The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the

United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

The Economic and Fiscal Consequences of Immigration finds that the long-term impact of immigration on the wages and employment of native-born workers overall is very small, and that any negative impacts are most likely to be found for prior immigrants or native-born high school dropouts. First-generation immigrants are more costly to governments than are the native-born, but the second generation are among the strongest fiscal and economic contributors in the U.S. This report concludes that immigration has an overall positive impact on long-run economic growth in the U.S. More than 40 million people living in the United States were born in other countries, and almost an equal number have at least one foreign-born parent. Together, the first generation (foreign-born) and second generation (children of the foreign-born) comprise

almost one in four Americans. It comes as little surprise, then, that many U.S. residents view immigration as a major policy issue facing the nation. Not only does immigration affect the environment in which everyone lives, learns, and works, but it also interacts with nearly every policy area of concern, from jobs and the economy, education, and health care, to federal, state, and local government budgets. The changing patterns of immigration and the evolving consequences for American society, institutions, and the economy continue to fuel public policy debate that plays out at the national, state, and local levels. The *Economic and Fiscal Consequences of Immigration* assesses the impact of dynamic immigration processes on economic and fiscal outcomes for the United States, a major destination of world population movements. This report will be a fundamental resource for policy makers and law makers at the federal, state, and local levels but extends to the general public, nongovernmental organizations, the business community, educational institutions, and the research community.

In this book, Dr. Poul Chr. Matthiessen, Denmark's foremost professor of demography, presents a broad overview of the process of immigration to Denmark and the integration of immigrants into Danish society. He examines a number of related topics, such as immigrants' patterns of residence, immigrants' education and their command of the Danish language, crime, the position of immigrants in relation to the social security system, and the significance of immigration for public finances. The topics also include the attitudes of Danes to their new fellow-citizens. For example, are Danes more or less anti-immigrant than other Europeans? And have the Danes' views on foreigners changed over time? The book is both an overview and a detailed presentation of immigration to Denmark since 1960, and its impact on Danish society.

Every wave of immigrants entering the United States has faced prejudice. As each group gradually assimilates into the dominant culture, it becomes easy to forget the anger that was previously directed at them. People always believe that the next group of immigrants poses a more severe threat than the ones that came before them, but

readers discover that these fears often prove to be unfounded. Detailed infographics and full-color photographs supplement the informative text's analysis of the history of immigration, its economic implications, and what immigration policies should be implemented in the future.

A much-needed look at innovative and effective methods for creating virtual learning environments for human services. *Web-Based Education in the Human Services* reflects the vitality and diversity of Web-based courses currently delivered within human services. Unlike previous texts that have combined technologies such as Interactive Television (ITV) and two-way audio where Web involvement was minimal, this unique book focuses on Web-based models, tools, and techniques used in courses where the majority of the content is delivered online. The book's contributors emphasize the social aspects of learning, examining topical areas not usually associated with Web-based education as they remind us of the need to move beyond the similarities between WBE and face-to-face (FTF) approaches. *Web-Based Education in the Human Services* documents a course delivery method coming of age in its desire to create virtual learning environments that incorporate a variety of techniques and strategies. These environments use concepts and tools beyond what packages such as WebCT currently offer, highlighting the power of designing a complete Web-based curriculum, rather than viewing each course separately. Many of the most successful approaches presented in this invaluable book don't involve sophisticated tools or

programming, but the creative design of interactive scenarios, emotional content, and feedback mechanisms that reinforce the instructor's role as the crucial ingredient for success. *Web-Based Education in the Human Services* examines: adult learning theories teaching practice skills through Web-based technology how to bridge the gap between theory and practice faculty perceptions of the effectiveness of Web-based instruction compared to face-to-face instruction the accessibility of Web-based education the significance of emotion in learning Web-based delivery of a graduate professional training program the creation, delivery, and evaluation of a pilot course using Blackboard 6™ the development of a Web-based undergraduate child welfare course the use of Web-based video clips for counselor skills training the design, development, pilot, and revision of a Web-based social work practice course an online format for agency-based field instruction the design of a Web-based graduate program in counseling psychology and much more! *Web-Based Education in the Human Services* is an invaluable resource for social work and human services educators, including education, nursing, and psychology, Web-course developers, and college and university administrators. **Hearings Before a Subcommittee of the Committee on Appropriations, House of Representatives, One Hundred Third Congress, Second Session** USCCB Publishing

