The classic adventure that started it all A long time ago in a galaxy far, far away . . . Luke Skywalker lived and worked on his uncle's farm on the remote planet of Tatooine—and he was bored beyond belief. He yearned for adventures out among the stars, adventures that would take him beyond the farthest galaxies to distant and alien worlds. But Luke gets more than he bargained for when he intercepts a cryptic message from a beautiful princess held captive by a dark and powerful warlord. Luke doesn't know who she is, but he knows he has to save her—and soon, because time is running out. Armed only with courage and with the lightsaber that had been his father's, Luke is catapulted into the middle of the most savage space war ever—and headed straight for a desperate encounter on the enemy battle station known as the Death Star. . . .

Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara’s older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she’d traveled too far, if there was still a way home. “Beautiful and

propulsive . . . Despite the singularity of [Westover’s] childhood, the questions her book poses are universal: How much of ourselves should we give to those we love? And how much must we betray them to grow up?”—Vogue NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • O: The Oprah Magazine • Time • NPR • Good Morning America • San Francisco Chronicle • The Guardian • The Economist • Financial Times • Newsday • New York Post • theSkimm • Refinery29 • Bloomberg • Self • Real Simple • Town & Country • Bustle • Paste • Publishers Weekly • Library Journal • LibraryReads • Book Riot • Pamela Paul, KQED • New York Public Library

Innovation Policy and the Economy Holt Paperbacks

From one of America’s foremost economic and political thinkers comes a vital analysis of our new hypercompetitive and turbo-charged global economy and the effect it is having on American democracy. With his customary wit and insight, Reich shows how widening inequality of income and wealth, heightened job insecurity, and corporate corruption are merely the logical results of a system in which politicians are more beholden to the influence of business lobbyists than to the voters who elected them. Powerful and thought-provoking, *Supercapitalism* argues that a clear separation of politics and capitalism will foster an environment in which both business and government thrive, by putting capitalism in the service of democracy, and not the other way around.

Gideon the Ninth is the first book in the New York Times and USA Today Bestselling Locked Tomb Trilogy, and one of the Best Books of 2019 according to NPR, the New York Public Library, Amazon, BookPage, Shelf Awareness, BookRiot, and Bustle! WINNER of the 2020 Locus Award and Crawford Award Finalist for the 2020 Hugo, Nebula, Dragon, and World Fantasy Awards "Unlike anything I've ever read." -V.E. Schwab "Lesbian necromancers explore a haunted gothic palace in space!" -Charles Stross "Deft, tense and

atmospheric, compellingly immersive and wildly original." -The New York Times The Emperor needs necromancers. The Ninth Necromancer needs a swordswoman. Gideon has a sword, some dirty magazines, and no more time for undead nonsense. Tamsyn Muir's Gideon the Ninth unveils a solar system of swordplay, cut-throat politics, and lesbian necromancers. Her characters leap off the page, as skillfully animated as arcane revenants. The result is a heart-pounding epic science fantasy. Brought up by unfriendly, ossifying nuns, ancient retainers, and countless skeletons, Gideon is ready to abandon a life of servitude and an afterlife as a reanimated corpse. She packs up her sword, her shoes, and her dirty magazines, and prepares to launch her daring escape. But her childhood nemesis won't set her free without a service. Harrowhark Nonagesimus, Reverend Daughter of the Ninth House and bone witch extraordinaire, has been summoned into action. The Emperor has invited the heirs to each of his loyal Houses to a deadly trial of wits and skill. If Harrowhark succeeds she will be become an immortal, all-powerful servant of the Resurrection, but no necromancer can ascend

without their cavalier. Without Gideon's sword, Harrow will fail, and the Ninth House will die. Of course, some things are better left dead. The Devil and the Dark Water A&C Black Charles Derber introduces and vividly explains the idea of a sociopathic society and why the idea has become necessary to understand today's world. Sociopathic society is rooted in governments and economies, not psychiatry. The book offers a new sociology of societies organized around antisocial values, which ultimately lead to societal and planetary self-destruction. Most of the sociopathic behaviors are perfectly legal and are perpetrated by governments, financial institutions, and corporate capitalism. Focusing on the United States, Derber connects the dots of Wall Street meltdown, guns and murder, uninhibited greed, the 1% and the 99%, a new crisis of unemployable surplus people, Hurricane Sandy and global warming, cheating scandals, and more including the war on democracy itself. Although the book brings together a breathtaking set of

stories of a system run wild, it also offers hope, showing pathways for confronting and avoiding the many ways a society can commit sociocide. FEATURES OF THE BOOK"

This manual has been designed and written with the purpose of introducing key concepts and areas of debate around the "creative economy", a valuable development opportunity that Latin America, the Caribbean and the

world at large cannot afford to miss. The creative economy, which we call the "Orange Economy" in this book (you'll see why), encompasses the immense wealth of talent, intellectual property, interconnectedness, and, of course, cultural heritage of the Latin American and Caribbean region (and indeed, every region). At the end of this manual, you will have the knowledge base necessary to understand and explain what the Orange Economy is and why it is so important. You will also acquire the analytical tools needed to take better advantage of opportunities across the arts, heritage, media, and creative services.

From bestselling writer David Graeber—"a master of opening up thought and stimulating debate" (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013,

David Graeber asked this question in a playful, provocative essay titled "On the Phenomenon of Bullshit Jobs." It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society's most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. "Clever and charismatic" (The New Yorker), Bullshit Jobs gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and "a thought-provoking examination of our working lives" (Financial Times).

