Bloom ’ s argument caused such a furor at publication and why our culture so deeply resists its truths today.

a Professor helps us to discover those hidden truths by looking at literature with the eyes—and the literary codes—of the ultimate professional reader: the college professor. What does it mean when a literary hero travels along a dusty road? When he hands a drink to his companion? When he's drenched in a sudden rain shower? Ranging from major themes to literary models, narrative devices, and form, Thomas C. Foster provides us with a broad overview of literature—a world where a road leads to a quest, a shared meal may signify a communion, and rain, whether cleansing or destructive, is never just a shower—and shows us how to make our reading experience more enriching, satisfying, and fun. This revised edition includes new chapters, a new preface, and a new epilogue, and incorporates updated teaching points that Foster has developed over the past decade.

The Idea of the PhD: The doctorate in the twenty-first-century imagination analyses the PhD as it is articulated in diverse areas of contemporary discourse at a time in which the degree is undergoing growth, change and scrutiny worldwide. It considers not just institutional ideas of the PhD, but those of the broader cultural and social domain as well as asking whether, and to what extent, the idea of the Doctor of Philosophy, the highest achievable university award, is being reimagined in the twenty-first century. In a world where the PhD is undergoing significant radical change, and where inside universities, doctoral enrolments are continually climbing, as the demand for more graduates with high-level research skills increases, this book asks the following questions: How do we understand how the PhD is currently imagined and conceptualised in the wider domain? Where will we find ideas about the PhD, from its purpose, to the nature of research work undertaken and the kinds of pedagogies engaged, to the researchers who undertake it and are shaped by it? International in scope, this is a text that explores the culturally inflected representation of the doctorate and its graduates in the imagination, literature and media. The Idea of the PhD contributes to the research literature in the field of doctoral education and higher education. As such, this will be a fascinating text for researchers, postgraduates and academics interested in the idea of the university.