Immigration, Incorporation and Transnationalism is an intriguing collection of articles and essays. It was developed to commemorate the twenty-fifth anniversary of *The Journal of American Ethnic History*. Its purpose, like that of the *Immigration and*

Ethnic History Society, is to integrate interdisciplinary perspectives and exciting new scholarship on important themes and issues related to immigration and ethnic history. The essays in this work encompass broad perspectives, cases studies, and recent developments. Nancy Foner, in "Then and Now," discusses immigration to New York City from both contemporary and historic perspectives. Christiane Harzig, in "Domestics of the World (Unite?)" explores labor migration systems and personal trajectories of household domestics from both global and historic perspectives. Val Johnson, in "The Moral Aspects of Complex Problems," looks at New York City electoral campaigns against vice and the incorporation of immigrants from 1890-1901. Roger Daniels delves into U.S. immigration policy in a time of war from 1939-1945. Diane Vecchio, in "Ties of Affection," relates family narratives in the history of Italian migration. Barbara Posadas and Roland Guyotte present Chicago's Filipinos in the aftermath of World War II. Deborah Moore asks if anyone is ever "At Home in America?" by revisiting second generation immigrants. With an exceptional case study Sharron Schwartz, in "Bridging the Great Divide," investigates the evolution and impact of Cornish translocalism in Britain and the U.S. Carolle Charles asks if contemporary Haitians are political refugees or economic immigrants? Guillermo Grenier explores the creation and maintenance of Cuban American "exile ideology" based on a 2004 survey of this group. Ester Hernandez, in "Relief Dollars," looks at U.S. policies toward Central America from the 1980s to the present day. In the final essay, Louis Canikar presents the contemporary topic of the Arab American experience. The

volume also includes more than thirty review essays making it a fundamental contribution to the field.

Outside Justice: Undocumented Immigrants and the Criminal Justice System fills a clear gap in the scholarly literature on the increasing conceptual overlap between popular perceptions of immigration and criminality, and its reflection in the increasing practical overlap between criminal justice and immigration control systems. Drawing on data from the United States and other nations, scholars from a range of academic disciplines examine the impact of these trends on the institutions, communities, and individuals that are experiencing them. Individual entries address criminal victimization and labor

exploitation of undocumented immigrant communities, the effects of parental detention and deportation on children remaining in destination countries, relations between immigrant communities and law enforcement agencies, and the responses of law enforcement agencies to drastic changes in immigration policy, among other topics. Taken as a whole, these essays chart the ongoing progression of social forces that will determine the well-being of Western democracies throughout the 21st century. In doing so, they set forth a research agenda for reexamining and challenging the goals of converging criminal justice and immigration control policy, and raise a number of carefully considered, ethical alternatives to the contemporary policy status quo. Contemporary immigration is the focus of highly charged rhetoric and policy innovation, both attempting to define the movement of people across national borders as fundamentally an issue of criminal justice. This realignment has had profound effects on criminal justice policy and practice and immigration control alike, and raises far-reaching implications for social inclusion, labor economies, community cohesion, and a host of other areas of immediate interest to social science researchers and practitioners.