Greece in the age of Heroes. Patroclus, an awkward young prince, has been exiled to the kingdom of Phthia. Here he is nobody, just another unwanted boy living in the shadow of King Peleus and his golden son, Achilles. Achilles, 'best of all the

Greeks', is everything Patroclus is not - strong, beautiful, the child of a goddess - and by all rights their paths should never cross. Yet one day, Achilles takes the shamed prince under his wing and soon their tentative companionship gives way to a steadfast friendship. As they grow into young men skilled in the arts of war and medicine, their bond blossoms into something far deeper - despite the displeasure of Achilles's mother Thetis, a cruel and deathly pale sea goddess with a hatred of mortals. Fate is never far from the heels of Achilles. When word comes that Helen of Sparta has been kidnapped, the men of Greece are called upon to lay siege to Troy in her name. Seduced by the promise of a glorious destiny, Achilles joins their cause, Torn between love and fear for his friend, Patroclus follows Achilles into war, little knowing that the years that follow will test everything they have learned, everything they hold dear. And that, before he is ready, he will be forced to surrender his friend to the hands of Fate. Profoundly moving and breathtakingly original, this rendering of the epic Trojan War is a dazzling feat of the imagination, a devastating love story, and an almighty battle between gods and kings, peace and glory, immortal fame and the human heart.

Most startups don't fail because they can't build a product. Most startups fail because they can't get traction. Startup advice tends to be a lot of platitudes repackaged with new buzzwords, but

Traction is something else entirely. As Gabriel Weinberg and Justin Mares learned from their own experiences, building a successful company is hard. For every startup that grows to the point where it can go public or be profitably acquired, hundreds of others sputter and die. Smart entrepreneurs know that the key to success isn't the originality of your offering, the brilliance of your team, or how much money you raise. It's how consistently you can grow and acquire new customers (or, for a free service, users). That's called traction, and it makes everything else easier—fund-raising, hiring, press, partnerships, acquisitions. Talk is cheap, but traction is hard evidence that you're on the right path. Traction will teach you the nineteen channels you can use to build a customer base, and how to pick the right ones for your business. It draws on inter-views with more than forty successful founders, including Jimmy Wales (Wikipedia), Alexis Ohanian (reddit), Paul English (Kayak), and Dharmesh Shah (HubSpot). You'll learn, for example, how to:

- Find and use offline ads and other channels your competitors probably aren't using
- Get targeted media coverage that will help you reach more customers
- Boost the effectiveness of your email marketing campaigns by automating staggered sets of prompts and updates
- Improve your search engine rankings and advertising through online tools and research

Weinberg and Mares know that there's no one-size-fits-all solution; every startup faces unique challenges and will benefit from a blend of these nineteen traction channels. They offer a three-step framework (called Bullseye) to figure out which ones

will work best for your business. But no matter how you apply them, the lessons and examples in Traction will help you create and sustain the growth your business desperately needs.

The Data Science Design Manual Simon and Schuster
This engaging and clearly written textbook/reference provides a must-have introduction to the rapidly emerging interdisciplinary field of data science. It focuses on the principles fundamental to becoming a good data scientist and the key skills needed to build systems for collecting, analyzing, and interpreting data. The Data Science Design Manual is a source of practical insights that highlights what really matters in analyzing data, and provides an intuitive understanding of how these core concepts can be used. The book does not emphasize any particular programming language or suite of data-analysis tools, focusing instead on high-level discussion of important design principles. This easy-to-read text ideally serves the needs of undergraduate and early graduate students embarking on an "Introduction to Data Science" course. It reveals how this discipline sits at the intersection of statistics, computer science, and machine learning, with a distinct heft and character of its own. Practitioners in these and related fields will find this book perfect for self-study as well. Additional learning tools: Contains "War Stories," offering perspectives on how data science applies in the real world Includes "Homework Problems," providing a wide range of exercises and projects for self-study Provides a

complete set of lecture slides and online video lectures at www.data-manual.com Provides "Take-Home Lessons," emphasizing the big-picture concepts to learn from each chapter Recommends exciting "Kaggle Challenges" from the online platform Kaggle Highlights "False Starts," revealing the subtle reasons why certain approaches fail Offers examples taken from the data science television show "The Quant Shop" (www.quant-shop.com)

what may be done to change Hollywood's defamation of Arabs.

Flash Boys: A Wall Street Revolt Routledge

A groundbreaking book that dissects a slanderous history dating from cinema's earliest days to contemporary Hollywood blockbusters that feature machine-gun wielding and bomb-blowing "evil" Arabs Award-winning film authority Jack G. Shaheen, noting that only Native Americans have been more relentlessly smeared on the silver screen, painstakingly makes his case that "Arab" has remained Hollywood's shameless shorthand for "bad guy," long after the movie industry has shifted its portrayal of other minority groups. In this comprehensive study of over one thousand films, arranged alphabetically in such chapters as "Villains," "Sheikhs," "Cameos," and "Cliffhangers," Shaheen documents the tendency to portray Muslim Arabs as Public Enemy #1—brutal, heartless, uncivilized Others bent on terrorizing civilized Westerners. Shaheen examines how and why such a stereotype has grown and spread in the film industry and
