The inspiring and timely story of Sonia Sotomayor, who rose up from a childhood of poverty and prejudice to become the first Latino to be nominated to the US Supreme Court. Before Supreme Court Justice Sonia Sotomayor took her seat in our nation's highest court, she was just a little girl in the South Bronx. Justice Sotomayor didn't have a lot growing up, but she had what she needed -- her mother's love, a will to learn, and her own determination. With bravery she became the person she wanted to be. With hard work she succeeded. With little sunlight and only a modest plot from which to grow, Justice Sotomayor bloomed for the whole world to see. Antes de que la magistrada de la Corte Suprema Sonia Sotomayor llegara al máximo tribunal de nuestra nación, no era más que una niña en el South Bronx. La magistrada Sotomayor no tuvo mucho durante sus primeros años, pero sí tuvo lo que contaba -- el amor de su madre, la voluntad de aprender y su propia determinación. Con valentía se hizo la persona que quería ser. Con trabajo arduo triunfó. Con un poquito de sol en un solarcito donde crecer, la magistrada Sotomayor floreció para que todo el mundo la vea.

John Dewey's *Democracy and Education* addresses the challenge of providing quality public education in a democratic society. In this classic work Dewey calls for the complete renewal of public education, arguing for the fusion of vocational and contemplative studies in education and for the necessity of universal education for the advancement of self and society. First published in 1916, *Democracy and Education* is regarded as the seminal work on public education by one of the most important scholars of the century. .27 is a number Ruby hates. It's a number that marks the percentage of the population that has survived. It's a number that means she's one of the "lucky" few still standing. And it's a number that says her father is probably dead. Against all odds, Ruby has survived the catastrophic onset of the killer rain. Two weeks after the radio started broadcasting the warning, "It's in the rain. It's fatal and there's no cure," the drinkable water is running out. Ruby's left with two options: persevere on her own, or embark on a treacherous journey across the country to find her father-if he's even still alive.

An immensely persuasive work of literary criticism that opens a new chapter in the American dialogue on race—and promises to change the way we read American literature. Morrison shows how much the themes of freedom and individualism, manhood and innocence, depended on the existence of a black population that was manifestly unfree--and that came to serve white authors as embodiments of their own fears and desires. According to the *Chicago Tribune*, Morrison "reimagines and remaps the possibility of America." Her brilliant discussions of the "Africanist" presence in the fiction of Poe, Melville, Cather, and Hemingway leads to a dramatic reappraisal of the essential characteristics of our literary tradition. Written with the artistic vision that has earned the Nobel Prize-winning author a pre-eminent place in modern letters,

*Playing in the Dark* is an invaluable read for avid Morrison admirers as well as students, critics, and scholars of American literature.

Imaginary Friend A&C Black

A heartbreaking and powerful story about a black boy killed by a police officer, drawing connections through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better. Live and make it better. Twelve-year-old Jerome is shot by a police officer who mistakes his toy gun for a real threat.

As a ghost, he observes the devastation that's been unleashed on his family and community in the wake of what they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities of today's world, and how one boy grows to understand American blackness in the aftermath of his own death.

Rethinking Schools

In this seminal work, published by the C.I.A. itself, produced by Intelligence veteran Richards Heuer discusses three pivotal points. First, human minds are ill-equipped ("poorly wired") to cope effectively with both inherent and induced uncertainty. Second, increased knowledge of our inherent biases tends to be of little assistance to the analyst. And lastly, tools and techniques that apply higher levels of critical thinking can substantially improve analysis on complex problems.

As insightful and wise today as it was when originally published in 1954, Jacques Ellul's *The Technological Society* has become a classic in its field, laying the groundwork for all other studies of technology and society that have followed. Ellul offers a penetrating analysis of our technological civilization, showing how technology—which began innocuously enough as a servant of humankind—threatens to overthrow humanity itself in its ongoing creation of an environment that meets its own ends. No conversation about the dangers of technology and its unavoidable effects on society can begin without a careful reading of this book. "A magnificent book . . . He goes through one human activity after another and shows how it has been technicized, rendered efficient, and diminished in the process." —Harper's "One of the most important books of the second half of the twentieth-century. In it, Jacques Ellul convincingly demonstrates that technology, which we continue to conceptualize as the servant of man, will overthrow everything that prevents the internal logic of its development, including humanity itself—unless we take necessary steps to move human society out of the environment that 'technique' is creating to meet its own needs." —The Nation "A description of the way in which technology has become completely autonomous and is in the process of taking over the traditional values of every society without exception, subverting and suppressing these values to produce at last a monolithic world culture in which all non-technological difference and variety are mere appearance." —Los Angeles Free Press

Highly controversial when it was first published in 1981, Alasdair MacIntyre's *After Virtue* has since established itself as a landmark work in contemporary moral philosophy. In this book, MacIntyre sought to address a crisis in moral language that he traced back to a European Enlightenment that had made the formulation of moral principles increasingly difficult. In the search for a way out of this impasse, MacIntyre returns to an earlier strand of ethical thinking, that of Aristotle, who emphasised the importance of 'virtue' to the ethical life. More than thirty years after its original publication, *After Virtue* remains a work that is impossible to ignore for anyone interested in our understanding of ethics and morality today.

The Legend of Rock Paper Scissors Pickle Partners Publishing

Ancient authors emphasize dramatic moments in the life of Julia Domna, wife of Roman emperor Septimius Severus (193 – 211). They accuse her of ambition unforgivable in a woman, of instigating civil war to place her sons on the throne, and of resorting to incest to maintain her hold on power. In imperial propaganda, however, Julia Domna was honored with unprecedented titles that celebrated her maternity, whether it was in the role of mother to her two sons (both future emperors) or as the metaphorical mother to the empire. Imperial propaganda even equated her to the great mother goddess, Cybele, endowing her with a public prominence well beyond that of earlier imperial women. Her visage could be found gracing everything from state-commissioned art to privately owned ivory dolls. In *Maternal Megalomania*, Julie Langford unmasks the maternal titles and honors of Julia Domna as a campaign on the part of the administration to garner support for Severus and his sons. Langford looks to numismatic, literary, and archaeological evidence to reconstruct the propaganda surrounding the empress. She explores how her image was tailored toward different populations, including the military, the Senate, and the people of Rome, and how these populations responded to propaganda about the empress. She employs Julia Domna as a case study to explore the creation of ideology between the emperor and its subjects.