The Comparative Politics of Immigration Policy Routledge

Immigration policy is one of the most contentious issues facing policy makers in the twenty-first century. Immigration in the Twenty-First Century provides students with an in-depth introduction to the politics that have led to the development of different approaches over time to immigration policy in North America, Europe, and Australia. The authors draw on the work of the most

respected researchers in the field of immigration politics as well as providing insights from their own research. The book begins by giving students an overview of the theoretical approaches used by political scientists and other social scientists to analyze immigration politics, as well as providing historical background to the policies that are affecting electoral politics. A comparative politics approach is used to develop the context that explains the ways that immigration has affected politics and how politics has affected immigration policy in migrant-receiving countries. Topics such as party politics, labor migration, and citizenship are examined to provide a broad basis for understanding policy changes over time. Immigration remains a contentious issue, not only in American politics, but around the globe. The authors describe the way that immigrants are integrated, their ability to become citizens, and their role in democratic politics. This broad-ranging yet concise book allows students to gain a better understanding of the complexities of immigration politics and the political forces defining policy today. Features of this Innovative Text Covers hot topics including party politics, labor migration, assimilation, and citizenship both in the United States as well as globally. The rapid rise in immigration over the past few decades has transformed the American social landscape, while the need to understand its impact on society has led to a burgeoning research literature.

Predominantly non-European and of varied cultural, social, and economic backgrounds, the new immigrants present analytic challenges that cannot be wholly met by traditional immigration studies.

Immigration Research for a New Century

demonstrates how sociology, anthropology, history, political science, economics, and other disciplines intersect to answer questions about today's immigrants. In Part I, leading scholars examine the emergence of an interdisciplinary body of work that incorporates such topics as the social construction of race, the importance of ethnic self-help and economic niches, the influence of migrant-homeland ties, and the types of solidarity and conflict found among migrant populations. The authors also explore the social and national origins of immigration scholars themselves, many of whom came of age in an era of civil rights and ethnic reaffirmation, and may also be immigrants or children of immigrants. Together these essays demonstrate how social change, new patterns of immigration, and the scholars' personal backgrounds have altered the scope and emphases of the research literature, allowing scholars to ask new questions and to see old problems in new ways. Part II contains the work of a new generation of immigrant scholars, reflecting the scope of a field bolstered by different disciplinary styles. These essays explore the complex variety of the immigrant experience, ranging from itinerant farmworkers to Silicon Valley engineers. The demands of the American labor force, ethnic, racial, and gender stereotyping, and state regulation are all shown to play important roles in the economic adaptation of immigrants. The ways in which immigrants participate politically, their relationships among themselves, their attitudes toward naturalization and citizenship, and their own sense of cultural identity are also addressed. *Immigration Research for a New Century* examines the complex effects that

immigration has had not only on American society but on scholarship itself, and offers the fresh insights of a new generation of immigration researchers.

Frameworks and Ethics for Research with Immigrants John Wiley & Sons

“We must secure our borders” has become an increasingly common refrain in the United States since 2001. Most of the “securing” has focused on the US–Mexico border. In the process, immigrants have become stigmatized, if not criminalized. This has had significant implications for social scientists who study the lives and needs of immigrants, as well as the effectiveness of programs and policies designed to help them. In this groundbreaking book, researchers describe their experiences in conducting field research along the southern US border and draw larger conclusions about the challenges of contemporary border research. Each chapter raises methodological and ethical questions relevant to conducting research in transnational contexts, which can frequently be unpredictable or even volatile. The volume addresses the central question of how can scholars work with vulnerable migrant populations along the perilous US–Mexico border and maintain ethical and methodological standards, while also providing useful knowledge to stakeholders? Not only may immigrants be afraid to provide information that could be incriminating, but researchers may also be reluctant to allow their findings to become the basis of harsher law enforcement, unjustly penalize the subjects of their research, and inhibit the formulation of humane and effective immigration policy based on scholarly research. All of these concerns, which are perfectly legitimate from the social scientists’ point of view, can put researchers into conflict with legal authorities. Contributors acknowledge their quandaries and explain how they have dealt with them. They use specific topics—reproductive health issues and sexually transmitted diseases among immigrant women,

a study of undocumented business owners, and the administration of the Mexican Household Survey in Phoenix, among others—to outline research methodology that will be useful for generations of border researchers.
